Vanessa

Just got a call from Rob Hull and he was inquiring as to what specific information we were looking to review. Can you give me a call when you get a chance?

Thanks,
Gerard

Subject: Follow Up from Nalcor Meeting

Hi Vanessa,

Just a quick follow up. As we discussed, myself and Gerard have a really good meeting this morning with Steve Goudie at Nalcor to discuss more of the project analysis. We went through a slide presentation (could not take away copies) reviewing some of the project cases including Isolated Island and MF/Infeed as well as some others. As I said, we had a really good discussion and Steve did provide some clarification on many aspects of the approach, analysis and results. I don't think we are at a point where we have a full appreciation/understanding but we are certainly further ahead.

Please see attached for the Info Request/Question list with our brief overviews of some of the discussion from this morning. I am sure some things have been missed and others require further engagement but this may be worthwhile for your consideration. I would advise on some caution with this piece as we are trying to reflect what we heard but would still benefit from further follow-up (whether meetings or info sharing).

Please let us know if you wish to discuss.

Paul
