## 1 PURPOSE

The purpose of this Wildlife Sightings Report is to provide a summary of wildlife sightings and interactions with the Lower Churchill Hydroelectric Generation Project (including Muskrat Falls Generation and Labrador Transmission Asset [LTA]) and the Labrador-Island Transmission Link (L-ITL) for 2015. This is to comply with commitments made in various Protection and Environmental Effects Monitoring Plans (PEEMPs) for both the Generation and Transmission projects. These PEEMPs include:

- L-ITL Furbearers and Small Mammals Protection and Environmental Effects Monitoring Plan
- L-ITL Caribou Protection and Environmental Effects Monitoring Plan
- LCP Black Bear Protection and Environmental Effects Monitoring Plan
- LCP Caribou Protection and Environmental Effects Monitoring Plan
- LCP Furbearers Protection and Environmental Effects Monitoring Plan
- LCP Moose Protection and Environmental Effects Monitoring Plan

## 2 SCOPE

As stated in the above listed PEEMPs, the On-Site Environmental Monitor (OSEM) is responsible for tracking wildlife sightings and encounters. Sightings, interactions and consequences that relate to furbearers, caribou, black bear and moose encounters during construction, have been recorded and are presented in a tabular format with the following information (as available):

- Date
- Time
- Location (UTM or lats/longs or other description)
- Interaction type – brief description of the type of interaction: sighting, human/animal conflict, vehicle/animal conflict
- Furbearer species details – sex, age, behavior at the time of the interaction
- Interaction details – explanation of the nature of the interaction
- Issue resolution – explanation of the action(s) undertaken to resolve the interaction

2015 Wildlife Sightings Report for the Lower Churchill Project		
Nalcor Doc. No.	Revision	Page
LCP-PT-MD-0000-EV-RP-0025-01	B1	5

- Interaction consequence – description of the outcome (animal was scared away; animal was killed)
- Additional actions undertaken – details of actions undertaken (e.g., no additional actions required; report sent to Wildlife Division) and notes on regulatory compliance

#### 5 PROJECT DESCRIPTION

##### 5.1 MUSKRAT FALLS GENERATION

The Muskrat Falls Generation Project will include:

- 22 km of access roads, including upgrading and new construction, and temporary bridges;
- A 1,500 person accommodations complex (for the construction period);

<b>2015 Wildlife Sightings Report for the Lower Churchill Project</b>		
<b>Nalcor Doc. No.</b>	<b>Revision</b>	<b>Page</b>
<b>LCP-PT-MD-0000-EV-RP-0025-01</b>	<b>B1</b>	<b>7</b>

- A north roller compacted concrete overflow dam;
- A south rock fill dam;
- River diversion during construction via the spillway;
- Five (5) vertical gate spillway;
- Reservoir preparation and reservoir clearing;
- Replacement fish and of terrestrial habitat;
- North spur stabilization works;
- A close coupled intake and powerhouse, including:
  - Four (4) intakes with gates and trash racks;
  - Four (4) turbine/generator units at approximately 206 MW each with associated ancillary electrical/mechanical and protection/control equipment;
  - Five (5) power transformers (includes 1 spare), located on the draft tube deck of the powerhouse; and
  - Two (2) overhead cranes each rated at 450 Tonnes

LCP-PT-MD-0000-EV-RP-0025-01	B1	8

**Figure-1 Muskrat Falls Generating Facility**

## **5.2 LABRADOR TRANSMISSION ASSET (LTA)**

LTA consists of the ac transmission line system from Churchill Falls to Muskrat Falls (see Figure 5-2), specifically:

- Churchill Falls switchyard extension;
- Muskrat Falls switchyard;
- Transmission lines from Muskrat Falls to Churchill Falls: double-circuit 315 kV ac, 3 phase lines, double bundle conductor, Single circuit galvanized lattice steel guyed suspension and rigid angle towers; 247 km long; and
- 735 kV Transmission Line at Churchill Falls interconnecting the existing and the new Churchill Falls switchyards

### 5.3 LABRADOR-ISLAND TRANSMISSION LINK (LITL)

The Labrador –Island Transmission Link consists of a  $\pm$  350 kilovolt (kV) High Voltage direct current (HVdc) electricity transmission system from Central Labrador to the Avalon Peninsula on the Island of Newfoundland (the Island) (Figure 5-3).

The transmission system will include the following key components:

- An alternating current (ac) to direct current (dc) converter station at Muskrat Falls;
- Approximately 400 km overhead HVdc transmission line from Muskrat Falls to Forteau Point;
- A 60 m wide Right Of Way (ROW);
- Three, approximately 35 km long, submarine cables across the Strait of Belle Isle (SOBI) (i.e., between Forteau Point and Shoal Cove), with associated onshore infrastructure (transition compounds and land cables at both cable landings);
- Approximately 700 km of overhead HVdc transmission line from Shoal Cove to the Avalon Peninsula;
- A dc to ac converter station at Soldiers Pond;
- Shoreline electrodes at L’Anse au Diable and Dowden’s Point,
- An overhead, wood pole electrode line
  - Near Forteau Point and L’Anse au Diable; and
  - Between Soldiers Pond and Dowden’s Point.

## 6 WILDLIFE SIGHTINGS AND INTERACTIONS

### 6.1 MOOSE

#### 6.1.1 Lower Churchill Hydroelectric Generation Project

There were nineteen (19) moose sightings for the Lower Churchill Hydroelectric Generation Project in 2015. No interactions caused mortality, however there was one (1) instance where Department of Natural Resources made the decision to euthanize an injured calf.

**Table 6-1 Moose Sightings and Interactions for the Lower Churchill Hydroelectric Generation Project in 2015**

Date	Project Component	Location	Species Details	Interaction Details	Interaction Consequence	Additional actions undertaken	Notes
03-May-2015	HVac Line	TLH near chainage 192+250	Calf	n/a	n/a	No additional actions required	Was being chased by two wolves
Week Ending 05-Jun-2015	North Spur Stabilization Works	TLH 1.5-2km east of North Spur access road	n/a	n/a	n/a	No additional actions required	n/a
06-Jun-2015	HVac Line	L2-148	n/a	n/a	n/a	No additional actions required	n/a
10-Jun-2015	Muskrat Falls	MacKenzie River	n/a	n/a	n/a	No additional actions required	Two moose observed
10-Jun-2015	HVac Line	AT-47 access road	n/a	n/a	n/a	No additional actions required	n/a
11-Jun-2015	South Side Access Road	KM 17 of SSAR	n/a	n/a	n/a	No additional actions required	Two moose observed

### 6.1.2 Labrador – Island Transmission Link

There were 187 moose sightings reported for the Labrador-Island Transmission Link in 2015.

**Table 6-2 Moose Sightings and Interactions for the Labrador-Island Transmission Link in 2015**

Date	Project Component	Location	Species Details	Interaction Details	Interaction Consequence	Additional actions undertaken	Notes
18-Jan-2015	HVdc Line (CT0327-015)	HWY 432 on the way to Round Lake Forest Resource Road	n/a	n/a	n/a	No additional actions required	n/a
20-Jan-2015	HVdc Line (CT0327-015)	Near S3-107, chainage 042+000	n/a	n/a	n/a	No additional actions required	Two moose observed; one cow and one calf
22-Jan-2015	HVdc Line (CT0327-015)	KM 7 of Round Pond Resource Road	n/a	n/a	n/a	No additional actions required	Two moose observed; one cow and one calf
