Subject : Re: ECNL Act Amendments

Thank-you, Mark. Our success is collective and is a result of formidable teamwork between DNR and ECNL. Also the personal relationships that have been formed over the past 2 years will ensure that the plan for ECNL will continue to unfold and success will be assured. We have a lot more work to do and I look forward to our next task of completing the capital structure for ECNL and the subs.

Charles

Subject: ECNL Act Amendments

Hi Charles:

I understand these amendments passed in the House today. I just wanted to say thanks for your efforts in moving this forward for us. It was only this afternoon I was talking to Wayne Chipman and he remarked on the tremendous support we have been receiving from government officials in connection with our efforts to move forward on the Energy Plan mandate. I have heard similar comments recently from others within the company as well. We are all trying to lay the foundation for our future success as a Province and there is a real sense of teamwork in the air right now. You guys did one heck of a lot of legwork for us on this one and I just wanted to let you know your efforts are appreciated.

Mark
