Getting closer; Emera are ok with concept on risk and provided sound principles on transmission access. Gonna spend the night crafting the words.

Todd and I have been through the Gate 2 Decision document and needs some work. The process to arrive at the decision is not explained well; its written with the outcome predetermined. With Leona gone, we may have to do the writing here

Emera are a little miffed that we knew NS was engaging an advisor and that we knew the name. you may want to alert Murray so that he can reach out to them before they complain to govt.
