Subject: technical briefing on MF

Robert

We're doing a deep technical briefing for some DNR staff on March 15-16, two afternoons. Wanted to mention it to you in case you thought there might be others in gov who would benefit from it. We'll cover financing, rates as well as construction approach, project execution, risk management and some technical/engineering aspects as well. It's designed for the "lay person" but is meant to be a walk through some of the basic project elements.

Dawn

Dawn S. Dalley

Vice President, Corporate Relations
