Importance: High

My first reaction is they still do not uinderstand

The critical issue for me is the MHI requirement for information to be provided to them. This is wrong, and is an IR in reality

MHI should meet with our team and review the data and documentation not have it all sent to them

They are in auidit mode and not review mode

Latest from the review. I'll set up a time early next week to discuss what is doable and what will be problematic.

Subject: NFL2 SCOPE OF SERVICES - Government of Newfoundland - Muskrat Falls DG3 review

Hello Charles, it was a pleasure to meet with you and Walter over the last two days. As a result, we have gained a better understanding of the project constraints, goals, and inputs for this important review project. Al and I have revised the scope of work which now captures all the important elements required and factors in the data availability and schedule. We have also removed the items that do not require our involvement, in particular the power system reliability review, Muskrat Falls Hydrology review, and the detailed HVdc converter station review.

I will begin to estimate the amount of effort and pricing for your consideration and wait to hear from you if this scope of work is agreeable.

My regards,

Paul Wilson, P. Eng.
