Subject: MHI DG3 review

Hello Charles, just a quick update and one question for you.

Nalcor still has not scheduled the MHI CPW financial review as they were taking their results to the President and CEO first. I am expecting a email from Brian Crawley on the status today but have not received anything yet. I had tentatively scheduled Mack Kast to visit for CPW base case and sensitivity review late next week but I believe that will be delayed further.

The rest of the report is largely drafted and undergoing MHI's internal review which I hope to have that finished by the end of next week. I plan to go on vacation starting August 3rd returning August 20th ; however, I will only have cell coverage for the latter half of my vacation.

Paul Harrington and Brian Crawley have asked yesterday during a teleconference to review the MHI report, preferably in sections so they can comment. I was planning on including them just to ensure that the facts are correct and that I am not disclosing anything they feel is confidential information. Do you have any objections to Nalcor reviewing and commenting on the draft MHI report?

Also, we need to move on that wind proposal as I need to have that kick off meeting with my technical staff before I leave on vacation.

Hope the weathers nice this weekend in St. John's.

Regards,

Paul Wilson, P. Eng.
