Subject: Loan Guarantee

Minister

for your information, I had a request from Gary Norris today, to prepare a note for the premier to assess how we would go about obtaining a guarantee from the federal government related to the lower churchill project. Required for monday.

We will have something over the weekend and should be available for your review sunday or monday.

There is really no established protocol in this regard (similar to request to our government). We will pull something together to discuss alternate approaches, things to consider and perhaps a discussion of those things the feds would look at in evaluating a request etc.

I had assumed that there had been some discussion of this with the feds previously, but maybe not much done yet in this regard.

Terry
