

The Board has requested that Nalcor designate a person or persons that can co-ordinate with the Board's engineering technical advisors and independent engineering consultant on the technical information to be filed. We look forward to being advised as soon as possible of the designated contact.

The Board has also requested that Nalcor make a presentation to Board staff on the components of the Muskrat Falls Project and the Isolated Island Option to assist in their understanding of the scope of the projects to be reviewed for the Reference. The Consumer Advocate will be invited to this presentation. We suggest that this presentation be scheduled for July. Please advise of suitable dates so that this may be scheduled.

The Board is developing procedural guidelines and a schedule for the Reference which will be circulated to all identified parties for comment at a later time.

If you have any questions or require any clarification, please do not hesitate to contact the Board's Legal Counsel, Ms Maureen Greene at 726-6781.

Yours truly,

Cheryl Blundon
Director of Corporate Services and Board Secretary
