TABLE OF CONTENTS

1.0 PURPOSE

The purpose of this document is to provide the results of the Bid Evaluation and to recommend a preferred Bidder for CH0031 – Supply and Install Mechanical and Electrical Auxiliaries (MF). The Award Recommendation is based on evaluating the following criteria:

- Commercial
- Technical
- Quality
- Health and Safety
- Environmental
- Benefits

The Bid Evaluation was completed in accordance with the approved Bid Evaluation Plan dated 22-Jan-2015.

2.0 RECOMMENDATION

The Overall Scoring Matrix is included in Appendix 1. Bidders are ranked as follows:

1. Cahill-Ganotec Joint Venture (C-G) – **91.7**%
2. Black & McDonald Limited (B&M) – 79.9%

Based on the above, and in accordance with the included evaluation, it is recommended that CH0031 – Supply and Install Mechanical and Electrical Auxiliaries (MF) is awarded to **Cahill-Ganotec Joint Venture** for an estimated Contract Value of **$189,293,887.68**. This estimated Contract Value is calculated using the Bidder's material take off quantities.

Details of the comparison to budget, specific and non-specific growth, and escalation considerations are included in Appendix 2.

3.0 BIDDERS LIST

RFPs were issued to the following approved Bidders:

- **Black & McDonald Limited**
- **Cahill-Ganotec Joint Venture**
- Groupe Plombaction Inc. Joint Venture
- Aecon Industrial, a Division of Aecon Group Inc.
- Pennecon Energy Ltd.
- Andritz Hydro Canada Inc.
- **Alberici Constructors, Inc., Lorneville Mechanical Contractors Ltd. and Sunny Corner Enterprises Inc. Joint Venture (LASC)**

The following Bidders declined to submit an RFP:

- Groupe Plombaction Inc. Joint Venture
- Aecon Industrial, a Division of Aecon Group Inc.

- Pennecon Energy Ltd.
- Andritz Hydro Canada Inc.

4.0 SCOPE

The scope of Work includes design, supply, installation, registration and completions of mechanical piping systems, heating ventilation and cooling (HVAC) systems, auxiliary electrical systems, assembly and installation of major electrical equipment supplied by Company's Other Contractors, all connections, cabling, site testing, Completions of all electrical and mechanical installation made by Contractor, removal and disposal of all temporary electrical and mechanical installations. Supply and installation of architectural interior works for the Muskrat Falls Powerhouse are also included.

CH0031 has a significant amount of mechanical and electrical equipment (both supplied by the nominated CH0031 Contractor and Company's other Suppliers) to be installed and commissioned by the CH0031 Contractor. There are a number of important interfaces with this equipment installed by the CH0031 Contractor and the Powerhouse Protection, Control and Monitoring System provided by the CH0030 Contractor.

The Spillway concrete works, gates, stop logs, towers, hoists, Spillway electrical building, as well as power supply and controls for the Spillway for the diversion phase will be by Company's Other Contractors but final connection to the Powerhouse power supply and controls is a component of the CH0031 Work.

The Intake concrete works, the Intake trash rack, Intake bulkhead gates, Intake gates and hoists and hoist Motor Control Centers (MCC) will be by Company's Other Contractors, but the power supply to the MCCs in the Intake and Intake building ancillary services as well as final connection to the Powerhouse power supply and controls is a component of the CH0031 Work.

The Work will also consist of supplying detailed documentation for design, quality control, and operation and maintenance for all work required by the Agreement, and the training of Company's personnel.

5.0 RFP SCHEDULE

RFPs were issued on 10-Jun-2014 with a closing date of 16-Jan-2015. Proposals were received from the following three (3) Bidders before the closing date and time and were opened on 22-Jan-2015 at LCP's office in St. John's, NL.

- Black & McDonald Limited
- Cahill-Ganotec Joint Venture
- Alberici Constructors, Inc., Lorneville Mechanical Contractors Ltd. and Sunny Corner Enterprises Inc. Joint Venture (LASC)

Bids were distributed to evaluation team members on 23-Jan-2015.

Proposal clarification began on the 10-Feb-2015 and continued with all three Bidders up to the 30-Jun-2016. Pursuant to the Interim Bid Evaluation and Short List Recommendation (Attachment 11) approved on 30-Jun-2016, evaluation of the LASC proposal was discontinued as of the approval date. Clarification of the, Black & McDonald Limited and Cahill-Ganotec Joint Venture, proposals have continued to 2-Jun-2017.

6.0 EVALUATION TEAM

Evaluation Team	Representative
Commercial	Philip Bursey
Commercial - Legal	Denes Bajzak
Technical	David Wright (Lead) / Jim Slade / Gord Haines / Scott Penney / Antoine Gemayel / Martin Landry / Albert Mitchelmore
Quality	Paul Fraser
Risk Management	Tony Scott
Benefits	Maria Moran
Health & Safety	Grant Skinner
Environment	Lyndsay Haynes
Cost Controller	Jill Hawkins
Planner	Andrew Whitty

Commercial Steering Committee

Deputy Project Director – Lance Clarke
Supply Chain Manager – Pat Hussey
Project Manager - Muskrat Falls Generation - Scott O'Brien

7.0 EVALUATION CRITERIA

The following weighted evaluation criteria was agreed by the Evaluation Team and used to assess Bidder's Proposals.

Criteria	Weighted Rating (%)
Commercial	60%
Technical	40%
Quality	Pass/Fail
Benefits	In Commercial
Risk	Pass/Fail
Health & Safety	Pass/Fail
Environmental	Pass/Fail

For Health & Safety, Bidders had to obtain a score of 70% or greater to pass. For Environmental, Bidders had to obtain a score of 60% or greater to pass. For Risk, Bidders had to obtain a score

of 60% or greater to pass. For Quality, Bidders had to obtain a score of 60% or greater to pass.

8.0 COMMERCIAL EVALUATION

8.1 Proposal Price

Since the Schedule of Price Breakdown (Appendix A2.1) included in the RFP was issued without estimated quantities for the Price Items, as part of their Proposal, Bidders were required to perform their own material take off and include their estimated quantities in the Schedule of Price Breakdown.

It was originally intended that, for evaluation purposes, Bidders Proposal Price would be calculated using the highest quantity, from each Bidder's Proposal, for each Price Item. However, due to some significant quantity differences plus significantly different pricing, for the same Price Items, applying the maximum quantity from each Bidders proposal resulted in a significant skewing (increase) in the Proposal Price for B&M.

As a result of the above described issue, Proposals were compared based on Company's material take off with the addition of any new line items added by Bidders. This comparison did not result in a significant change in either Proposal Price.

The proposal price calculated using the above described method, including the below described normalization, is as follows

	B&M	C-G
Estimated Proposal Price	$238,235,845.00	$186,312,180.34
Normalization	$41,345,774.66	$51,272,415.96
Total	$279,581,619.66	$237,584,596.30
Score / 10	8.2	10.0

8.2 Pricing Model

The RFP was issued to Bidders requesting two pricing options **fixed price** and **fixed price with target cost of labour with labour maximum (LMAX)**. LMAX is intended as the maximum dollar value of labour for which Company can be charged, with all labour costs above LMAX being the risk of Contractor. Both Bidders have submitted proposals based on the fixed price target cost of labour option, which includes fixed pricing for the materials and equipment component of the Price, however both have proposed variants on the labour component of the Price and neither has agreed to an LMAX.

Black & McDonald Limited's (B&M) proposal was most consistent with the RFP instructions, including no OH&P applied to labour above the target cost of labour and cost sharing for labour above the target cost of labour. B&M's proposal, however, does not include an LMAX and based on the way cost sharing has been applied in the proposal the risk to Company increases as the cost of labour goes up. Based on the Bidder markup on labour (20.42%) and way labour

cost sharing has been applied, assuming none of the labour growth was attributable to Company, labour would reach twice the target cost before Contractor's OH&P earned, up to the target cost of labour, would be reduced to $0.00. As part of the normalization process Bidders cost sharing model was applied as if the labour increases 60% over the target cost of labour (or 1,000,000 hours).

Cahill-Ganotec Joint Venture (C-G) proposal does not include an LMAX and applies a sliding scale for OH&P which varies based on the relationship to the target cost of labour. Labour, up to the target cost of labour, will have a fixed markup (13%) and any labour above the target cost of labour, which is not attributable to Company, will be subject to a decreasing OH&P rate. Based on the way the variable OH&P has been applied in the C-G proposal, assuming none of the labour growth was attributable to Company, labour would reach twice the target cost before Contractor's OH&P earned, up to the target cost of labour, would be reduced to $0.00. As part of the normalization process, so that proposals were compared with an approximately equivalent number of hours, Bidders variable OH&P model was applied to approximately 1,000,000 hours.

For both Bidders for any labour incurred, above two times the target cost of labour, would result in a loss to the Contractor.

8.3 Liquidated Damages

The RFP requires liquidated damages (LD) at specified amounts (per day) for critical milestones which are capped at 10% of the Contract Price.

B&M has not yet agreed to the specified daily amounts and has agreed to an LD cap of 5% of the Contract Price. This non-conformance is priced in the normalization.

C-G has accepted the liquidated damages with a cap of 5% of the Agreement Price. This non-conformance is priced in the normalization. Application of LDs will be applied after a 15 day grace period and will be stepped up to the full LD daily amounts after a period of 60 days. The full daily LDs agreed are 17% lower than those specified in the RFP, however are of adequate value for their purpose.

8.4 Performance Security

Both Bidders have agreed to provide a 15% letter of credit during the performance of the Work and a 5% letter of credit for the warranty period.

C-G has indicated that they will provide separate letters of credit from the joint venture partners totaling the required 15%.

C-G has also indicated that they may opt to provide an additional letter of credit in lieu of mechanics lien withholding, at their own expense. The percentage of the LOC proposed for this

purpose has not yet been negotiated. C-G has also indicated that they may want an overall upfront payment of up to 10% of the Agreement Price and have been advised that if this is agreed they will have to provide an LOC of an equivalent value.

8.5 Normalization

It was planned that each Bidder's proposal would be compared based on their proposed LMAX labour value. As stated above neither Bidder's proposal included an actual LMAX, however the B&M proposal stated a non-fixed LMAX of the target cost of labour plus 60% which proved to be approximately 1,000,000 man hours. As part of the normalization B&M's cost sharing model and C-G's variable OH&P model were applied to their respective proposals at approximately 1,000,000 hours.

In accordance with the Bid Evaluation Plan the following normalization was conducted:

- The difference between the Company required LD cap of 10% and the cap offered by Bidder was added to the Bidders Price. Specifically 5% of the proposal Price was added to both C-G and B&M's proposals as normalization.
- The difference between Company's normally established Mark-ups (Materials – 5%; Rented Equipment – 5%; Third Party – 5%) and Bidders proposed mark-ups were applied to $5,000,000, for each category, and added to Bidder's proposals as normalization.

Company's experience on the average hourly cost of labour at the MF Site is approximately $96.00 per hour. B&M's proposal price included an average hourly rate of $105.14 while C-G's proposal price included an average hourly rate of $90.40. Both Bidders proposals were adjusted to reflect Company's experience rate.

Assuming a turn around on a bi-weekly basis (140 hours) at an estimated cost of $800.00 per trip each Bidder's travel costs were normalized to approximately 1,000,000 hours.

Hypothetical change quantities have been develop by the technical team, for comparison/evaluation purposes, and applied to the Rates for Changes. The total of this calculation has been added to each Bidders Proposal Price

8.6 Article Exceptions

Agreement Articles have been materially negotiated and agreed with B&M which include some alternative language which has been previously approved on other agreements. A liability cap of 100% of the Contract Price has been agreed using LCP standard wording.

Agreement Articles have been materially negotiated and agreed with C-G which include some alternative which has been previously approved on other agreements and/or has been discussed and agreed by Company General Counsel. A liability cap of 100% of the Contract Price has been agreed using LCP standard wording.

8.7 Summary

Based on the commercial evaluation **Cahill-Ganotec Joint Venture** is the commercially recommended Bidder.

The pricing model of the recommended Bidder includes fixed unit rates for Materials Cost and Equipment Cost and an estimate of the Manpower Cost for each Price Item. The summation of the as installed quantities, of the Materials Costs and Equipment Costs, for Price Items forms the fixed price for the Non Labour Component of the Price. The summation of the Manpower Cost associated with the as installed quantities of Price Items forms the Target Cost of Labour. PLA Labour, with the exception of Disallowed Items, will be reimbursable at cost based on labour equipment and materials sheets submitted by Contractor and approved by Company, the summation of which forms the Reimbursable Cost of Labour. Labour Overhead and Profit will be applied to the Reimbursable Cost of Labour on a sliding scale which varies based on the relationship to the Adjusted Target Cost of Labour. The Reimbursable Cost of Labour, up to the Adjusted Target Cost of Labour, will have a fixed markup (13%) with any Reimbursable Cost of Labour above the Adjusted Target Cost of Labour, subject to a decreasing OH&P rate as indicated in the below table.

Reimbursable Cost of Labour Overhead and Application of Overhead and Profit Banding	**Overhead and Profit Multiplier**
0 to ACTL	0.13
Greater than ACTL less than or equal to ACTLx1.17	0.07
Greater than ACTLx1.17 less than or equal to ACTLx1.34	0.03
Greater than ACTLx1.34 less than or equal to ACTLx1.51	0.00
Greater than ACTLx1.51 less than or equal to ACTLx1.68	-0.23
Greater than ACTLx1.68 less than or equal to ACTLx1.85	-0.56
Greater than ACTLx1.85 less than or equal to ACTLx2.02	-0.07
Greater than ACTLx2.02	-0.07

Based on the above application of OH&P, Reimbursable Cost of Labour will be twice the Adjusted Target Cost of Labour before Contractor's OH&P earned, up to the Adjusted Target Cost of Labour, would be reduced to $0.00.

To assist the recommended Bidder in remaining cash neutral during the execution of the Work, Company has agreed to prefund for labour on a monthly basis, based on monthly labour forecasts, with reconciliations at the end of each month to address under or over payments. The percentage of such prefunding may be reduced based upon the recommended Bidder's PLA Labour productivity.

8.8 Detailed Bid Tabulation

See detailed bid tabulation attached in Appendix 4.

8.9 Proposed Incentive Scheme

Currently the Agreement only includes punitive mechanisms to marshal Contractor towards meeting schedule milestone dates and to efficiently use PLA Labour. **The early deliverables for this Work will be very challenging to achieve from a schedule perspective and are the most important milestones from a Company perspective.** The ability to achieve these already challenging milestones will be further complicated by the multiple interfaces with other Contractors working on Site, which if not managed effectively by Contractor, will increase the likelihood of schedule delay. Additionally, it will make it more difficult for the Contractor to maintain a high level of productivity from its PLA Labour force. As a result the risk of delay related claim is significant if the Contractor is not motivated to be flexible with its schedule and tightly in control of its labour during the execution of the Work. In order to focus the Contractor's attention toward achieving the milestone dates critical to Company while, at the same time, effectively and efficiently managing the use of PLA Labour and redirecting the Contractor's focus from the opportunity of additional profit through claim, it is recommended that Company, following award to the successful Bidder, introduce an incentive scheme, such as the one outlined below, focused on schedule performance and efficient use of PLA Labour which makes it more profitable for Contractor to cooperate than to argue for Change.

The incentive scheme should be based on hard dates and values specified by Company, which can only be modified at the sole discretion of Company and not by Contractor change request or claim include bonuses of a material value:

1) for the achievement of M-UN1-1 (Unit 1 complete), M-UN2-1 (Unit 2 complete) and M-GEN-1 (Units 1-4 Intake gates complete) by hard dates specified by Company.
2) a sliding scale bonus for completing the Work under, at or close to the Target Cost of Labour. In order to discourage change requests or claims for delay, such bonus should include a provision which reduces the value of the bonus by the value of each change request or claim for delay submitted by the Contractor.

9.0 TECHNICAL EVALUATION

The Technical Evaluation is included in Appendix 5.

10.0 HEALTH & SAFETY EVALUATION

The Health and Safety Evaluation is included in Appendix 6.

11.0 ENVIRONMENTAL EVALUATION

The Environmental Evaluation is included in Appendix 7.

12.0 QUALITY ASSURANCE EVALUATION

The Quality Evaluation is included in Appendix 8.

13.0 BENEFITS EVALUATION

The Provincial Benefits Evaluation is included in Appendix 9.

14.0 RISK MANAGEMENT EVALUATION (IF APPLICABLE)

The Risk Management Evaluation is included in Appendix 10.

Black & McDonald Limited – FIXED PRICE TARGET COST OF LABOUR (LABOUR COMPONENT 0.15; NON LABOUR COMPONENT; Delta $353,645.00)

No	Subcode	PRICE ITEM DESCRIPTION	UNIT OF MEASURE	LCP EST. QTY	EST. QTY A	PLA LABOUR HOURS (per unit) B	LABOUR COST (per unit) C	TOTAL LABOUR HOURS
B&M-0256	Added	1.25" union, 304SS, Vic-Press - 584	ea	0	19	7.2	779.79	137.0
B&M-0257	Added	2" flange adapter, 304SS, Vic-Press - 595	ea	0	4	8.8	952.29	35.2
B&M-0258	Added	4"x2.5" conc reducer, SS, Sch 10S, ASTM A403 WP 304L - BE	ea	0	1	24.4	2,644.19	24.4
B&M-0259	Added	1/2" tube, smls SS, Rb 80 or less, thickness 1.65: to ASTM A269 Grade 316L	Linear meter	0	24	0.7	71.15	16.0
B&M-0260	Added	1/2" 90 elbow, Swagelok to ASTM A182 Grade 316 - COMP	ea	0	6	1.1	119.31	6.6
B&M-0261	Added	1/2" union tee - SWAGELOK SS-810-3 or equal	ea	0	12	1.6	169.92	18.9
B&M-0262	Added	1/2" female adapter - SWAGELOK SS-8-TA-7-8 or equal	ea	0	12	1.1	119.31	13.2
B&M-0263	Added	1/2" male adapter - SWAGELOK SS-8-TA-1-8 or equal	ea	0	12	1.1	119.31	13.2
B&M-0264	Added	1" pipe, PVC, Sch 80, CSA/CAN 137.3/ASTM D-2466/D-2464 - PE	Linear meter	0	12	1.1	116.26	13.1
B&M-0265	Added	1" 90 elbow, PVC, Sch 80, CSA/CAN 137.3/ASTM D-2466/D-2464 - SOC	ea	0	8	1.2	134.69	10.0
B&M-0266	Added	1" union, PVC, Sch 80, CSA/CAN 137.3/ASTM D-2466/D-2464 - SOC	ea	0	4	1.2	134.69	5.0
B&M-0267	Added	1" QUICK CONNECTOR, FNPT - Hansen Series 5500	ea	0	2	3.7	400.53	7.4
B&M-0268	Added	2" rubber exp joint, GARLOCK EZ-FLOW style 206, 150#, FF FLG, 6" F/F c/w chlorobutyl tube & retaining rings	ea	0	1	4.4	471.42	4.4
B&M-0269	Added	8" Zero-Flex Rigid Coupling, Galvanized, Ductile Iron - Victaulic 07	ea	0	6	1.7	186.09	10.3
B&M-0270	Added	3/4" flexible coupling, A890 SS - VICTAULIC 77DX	ea	0	6	0.3	37.22	2.1
B&M-0271	Added	2.5" 45 elbow, LR, SS, SCH 10S, ASTM A351 CF8M 316 - VICTAULIC 110	ea	0	12	3.1	340.27	37.8
B&M-0272	Added	2" 45 elbow, LR, SS, SCH 10S, ASTM A351 CF8M 316 - VICTAULIC 110	ea	0	2	3.0	322.55	6.0
B&M-0273	Added	6"x2.5" reducing tee, Galv. DI, ASTM A536 GR 65 Max Rating 1000# - VICTAULIC 25	ea	0	2	13.0	1,403.62	26.0
B&M-0274	Added	6" WAFER SWING CHECK VALVE RITE 210 150# FF CS VCH01	ea	0	3	16.1	1,736.80	48.2
B&M-0275	Added	3/4" Ball Valve Carbon Socket Weld, Full Port VBA02	ea	0	3	2.9	319.00	8.8
B&M-0276	Added	2" ball valve, SS, full port, 3pc - SW - Velan VTP-2000 or equal VBA11	ea	0	4	14.7	1,587.93	58.7
B&M-0277	Added	1/2" ball valve, SS - THD - Swagelok 60T Series or equal VBA14	ea	0	6	1.1	119.31	6.6
B&M-0278	Added	2" Globe Valve SS SW #3449-VGL06-1000 VGL06	ea	0	8	14.7	1,587.93	117.5
B&M-0279	Added	1.25" Globe Valve SS SW #3449-VGL06-1000 VGL06	ea	0	5	9.1	988.91	45.7
B&M-0280	Added	1" Globe Valve SS SW #3449-VGL06-1000 VGL06	ea	0	2	7.3	793.97	14.7
B&M-0281	Added	1.25" control valve - THD 3351-FCV-VCC-0001/002,3351-FCV-VCR-0001/002,3351-FCV-VER-0001,3351-FCV-VDS-0001/002 (Cost included with Controls)	ea	0	7	5.4	584.84	37.9
B&M-0282	Added	2" FLOW CONTROL VALVE BELIMO 3351-FCV-VMR-0005 3351-FCV-VMR-0001-0008 (Supplied with Equipment) (Cost included with Controls)	ea	0	8	5.4	584.84	43.3
B&M-0283	Added	Pipe Insulation - All Sizes	ea	0	1	7209.9	736,376.71	7209.9

Technical Evaluation

TECHNICAL EVALUATION REPORT				CH0031	Package Title: Mechanical and Electrical Auxiliaries				
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
1.0	General	5%		Score (out of 10)	Overall Score	Comments	Score (out of 10)	Overall Score	Comment
1.1	Contract Commitments - Does it appear Bidder has the capacity to complete this scope of work? Has the bidder undertaken this type and magnitude of work in the past 5 years?	25%	1.25%	8	1.00%	Bidder has provided high level description of the SOW for each discipline, then followed by discipline specific tasks with start dates for each area as the areas become available. Bidder has completed several multi-million dollar power generation projects including BOP type work, in addition it has completed many lower budget contracts involving power plant upgrades. Bidder has not yet fully demonstrated its capacity or experience to assemble and install electrical equipment (GSU, IPB, GCB) supplied by Company. Bidder is providing relevant pieces of information through out the clarification process. Bidder has experience in Labrador. Bidder's second submission of their Rev. C PEP is much more logical and detailed but conflicts in some areas with supporting information provided.	8	1.00%	Bidder has completed numerous large scale construction projects including power generation type projects. Bidder has completed a hydro electric project matching the exact SOW of this project and has experience in all disciplines in heavy industrial construction. Bidder has indicated the oil filling procedure of the GSU transformers will be subcontracted. This demonstrates the bidder acknowledges the specialty equipment and expertise required for this task. Bidder has extensive experience in labrador and at the LCP site. Bidder has provided a SOW aligning very closely to the SOW provided in the RFP.
1.2	Has Bidder fully explained how it plans to deliver the requirements of Exhibit 3 Coordination Procedures?	25%	1.25%	7	0.88%	Bidder is rather vague on Exhibit 3 requirements. "*BIDDER* confirm compliance, based on mutal agreement of methods and procedures, as applicable for this project scope. Bidders Rev C PEP is still light on details of Exhibit 3 requirements and auxulliary PCP is a plan template.	8	1.00%	Bidder has given an overview of its PC plans and has confirmed compliance with Exhibit 3. Project controls function shall be under the Project Engineer.
1.3	Has the bidder acknowledged that there are no exceptions to the technical specifications (TS)?	25%	1.25%	10	1.25%	All technical exceptions have been addressed to the satisfaction of the bid review team.	10	1.25%	All technical exceptions have been addressed to the satisfaction of the bid review team.
1.4	Has the bidder acknowledged that there are no exceptions to the Scope of Work (SOW)?	25%	1.25%	10	1.25%	"*BIDDER* confirm compliance."	10	1.25%	"We confirm compliance with the requirements outlined in MFA-SN-CD-3300-EN-SP-0002-01."
2.0	TDS (Appendix A1) - Detailed technical review	26%

3.1	Project Organization, Org Chart & Key Personnel								

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.1.1	Is the bidder executing this on a standalone basis or as a joint venture with another firm? If a JV, has the JV successfully delivered similar projects in the past 5 years?	0.5%	0.24%	8	0.19%	Standalone, however from clarifications it is clear that bidder intends to execute project using multiple office locations (St. John's and Dartmouth) which may complicate the communication process somewhat. They plan to supplement their project team with part time third party consultants. Bid materials produced by third party consultants are good quality.	8	0.19%	Bidder is proposing a joint venture. Bidder has indicated the companies in the Joint Venture have partnered together sucessfully on a number of projects over the years. Joint Venture partners have worked together within a partnership for Long Harbour (VALE). Both joint venture partners are working at the MF site as subcontractors to CH0007 and one is an existing contractor to LCP.
3.1.2	Mob/Demob Plan and Schedule provided? Does the mobilization plan appear realistic?	0.5%	0.24%	7	0.16%	Yes. Bidder has provided a list of activities associated with mobilization, followed by a brief demobilization description in the executive summary. The on-site mobilization activity is better defined in Rev. C PEP but conflicts with some support information. Demobilization is not detailed in bid. Small footprint trailer layout is included which is conducive to installation near to the powerhouse. No requirement for large onsite warehouse - bidder plans to use an existing warehouse in HVGB. Bidder has included A series documents in its bid schedule.	6	0.14%	Bidder has provided a list of pre-mobilization activities followed by a list of mobilization activities under the project execution summary. Demobilization is not detailed in the bid. The mobilization plan as presented is NOT realistic based on the Fall 2016 bid schedule submission. Bidder has included A series documents and has included indirect labour. Bidder has stated it will provide a demobilization plan after award. Small footprint trailer layout is included with proposal which is conducive to installation and set-up near to the powehouse.
3.1.3	Bidder has provided specific challenges related to the work and identified mitigation measures?	0.5%	0.24%	7	0.16%	Bidder's revised Project Execution Plan includes a section on risk which indicates their plans to hire a risk consultant and plan after bid award. The Project Exection Plan does not detail actual concerns just the bidder's intentions post award. They have included the 5 risks with mitigations in the Risk Questionaire. Nominated risk consultant lacks hydroelectric and northern climate experience, qualifications are otherwise very good.	6	0.14%	Bidder's execution plan includes a section on risk management which is logical and identify's the bidders plans for management of challenges throughout the work. Bidder has included Risks and Mitigations in its Risk Management Plan. Bidder's organization does not have a Risk manager, project risk support will be by the VP of Strategy and Development who has limited knowledge of technical, particularly construction execution risks.

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.1.4	Bidder has provided specific locations where project management, design and material procurement will take place?	0.5%	0.24%	6	0.14%	Bidder has responded that activities will take place in St. John's and Dartmouth office but gives no clear detail, timelines, durations or splits. The lack of an established project office and an unknown division of tasks between St. John's and Darmouth are a concern.The initial set up of the St. John's project office will be likely be a timely and involved process.	7	0.16%	Bidder has indicated the design component subcontractors - all in St. John's. Initally, the Bidder will commence work at its St. John's office and move to Site during Mobilization. Project will be run from Site with support from home office in St. John's. Primary procurement activities will occur from bidders head office in St. John's with on-site procurement support. The project controls tools and systems for the project will be implemented under leadership by the Project Engineer, who is assisted by the Corporate Office team. The team is responsible for all procurement and construction planning and scheduling as well as all cost control, reporting and trending.
3.1.5	Organization chart - Does it make sense? Are all key functions and key personnel provided? Are reporting lines and decision making authority clear?	4%	1.88%	8	1.50%	Bidder has provided a Rev. 3 org. chart with clarifications. Locations of work are indicated and overall chart is well structured. Bidder has indicated locations of work and has indicated part time roles. Some part time consultants and non Bidder staff resumes. After several clarification cycles Bidder has added a Quality Assurance Project Lead to the organizational chart.	8	1.50%	Bidder has done an decent job in preparing their org. chart. Management structure is well defined. Functions reporting to the project engineer should report to construction manager. Work locations are defined and post award/mobilization org chart provided. No third party resources identified as part of bid.
3.1.6	Key Personnel - Assess for competency, duration of time with bidder, knowledge of the bidder's processes, suitability for the nominated role, previous experience of key personnel working together to deliver a project.	4%	1.88%	7	1.32%	Revised org. chart indicates work locations. Project Controls Lead is acceptable. vast network to draw from. Commissioning leads added during clarifications but minimal experience with PCS and not staff personnel. CA is an offsite position. Quality Assurance lead has been added to the org chart. Bidder has provided mobilization org charts c/w work locations. Bidder has been responsive to clarification items WRT organization.	7	1.32%	All submitted resumes are currently employed by bidder. Vast network to draw from. All management resumes have been submitted and mobilization org chart has been submitted c/w work locations. Bidder has been responsive to clarification items WRT orginization, modifications have been extensive between submissions.
3.2	**Project Administration and Communication**								

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.2.1	Interface Management - Does the bidder have a clear plan and procedure for management of all interfaces under its control? Has the bidder identified the key interfaces with Company and Company's Other Contractors? Does the bidder have a database or other tool to assist with the management of interfaces? Interface register (A98)?	8.0%	3.76%	7	2.63%	The bidder has provided a preliminary Interface Register (A98) which is well structured and logical. It gives a good indication that the author is aware of the importance and number of interfaces however the register conflicts with other aspects of bid including items which have been previously clarified.	8	3.01%	Execution Plan discusses interfaces. Intend to use interface management plan. After request for Interface Register (A98), have provided a preliminary A98 which indicates a good understanding of the hard interfaces for the project. Pg. 20 of Execution Plan provides a listing of scopes provided by others indicating an understanding of interfaces to be managed. Bidder has an current presence at site which should aid with interface understanding and management.
3.2.2	Does the bidder intend on establishing a coordination or interface office in St. John's to assist with the interface with Company?	1.0%	0.47%	7	0.33%	Plan to set up St. John's office for initial project activites but has also stated some activites to take place in Dartmouth, NS office. Splitting of activities between offices and initial set up of St. John's office may not be ideal but the bidder has a current St. John's location and it is expected that there will be a St. John's component throughout the project.	8	0.38%	Bidder plans to utilize its existing St. John's office for duration of project for coordination and interface activities. Bidder's St. John's office is well established and should lead to an effective ramp up to full support effectiveness.
3.2.3	Project Communication and Coordination Plan	6.0%	2.82%	7	1.97%	Bidder has highlighted importance of communication - accountability and responsibility. Have provided a sample communications plan and have identified intent to provide a project specific plan. Interface register (preliminary also provided). Bidder's St. John's office is for project planning only - not for duration of project.	8	2.26%	Plan to form coordination teams. Have established St. John's office and experience and existing relationship with project. Have identified internal and external communication requirements. Bidder plans to maintain its St. John's office for duration of project.
3.3	Health & Safety Management Plan & Certs (A28 & A41)	0.5%	0.24%	7.64	0.18%	Sean Lee	7.58	0.18%	Sean Lee
3.4	Environmental Protection Plan C-SEPP (A35)	0.5%	0.24%	7.23	0.17%	Dave Haley	7.33	0.17%	Dave Haley
3.5	Quality Management Manual & Certs (Q01 & Q02)	0.5%	0.24%	6.3	0.15%	Paul Fraser	7.7	0.18%	Paul Fraser
3.6	Risk Management Plan (A04)	0.5%	0.24%	7.32	0.17%	Carlos Fernandez/Tony Scott	7.76	0.18%	Carlos Fernandez/Tony Scott
3.7	**Project Controls**								
3.7.1	Has the bidder presented an execution organization that includes project controls?	4.0%	1.88%	7	1.32%	Project Controls manager is qualified based on submitted resume. Resumes provided for planner/scheduler technicians indicate lesser experience. Two key project controls positions are part time consultants but qualifications are very good.	7	1.32%	Project Controls candidate is well qualified. Planner is qualified based on resume but the bid schedule is unaccaptable, unclear if poor schedule quality is due to planner incompetence or bidder proposal stategy. Revised organizational chart covers all areas of project controls.
3.7.2	Has the bidder presented all key project control procedures that will be used for work, including cost management, schedule management and MoC?	1.0%	0.47%	8	0.38%	"*BIDDER* confirm compliance, based on mutual agreement of methods and procedures, as applicable for this project scope." New PEP states that their Project Controls System will "incorporate the requirements" of our Exhibits. Bidder has provided a draft project Controls Plan. Cost, Schedule and Management are addressed.	8	0.38%	Full compliance with Exhibit 3 confirmed and a decent amount of detail contained within execution plan to confirm. Bidder plans to use Earned Value and has provided samples and commentary to justify.

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.7.3	Bidder's proposed earned value management process that will be used for the work	0.5%	0.24%	8	0.19%	"*BIDDER* confirm compliance, based on mutual agreement of methods and procedures, as applicable for this project scope." During clarifications the bidder has provided an "Updating and Reporting Cycle" flow chart. Listing of information provided with clarifications is good.	8	0.19%	Compliance with Exhibit 3 and good amount of detail contained within execution plan to support.
3.7.4	Bidder's proposed methods for planning and schedule control that will be used for the work	0.5%	0.24%	8	0.19%	"*BIDDER* confirm compliance, based on mutual agreement of methods and procedures, as applicable for this project scope." The draft Projec Control Plan supplied during clarifications is a template from their Ontario buisness unit.	6	0.14%	Compliance with Exhibit 3 with the exception of BID schedule requirements which is a key deficiency. Based on Bid schedule it is likely that a post award schedule will also be deficient WRT Exhibit 3 requirements. Decent amount of detail contained within execution plan within other sections. Bidder has been informed that its schedule submission is not acceptable and that no further evaluation can proceed with respect to this critcal item.
3.7.5	Bidder's proposed cost control and scheduling software it proposes to use for the work	0.5%	0.24%	9	0.21%	JD Edwards, BMREQ & Primavera 6.	9	0.21%	JONAS & Primavera 6 (V8.3)
3.8	**Engineering (fire detection and suppression, cable tray support & shaft platforms)**								
3.8.1	Project Engineering Management Plan - Has the bidder presented the engineering management procedures and processes that will be used for the work?	2.0%	0.94%	7	0.66%	Bidder has provided a sample engineering management plan with plans to create a job specific plan after award. Field engineers will have input to procurement process and subsupplier/subcontractor documentation submissions.	7	0.66%	An engineering management plan would be prepared after contract award. A list of items to be included in the plan are listed and appear acceptable. Bidder's Rev. 3 organizational chart has added package engineering positions to the St. John's office to address concerns with engineering input to procurement and documentation.
3.8.2	Demonstrates a clear understanding of scope of work - i.e. preliminary list of engineering deliverables available (Master Document Register)	1.0%	0.47%	8	0.38%	The bidder has provided a preliminary SDR (A01) which indicates an understanding of documentation required. Rev. 3 PEP references a sample engineering plan - project plan to be developed post contract award.	7	0.33%	Bidder has confirmed compliance with design scope outlined in scope of work specification. There are items regarding technical details still open. Preliminary Supplier Document Register (A01) is sufficient with bid.
3.8.3	Where will engineering be undertaken? Does the location lead to more synergies with Nalcor's review process?	0.5%	0.24%	7	0.16%	Bidder has provided a prelim. Subcontract plan wich included eng. scopes. Bidder has named Can Ecosse Engineeing (Ontario) for cable tray scope. No indication oflocal firms being utilized but will set up local office for key upfront activites.	8	0.19%	Engineering will be subcontracted. Subcontractor has not been selected at this time but A16 identifies 3 qualified St. John's based options. Bidder's discipline engineers will review documents before submission to Company.
3.8.4	Does the bidder intend on self preforming all engineering scope? If no, is the intended subcontracted scope considered critical? If subcontracted, has the bidder worked with the particular subcontractor in the past?	0.5%	0.24%	8	0.19%	Bidder has named CanEcosse Engineeing (Ontario) for cable tray scope. Bidders revised Appendix A16 listed several optons for Engineering services - all engineering will be subcontracted.	8	0.19%	Appendix A16 identifies 3 qualified subcontractors located in St. John's who have worked with bidder in the past. All engineering services will be subcontracted.

TECHNICAL EVALUATION REPORT				CH0031	Package Title: Mechanical and Electrical Auxiliaries				
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.8.5	Has the bidder presented processes to verify the quality and ensure the effective management of subcontracted engineering scope?	1.0%	0.47%	7	0.33%	Rev. 3 PEP has a section on engineering management but it mostly generic. Bidder's revised PEP indicates that the Supply Chain team will be responsible for ensuring "complete and accurate shop drawings". Bidders' latest organizational chart indicates that site engineers will be responsible for support engineering activites togther with home office.	7	0.33%	Bidder's discipline engineers would review engineering documents prepared by engineering subcontractor. "We confirm that engineering documents shall not be issued for Engineer's acceptance until the internal reviewed cycle is complete". Organizational chart supports this statement.
3.8.6	Does the bidder have a plan for conducting formal design reviews at specific points (i.e. gates) during the design process? Is there a plan for inclusion of the Company in this process?	0.5%	0.24%	7	0.16%	Bidder has provided a preliminary Interface Register (A98) and has made necessary additions to organizational chart to improve engineering input to key activities. Engineering within home office and at site and included in schedule.	7	0.16%	"For larger scopes such as fire protection design, their shall be an iterative review process, and we shall include the Company in this process. Following contract commencment and once the fire protection contractor has been selected, we shall work collaboratively with the Company to set out the details of the process." Schedule does not yet contain sufficent detail in this area but established St. John's office will support this requirement.
3.8.7	Does the bidder have a method to seek the input of technical expertise other than those engaged in the design?	0.5%	0.24%	8	0.19%	Bidder plans to outsource all engineering activities but have also stated that the supply chain group is responsible for ensuring the technical correctness of deliverables. Engineering expertise at site and within procurement process procurement stage. Bidder can subcontract services and they have added engineering subs to their A16.	8	0.19%	The proposal indicates that technical Expertise is not available within their company however the bidder has identified (A16) three large engineering subcontractors who have vast networks of resources to provide technical expertise if required.
3.8.9	Details of system interfaces.	0.5%	0.24%	9	0.21%	Bidder has included a peliminary Interface Register (A98) with the Rev. 3 PEP which is extensive, detailed and well considered. The author clearly understands the scope however author is a consultant and relevent knowledge may not be fully transferred and utilized by bidder.	9	0.21%	Bidder acknowledges importance of interface management and will develop an interface management plan after award. Plan will be issued to Company for review. Have provided a commentart of key interfaces and have provided a preliminary Interface register (A98) which is logical and well considered.
3.8.10	Does the bidder have a plan for follow-on engineering to support construction execution?	0.5%	0.24%	9	0.21%	Bidder has identified several site field engineeing resources which should fullfill this function together with home office support. Recent additions to organizational chart support this plan in addition to identified third party engineering firms.	9	0.21%	"Included" and opdated org. charts support this inaddition to identified third party engineering firms.
3.8.11	Standards of design that will be used.	0.5%	0.24%	10	0.24%	Bidder's submission is compliant with technical requirements with respect to design standards.	10	0.24%	Bidder's submission is compliant with technical requirements with respect to design standards.
3.9	Procurement								

TECHNICAL EVALUATION REPORT				CH0031	Package Title: Mechanical and Electrical Auxiliaries				
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.9.1	Project Procurement Management Plan - including all procedures and tools for procurement, expediting, materials management, etc.	8.0%	3.76%	7	2.63%	A sample Project Management Plan has been submitted from a past project the Bidder has completed. While this a good document which outlines the steps used in a past project, it does not completely indicate the intention for the Project Management Plan for this project WRT to procurement.	8	3.01%	Bidder has indicated the use of its Purchasing Procedure, and will be reviewed against the contract documents to adopt Company requirements. "We will use our standard operating procedure SOP-008 for Purchasing, attached." "We confirm a Procurement Management Plan specific to this project shall be as a document under the appropriate SDRL code."
3.9.2	Does the bidder have a material procurement tool that includes all elements of procurement, expediting, materials management, and logistics?	1.0%	0.47%	7	0.33%	Bidder's revised Project Execution Plan has identified a home grown web based materials procurement and management application. The proposal does not detail how the tool will track all elements of procurement, expediting, materials management, and logistics. Further info required from bidder.	7	0.33%	Bidder has proposed to use the JONAS Procurement Program for purchase order development and purchase order tracking from award though receipt at jobsite. The proposal does not provide details on how the tool will track all elements of procurement, expediting, materials management, and logistics. Request bidder if it has a material procurement tool that includes all elements of procurement, expediting, materials management, and logistics?
3.9.3	Does the bidder have a plan for materials management for the various sites? Does it consider the unique location attributes of the Project?	0.5%	0.24%	7	0.16%	Bidder has only provided sample plans from recent Ontario projects which do not address the unique location atributes. They have identified they will use an offsite 6,000 sqft warehouse but the Rev. 3 PEP is unclear about the overall materials management plan for the project. The Project Execution Plan lists software tools that they "may use".	8	0.19%	Bidder has indicated the use of its Purchasing Procedure, and will be reviewed against the contract documents to adopt Company requirements. The bidder has proposed to use the JONAS Procurement System for purchase order development and purchase order tracking from award though receipt at jobsite.
3.9.4	Does the bidder demonstrate a plan or methodology for inspection or verification of manufactured material?	1.0%	0.47%	8	0.38%	"QA plan will include ITP which will detail hold / witness points applicable to specific component. Bidder's QA/QC function is a major concern, refer to quality review. Update: Bidder has included a Project Quality Plan, indicating "*BIDDER* or its subcontractor shall obtain all necessary quality documents including material certificate, quality check certificates or Factory Test Certificates etc. for all the procured material from their Original Equipment/Material Manufacturer and submit to Nalcor for their review when material is staged on site, and all these documents shall be submitted to Nalcor as part of the Turnover Packages"	6	0.28%	"The methodology for inspection and verification of manufactured materials and equipment is contained within our Standard work instruction SWI-QA-002 Quality Control Manual and SWI-QA-005 Material Control, attached."
3.9.5	Plan for the requirements of vendor service supervision of installation, testing and commissioning.	1.0%	0.47%	8	0.38%	Bidder has included details within Revised Project Execution Plan and supervision is included on organizational chart.	8	0.38%	Bidder has provided a general material identification and tracibility section in its quality section of the bid.

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.9.7	Details of subcontract framework for major work components - is it suitable or does it add too much risk?	0.5%	0.24%	9	0.21%	Bidder has submitted a draft subcontract management plan which indicates an understanding of this component. Bidder has updated the A16 subcontractors List in the 24-Sep-2015 submission. Bidder has indicated it shall have a dedicated subcontract manager for its work.	9	0.21%	Bidder has submitted a Subcontract Strategy document specific to this project which is logical and appropriate.
3.9.8	List of subcontractors (including qualifications) provided. Has the bidder worked with these subcontractors in the past?	1.0%	0.47%	8	0.38%	Appendix A16 provided. Subcontract Plan lists many subcontract scopes and specifics are contained. Bidder has indicated subcontracts are to be awarded to vendors with demonstrated safety, quality and capability record that meets the requirements of the *BIDDER* Approved Suppliers List (ASL). Bidder has indicated where they have past work experience with the subcontractors listed in the A16 document.	9	0.42%	Appendix A16 provided. Bidder has provided a plan for the requirements of vendor service supervision of installation, testing and commissioning. Subcontract management strategy included with PEP. Bidder has indicated where they have past work experience with the subcontractors listed in the A16 document.
3.9.9	Do contractors and subcontractors have similar construction work experience.	1.0%	0.47%	7	0.33%	The proposed subcontractors are able to present past work portfolio with experience in this construction sector.	7	0.33%	The proposed subcontractors are able to present past work portfolio with experience in this construction sector.
3.9.10	Details of process for selecting suppliers (and sub-suppliers) - are they suitable?	1.0%	0.47%	8	0.38%	Bidder has submitted a Subcontractor Management Plan detailing the procedure and methodolgy for selecting subs including tendering, kick-off meetings with subcontractors, health and safety and environmental topics.	8	0.38%	Bidder indicated that Subcontractors shall be selecting using its standard work instruction procedure. The standard work instruction details procurement strategy, subcontractor pre-qualifications, subcontractor selection, subcontract formation and administration, subcontract performance and evaluation.
3.9.11	Description of after sales service.	0.5%	0.24%	8	0.19%	Following contract award, bidder will develop the general terms and conditions for subcontracts/supply of permanent plant items. Under these requirements, the Vendor's after sales service requirements will be established. Bidders objective is to name NALCOR in all warranties allowing direct access to each Vendor for support after bidder closes the project. NALCOR will be provided with PO data and contact information for the equipment supplied by the bidder - as well as maintenance requirements and frequency.	8	0.19%	After sales service of subcontractors supplied materials and equipment shall be administered through the bidders project office. For warranty work, it shall be coordinated through the bidders home office. Support requirements of equipment and systems provided by subcontractors shall be reviewed with the owner prior to system completion. In some cases service agreements, directly with the subcontractor, may need to be established to provide this support.
3.9.12	Demonstrates knowledge of local material and labour costs, union agreements and availability of qualified contractors. Does bidder include a draft Labour Relations Sterategy.	0.5%	0.24%	8	0.19%	___ confirm. Rev. 3 PEP discusses HR/labour relations. Bidder has identifed a labour relations manager and have referenced the Project Labour Agreement. Bidder has experience in Long Harbour (VALE) and in Labrador.	9	0.21%	Bidder confirms understanding of local material and labour costs, union agreements and availability of qualified contractors and subcontractors. Bidder has identifed a labour relations manager and has referenced the Project Labour Agreement. Bidder has experience at Long Harbor (VALE) and at Muskrat Falls site.

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.9.13	Portions and value of the project to be given via external procurement.	0.5%	0.24%	10	0.24%	"none"	10	0.24%	"All procurement shall be completed in house. No external procurement is planned."
3.9.14	Details of Procurement contingency plans.	0.5%	0.24%	4	0.09%	Bidder has stated "This plan would be part of the procurement process, after award." However, bidder has submitted a sample procurement management plan and subcontactor management plan which partly demonstates the bidder's intentions post award with respect to procurement contingencies.	5	0.12%	"CO-*BIDDER* and *CO-BIDDER* each have long established relationships with local suppliers and manufacturers of the materials and equipment required for this construction project. Both companies also have procurement networks throughout Canada and the USA within other projects and divisions of the respective organizations. The information flow between our procurement team and suppliers allows for the identification of procurement issues, as represented in the Standard Operating Procedure-SOP-008 for Purchasing. These issues would be monitored in the PO log along with action items to achieve resolution"
3.10	**Construction**								
3.10.1	Construction Execution Plan presented by the bidder that reflects the work scope and considers the work location, complexity and weather conditions?	8.0%	3.76%	6	2.26%	Bidder has given some detail as to the construction sequence based on company provided interface dates. Each discipline is covered in a scope of work type excerpt with no commentary or reference drawings. Weather will not be a major factor as workscope is indoors with minor exceptions. Bidder has provided a draft cold weather execution plan	7	2.63%	Bidder has given a description of construction work activities based on company provided interface dates and has included some relevant commentary rather than just Scope of Work line items. Weather will not be a major factor as workscope is indoors with minor exceptions.
3.10.3	Does the bidder's construction execution plan consider all temporaries, site administration and access control, materials management, site indirects, etc. Includes preliminary site layouts for all construction temporaries and indirects?	2.0%	0.94%	7	0.66%	Bidder has provided temporary facilities and power equipment requirements and monthly power requirements. Site trailer layout provided (6 trailers with 4 sea-cans). Monthly power requirement has been provided but may be low. Have included plans for supplementary diesel gensets. Contractor has provided trailer and sea-can layouts with Rev. C PEP which align with site laydown area and indicate they are understanding the space constraints. Bidder has identified a 60,000 sq.ft. warehouse in HVGB.	7	0.66%	Bidder has provided temporary facilities and power equipment requirements and monthly power requirements. Proposed contractor laydown area is not exactly as designated. Bidders proposal has been updated in their response to Addendum #20 indicating a megadome storage requirement - bidder does not plan to use HVGB storage. Bidder's requirement for site trailers and infrastructure appears to be aligned with its organization chart. Have included plans for suplementary diesel gensets.
3.10.4	Has the bidder confirmed all services and construction supports that will be subcontracted to others?	1.0%	0.47%	8	0.38%	Bidder has provided a DRAFT Subcontracts Plan which indicates a good understanding of the scope of subcontracts, Appendix A16 is quite extensive	8	0.38%	Bidder has provided a good Appendix A16. Bidder has provided a good Subcontracts Strategy document specific to this project.
3.10.5	Listing of construction equipment that will be used for the work with mobilization schedule provided.	1.0%	0.47%	9	0.42%	Comprehensive list provided. No mobilization schedule has been provided.	9	0.42%	Comprehensive list provided with proposal. No mobilization schedule provided.

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.10.6	Bidder's construction plan and schedule is considered to be realistic given the work location, weather and other constraints? Have the overall construction work force demands been flattened to ensure optimize the program?	1.0%	0.47%	8	0.38%	Refererence 5.1	6.5	0.31%	Reference 5.1
3.10.7	Construction equipment maintenance program provided.	1.0%	0.47%	10	0.47%	Not required for evaluation.	10	0.47%	Not required for evaluation.
3.10.8	Bidder's construction plan and schedule includes a cold weather protection strategy?	0.5%	0.24%	7	0.16%	Bidder has experience in Labrador and other cold weather regions of Canada. CPP is generic but rational. Bidder is willing to provide heat to their workspaces on a cost reimbursable basis.	7	0.16%	Bidder has vast experience in Labrador and at LCP site specifically. Has plans for on site warehousing and protection.
3.10.10	Bidder presents its plan for work face job planning in order to maximize productivity. Typical content to include construction work packs, pre-job planning methodology, etc.	1.0%	0.47%	9	0.42%	"*BIDDER* assemble managable work packs, with necessary detail to ensure scope is presented and requirements undersood. These work packs will relate to schedule activities, allowing daily work progress to be tracked. Productivity will be monitered based on progress, and restorative action taken when necessary." Rev. C of Project Execution Plan (Section 16.4) outlines the bidders intentions to use CWPs (Comprehensive Work Packages). Bidder has stated that field engineers will be responsible for work pack creation	9	0.42%	Bidder shall use work packs - bidder has confirmed that field engineers will be responsible for work pack creation.
3.11	**Completion and Commissioning**								
3.11.1	Completions Plan is reflective of the work, makes considerations for MC, Preservation & Commissioning, and which has a clearly defined hand-over process with key interface points identified.	8.0%	3.76%	7	2.63%	Rev. C Project Execution Plan includes a mechanical completion section references key items such as Static, Dynamic , punchlists etc. but is light on details with respect to procedures and methodology. No reference to Project Completion System integration and suggests "turn key" subcontracts with suppliers. Bidder has confirmed compliance with MC&C spec.	7	2.63%	Completions and commissioning section with bid is short but bidder has highlighted an intention to develop a MC&C plan and has highlighted the importance of interfaces. "We confirm compliance with MFA-SN-CD-3300-EN-TS-0002-01."
3.11.2	Completions Organization is defined with clear roles and responsibilities, structured on an org chart identifying completions organization during preparation and execution with all field and home office personnel requirements to implement the Completions plan accounted for.	3.0%	1.41%	7	0.99%	Rev. C Project Execution Plan includes a draft completions organizational chart with role descriptions. Revised Submission suggests using FE team to transition to MC&C role but roles will need to happen concurrently. Rev 3 PEP and org chart include 3 senior comissioning team members (35+ yrs experience each) which may not be conducive to successful PCS implementation.	7	0.99%	Mechanical completion and commissioning manager included on org. chart with 3 positions below, field eng., field tech, QC, submitted revised CV for MC&C manager is acceptable.
3.11.3	Bidder intends to deploy a PCS system complete with competent administration personnel, which has the ability to generate check records, monitor punchlist items and provide overall completions status. Sample forms provided.	3.0%	1.41%	8	1.13%	Bidder has confirmed compliance with PCS requirements, final personnel selection is pending.	8	1.13%	Bidder has confirmed compliance with PCS requirements, final personnel selection is pending.

TECHNICAL EVALUATION REPORT				CH0031	Package Title: Mechanical and Electrical Auxiliaries				
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
3.11.4	Completions Schedule provided which is inclusive of MC, Commissioning and Hand-Over, identifies critical interfaces with Company's other contractors and which is aligned with Control Schedule	3.0%	1.41%	7	0.99%	Schedule includes commissioning activities broken down by powerhouse area and discipline which take place at the end of the installations - this indicates a level of thought has been applied to the completions but no breakdown on a system level with a mind towards Unit 1 start-up.	6	0.85%	Bidder has not included separate activites for Mechanical Completion and Commissioning. Mechanical Completion and Commissioning by sub-system within work areas and disciplines is included.
3.11.5	Bidder plans to use PTW system complete with hazard / risk identification of all activities and interfaces with other contractors. Doesthe bidders safety plan include adequate electrical safety measures such as Lock-Out / Tag-Out provisions and Livening Up Notices and is it Z462 compliant.	3.0%	1.41%	9	1.27%	"Yes, *BIDDER* plan to implement a hazard/risk identification process for all of our work activities, we will use our Pre-Job Hazard Assessment process. *BIDDER* will follow all of the required safe working practices and procedures relative to specific, identified electrical hazards in the workplace, and ensure they are communicated and implemented for the safety of the workers. In additional to *BIDDER* specific electrical procedures, we will adhere to the current CSA Z462-15 standards."	9	1.27%	"We have used Permit to Work systems on many construction sites where the work has progressed to the level where the startup/commissioning activities present hazardous situations for other work teams or contractors sharing the work space. We would develop and implement a PTW system for this project based on the risk assessment and management processes from our Standard Work Instructions; Lockout/Tag out; Confined Space; Risk Register; Subcontractor management... We are Z462 compliant."
3.11.6	Bidders plan for Completions encpompasses cradle to grave approach - identifies use of FATs, MC checks, static commissioning, dymanic commissioning and and on-site performance tests.	3.0%	1.41%	8	0.79%	Bidder has provided a draft Commissioning Plan and references key items such as Static, Dynamic , punchlists etc. but is light on details with respect to procedures and methodology. Project Completion System compliance confirmed and suggests "turn key" subcontracts with suppliers	8	1.13%	Bidder has discussion rearding FATS, MC Certs and checks, static checks and dynamic commissioning which aligns with expectations. Further discussion/verification during bid clarification meetings.
3.11.7	Completion reports - does bidder plan to have auditable work packages for Mechanical Completion, Preservation, Static Commissioning with procedures for Dynamic Commissioning.	3.5%	1.65%	10	1.65%	Bidder plans to prepare turnover dossiers which will be kept up to date and available for review by company using a spreadsheet. Compliance with project Completions System.	10	1.65%	Bidder shall conform to all requirements including Project Completions System.
4.1	Recommended Commissioning and Start-up spares (L02)	25%	0.50%	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price schedule but this listing should be considered as "for info" at this stage.
4.2	Recommended 12 and 24 mth operating spares (L03)	25%	0.50%	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.
4.3	Recommended critical (Insurance) spares (L04)	25%	0.50%	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.
4.4	Special tools list (L05)	25%	0.50%	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.	10	0.50%	Bidder has provided the requested Appendix A2.3 Operating Spares price Schedule but this listing should be considered as "for info" at this stage.
5.0	Schedule (Appendix A9)	10%							

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
5.1	Control Schedule (A02) - Does it encompass the entire scope? Is it developed and presented in a format consistent with the criteria set forth in the Coordination Procedures? Does it provide the critical path and float for key activities?	50%	5.00%	8	4.00%	Schedule provided is P6 and is 19 pages in length. Schedule acceptable on details and task items. A series of documents have been included with submission, except no S-Curve or Histogram. (Rec'd after request.) Except for 1, dates align with Exhibit 9 and critical path has been provided. 5 activities with negative lags and no negative float. 7 SF relationships in the schedule. Schedule includes indirect man-hours and some tracking milestones. 14 open ends and some coding in schedule. More detail required on procurement and commissioning activities if bidder successful . Schedule indicates a gradual mobilization and site ramp up of work. Early vs late curve is quite tight as would be expected, logic needs some work towards end of schedule.	6.5	3.25%	Schedule provided is P6 and is 26 pages in length. Schedule lite on engineering, procurement activates - placeholders only. S-Curve and Histogram included. Submitted schedule has a 'Must Finish By Date'. This should not be used, logic should dictate end date. Except for 2, dates align with Exhibit 9. No critical path has been provided. No activities with negative lags, negative float or SF relationships. Schedule includes indirect man-hours and no tracking milestones. 2 open ends and no coding in schedule. More detail required on procurement and commissioning activities if bidder successful . Although the make up of the early and late curves has improved from previous submissions, there is still a fair amount of missing logic and links between activates. Schedule indicates a more gradual mobilization and site ramp up of work. Some 'A' Series document requirements have not been included, no logic ties.
5.2	Project Execution Plan (A07) - Has a draft been presented and is it aligned with expectations as set forth in the Coordination Procedures.	50%	5.00%	7	3.50%	Bidder's Rev. C PEP is much more descriptive than the previous submissions. It is clear that the bidder has made efforts to fully understand the scope of work and detail their intent to provide the required deliverables, planning and overall efforts. Document is no longer generic and describes their plan to execute with the exception of Quality Assurance and mechanical completions which is lighter on details. Good alignment with Exhibit 3 requirements. Heating must be clarified.	6	3.00%	Much discussion regarding the plan for stages of work execution. Discussion is logical and mostly aligns with SOW and Exhibit 3 requirements. It is indicative that this bidder understands the scope and their plan for executing the work, good detail and commentary throughout including construction tasks at each of the work faces. Reporting and progressing of the work is a also discussed. Heating must be clarified. Bidder has declined to update schedule and applicable execution plan sections (8.5) to align with Exhibit 9 dates.
6.0	**Logistics & Transportation Strategy (Appendix A15)**	5%							
6.1	Logistics and Transportation (A11) - Does it encompass the entire scope? Strategy Proposed transportation modes, routes, and ports of entry?	30%	1.50%	7	1.05%	Bidder has provided the minimum amount of information with clarification and Rev. C PEP. Bidder has provided draft sheets for major equipment. Section in Rev. C PEP is a place holder hover a decent amount of detail has been included in bid schedule.	7	1.05%	Bidder has provided "Shipment" forms for major mechanical equipment and proposes on site warehousing in addition to exsiting warehouse facilities in Montreal and HVG. Bidder has vast amounts of experience in Labardor and LCP site and most fabricated pipe and HVAC shall come from Quebec. A level of detail within Bid schedule on shipping activities is minimal.
6.2	Proposed carriers or freight forwarders - are the reputable? Have they worked in this region? Have they transported these types of equipment previously? Do they appear to understand the logisticial constraints associated with the work sites.	20%	1.00%	8	0.80%	Bidder has identified 2 freight forwarders with experience in Labrador and some previous experience with LCP at MF site.	7	0.70%	Bidder has identified only one freight forwarder but has Labrador experience. Bidder has extensive experience in Labardor and LCP at MF site.

TECHNICAL EVALUATION REPORT				CH0031		Package Title: Mechanical and Electrical Auxiliaries			
Item No.	Description	Weighting		Bidder:	Black and McDonald		Bidder:	Gahill Ganotec	
		Item Wgt	Overall Wgt	Bid No.:			Bid No.:		
6.3	Rigging and lifting - has the bidder presented a viable and well constructed plan?	10%	0.50%	9	0.45%	Bidder has stated it will meet or exceed our rigging and lifting spec. Bidder has included listing of planned lifting equipment in Rev. C PEP.	9	0.45%	Bidder has stated it shall conform to our rigging and lifting spec. Bidder has included a listing of lifting equipment.
6.4	Proposed method for equipment preservation / storage - viable. Procedures and forms provided? Plans for indoor storage of critical equipment on-site while waiting for installation to occur.	20%	1.00%	8	0.80%	Bidder has identified Sea-Cans on site. Bidder's Rev. 3 PEP has identified a 60,000 sq.ft. warehouse in HVGB which would be utilized as a storage/marshalling point. Generic care and preservation flowchart and sample preservation forms have been provided.	7	0.70%	Bidder has identified the need for onsite warehousing including a "megadome" structure. Bidder plans to utilize just in time delivery. Procedures and forms have been provided with proposal. Bidder does not plan to use a warehouse in HVGB.
6.5	Timing of deliveries - are they aligned with the natural transportation constraints? Has the bidder given consideration into the delivery windows and constraints when developing its Control Schedule.	20%	1.00%	7	0.70%	Bidder has done a good job of including shipping within schedule. Shipping is included as 'procurement/delivery' or 'fab/delivery'. Bidder plans to use a warehouse in HVGB with Sea-Cans on site.	6	0.60%	Bid Schedule does not include any line items for shipping and procurement activites are essentially a placeholder. Bidder plans to use a 'mega dome' type warehouse on site with Sea-Cans.
7.0	**Substitutions (App A3), Proposed Subs (App. A16) & Exceptions (App A17)**	5%							
7.1	Proposed Subcontractors	25%	1.25%	9	1.13%	A good list has been provided. ISO registration is not indicated for all.	8	1.00%	Bidder has provided a mostly complete Appendix A16.
7.2	Proposed Manufacturers	25%	1.25%	8	1.00%	Bidder has clearly identified locations for fabrication. All except 2 are ISO registered.	8	1.00%	Bidder has clearly identified locations for fabrication. ISO compliance.
7.3	Proposed Material Sources	20%	1.00%	8	0.80%	Extensive list provided. ISO registration not indicated for all.	8	0.80%	Bidder has provided an extensive listing of material suppliers on the Appendix A16. ISO registration not listed for all.
7.4	Substitutions (App A3)	15%	0.75%	8	0.60%	Request for alternative equipment (value engineering) offerings provided.	6	0.45%	Request for alternative equipment (value engineering) offerings largely ignored. 2 items listed.
7.5	Exceptions (App A17)	15%	0.75%	10	0.75%	As per 1.3 above	10	0.75%	As per 1.3 above
	TOTAL SCORE				**78.4%**			**80.2%**

Health and Safety Evaluation

Health and Safety Scoring Guide:										
0 - Question not answered or no relevant information provided in response 1 - Response does not meet key Criteria 2 - Response only meets a few of the key criteria 3 - Response meets a majority of the key criteria 4 - Response meets all key criteria 5 - Response meets and exceeds key criteria		Package Name: Package No.: CH0031 Project : Lower Churchill Project Review completed using documents provided as well as performance on current LCP sites.								
	Question Weight (%)	Black & Mac						Cahill / Ganotec		
		Answer	Score	Score Comments	Answer	Score	Score Comments	Answer	Score	Score Comments
Health and Safety										
2.0 HEALTH AND SAFETY MANAGEMENT PERFORMANCE - Please provide the following safety statistics, referencing the attached incident definitions and frequency calculation.	10				4	8	TRIFR 1.22	4	8	TRIFR 1.17
3.0 WORKER'S COMPENSATION - Indicate the jurisdiction where you are registered. List your overall Worker's Compensation Industry rating for the current year and past three (3) years. Attach a WCB clearance letter and experience rating statements for the past three years.	3				4	2.4	Clearance letter provided	4	2.4	WHSCC Clearance Provided
4.1 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a certificate of recognition or is your health and safety management system certified by an outside agency? (OHSAS 18001, CSA Z-1000 etc.) If yes, provide a copy of the certificate.	2				4	1.6	COR Provided	4	1.6	COR Provided
4.2 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your health and safety program have a policy statement that clearly outlines the Company's commitment to health and safety?	3				4	2.4	Policy Provided	4	2.4	Policy Provided
4.3 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Has your company received an occupational health and safety stop work order, charges or equivalent from any regulator in the last three (3) years? If yes, provide details.	3				3	1.8	Bidder answered no	3	1.8	Bidder answered no
4.4 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Please list the highest ranking safety professional in your organization: (attach résumé). Do you plan to have a safety representative(s) for this Work full time or part time (Y or N)? If "Yes", provide a résumé(s).	3				4	2.4	CV Provided	4	2.4	CV Provided
4.5 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your health and safety management system address the following key elements? Management leadership and commitment; hazard/risk identification, evaluation and control; risk assessments on all critical and non-routine jobs/job functions; a permit to work system; ongoing inspection. If yes to any of these, reference appropriate Health and Safety manual section(s).	8				4	6.4	Documents provided, Sec 1,2 and 9 of H&S Manual	4	6.4	Documents Provided. Sec 1, 2, & 17 of H&S Manual
4.6 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your health and safety management system include work practices and procedures, such as: Lockout and tag out; traffic control; excavation and trenching; confined space entry; hoisting and rigging; working near power lines; handling and transporting hazardous substances; unloading large/long materials (such as piles); vehicle recovery. If yes to any of these, reference appropriate Health and Safety manual section(s).	8				4	6.4	Documents provided, Sec 1 and 6 of H&S Manual	4	6.4	Documents Provided. Sec 5 of H&S Manual
4.7 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have written programs for the following? Duty to refuse work; fall protection; noise management; workplace violence; working alone; personal protective equipment (PPE); WHMIS (Workplace Hazardous Materials Information System); respiratory protection. If yes to any of these, reference appropriate Health and Safety manual section(s). In regards to respiratory protection, have your employees been: trained? fit tested? medically approved?.	8				4	6.4	Documents provided, Sec 1,4 and 6 of H&S Manual	4	6.4	Documents Provided. Sec 4, 8, & 5 of H&S Manual
4.8 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you conduct medical exams for the following? Pre-employment; replacement job capacity; pulmonary; respiratory. If yes to any of these, reference appropriate Health and Safety manual section(s).	2				0	0	Bidder answered no	0	0	Bidder answered at client request and did not provide any documentation
4.9 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a drug and alcohol program? If "Yes", does it include the following? Pre-employment testing; testing for cause; post incident testing; formalized arrangements with a collection and testing agency (if "Yes", provide testing agency information); does your drug and alcohol policy follow the guidelines as laid out in The Canadian Model for Providing A Safe Workplace – Alcohol and Drug Guidelines and Work Rule Version 2 – Effective October 1, 2010? If yes to any of these, reference appropriate Health and Safety manual section(s).	3				3	1.8	Documents provided, Sec 15 of H&S Manual. Bidder answered no to pre-access testing	2	1.2	Bidder stated they have a program but it does not meet the Canadian Model
4.10 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Equipment (Tools, Supplies, Machinery and Sanitary Facilities): Do you have a written list of equipment requiring pre-use inspections? Do you have a documented list of equipment requiring scheduled servicing in accordance with manufacturer's recommendations, legislated requirements, and industry standards? Is frequency of equipment inspections and maintenance identified? Are corrections of deficiencies documented? Do you have follow-up mechanism for corrective actions? If yes to any of these, reference appropriate Health and Safety manual section(s).	4				4	3.2	Documents provided, Sec 7 and 9 of H&S Manual	4	3.2	Documents Provided. Sec 13 of H&S Manual
4.11 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Orientation Program: Do you have a health and safety orientation program? Does the program include new, transferred and temporary workers? Does the program provide instruction on the following: employer health and safety responsibilities; employee health and safety responsibilities; obligation to refuse imminent danger work; progressive discipline policies and procedures; safe work practices and/or procedures; emergency response procedures; first-aid procedures; incident/near miss reporting; does you orientation program include a quiz? If yes to any of these, reference appropriate Health and Safety manual section(s).	5				4	4	Documents provided, Sec 8 of H&S Manual	4	4	Documents Provided. Sec 14 of H&S Manual
4.12 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Incident Investigation: Do you have a written procedure for incident reporting and investigation?; Do you utilize a root cause determination process such as "Tap-Root"? If yes to any of these, reference appropriate Health and Safety manual section(s).	5				4	4	Documents provided, Sec 10 of H&S Manual	4	4	Documents Provided. Sec 18 of H&S Manual
4.13 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have an emergency response plan related to activities and specific locations? If yes reference appropriate Health and Safety manual section(s).	4				4	3.2	Documents provided, Sec 11 of H&S Manual	4	3.2	Documents Provided. Sec 19 of H&S Manual
4.14 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a policy pertaining to prohibited items on (e.g. knives, firearms)? Are all employees made aware of the prohibited items policy and is it enforced? If yes to any of these, reference appropriate Health and Safety manual section(s).	1				0	0	Bidder answered no	0	0	Bidder answered no

Health and Safety										
4.15 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you make reference to following legislative requirements where work is being performed?; violence policies and procedures; harassment policies and procedures. If yes to any of these, reference appropriate Health and Safety manual section(s).	1				4	0.8	Documents provided, Sec 6 of H&S Manual	4	0.8	Documents Provided. Sec 21 of H&S Manual
4.16 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a policy or specific rules with respect to the use of personnel protective equipment (PPE)? Do you have a formal process in place for determining PPE requirements? If yes to any of these, reference appropriate Health and Safety manual section(s).	3				4	2.4	Documents provided, Sec 6 of H&S Manual	4	2.4	Documents Provided. Sec 12 of H&S Manual
4.17 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Contractor Management: Do you pre-qualify subcontractors?; Do you include subcontractors in: orientations, health and safety meetings, inspections, audits. If yes to any of these, reference appropriate Health and Safety manual section(s).	5				4	4	Documents provided, Sec1 of H&S Manual	4	4	Documents Provided. Sec 1.6 of H&S Manual
4.18 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Communications: Do you inform employees and subcontractors on Health and Safety alerts, programs, practices, procedures, rules, revisions and related information ? Do you have a joint Health and Safety committee? Do you hold scheduled safety meetings, such as weekly general safety meetings for all crew and weekly departmental meetings for each department at all worksites? Are Health and Safety meeting minutes and attendance recorded? If yes to any of these, reference appropriate Health and Safety manual section(s).	5				4	4	Documents provided, Sec8 of H&S Manual	4	4	Documents Provided. Sec 3 of H&S Manual
4.19 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your Health and Safety program outline the requirements for supervisors and employees to conduct regular Health and Safety inspections of equipment and work conditions at all worksite(s)? If yes reference appropriate Health and Safety manual section(s).	3				4	2.4	Documents provided, Sec 1 & 9 of H&S Manual	4	2.4	Documents Provided. Sec 17 of H&S Manual
4.20 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your Health and Safety program require the prompt reporting of hazardous conditions at all worksite(s)? If yes reference appropriate Health and Safety manual section(s).	5				4	4	Documents provided, Sec 10 of H&S Manual	4	4	Documents Provided. Sec 1.6 of H&S Manual
4.21 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Health and Safety Training: Have your employees received the required Health and Safety training and retraining? Do you have a specific Health and Safety training program for supervisors? If yes to any of these, reference appropriate Health and Safety manual section(s).	3				4	2.4	Documents provided, Sec 1 & 8 of H&S Manual	4	2.4	Documents provided
4.22 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Training Records: Do you have Health and Safety training records for your employees? How do you verify competency of the training (job monitoring? written test? competency check? oral test? other?). Are all training records available upon request? If yes to any of these, reference appropriate Health and Safety manual section(s).	3				4	2.4	Documents provided, Sec 8 & 14 of H&S Manual	4	2.4	Records are available on site

1.3a Adequacy of Environmental targets	3.0	5.0	5.0	3.00		5.0	3.00	quarterly review	4.0	2.40		Rank adequacy 1 - 5; If not provided Score 0
1.4 Has a formal system, including the use of audits and inspections, been developed to define responsibilities for verifying that environmental performance objectives are met?	1.5	5.0	5.0	1.50		5.0	1.50		5.0	1.50		Yes = 5; No = 0
1.4a Adequacy of audit and inspection information	1.5	5.0	4.0	1.20	annual	4.0	1.20	quarterly review	4.0	1.20		Rank adequacy 1 - 5; If not provided Score 0
2. ENVIRONMENTAL HAZARD IDENTIFICATION AND RISK MANAGEMENT												
2.1 Does the Bidder conduct formal risk assessments when planning and implementing operations and activities?	2.0	5.0	5.0	2.00		5.0	2.00		5.0	2.00		Yes = 5; No = 0
2.2 If "Yes", does that risk assessment include environmental risks?	1.5	5.0	5.0	1.50	comprehensive	5.0	1.50		4.0	1.20		Yes = 5; No = 0
2.2a adequacy of risk management system	1.5	5.0	5.0	1.50		5.0	1.50	comprehensive	4.0	1.20		Rank adequacy 1 -5; If not provided Score 0
2.3 Has a formal hazard observation program been implemented at the Bidder's worksites?	0.5	5.0	5.0	0.50		5.0	0.50		5.0	0.50		Yes = 5; No = 0
2.3a Adequacy of hazard observation program	0.5	5.0	4.0	0.40	general insp.	4.0	0.40		4.0	0.40		Rank adequacy 1 - 5; If not provided Score 0
3. ORGANIZATIONAL RULES AND WORK PROCEDURES												
oes the Bidder have documented environmental protection plans for bs/work activities?	1.5	5.0	0.0	0.00		5.0	1.50		5.0	1.50		Yes = 5; No = 0
3.1a adequacy of EPP	2.5	5.0	0.0	0.00		4.0	2.00		5.0	2.50		Rank adequacy 1 - 5; If not provided Score 0
3.2 Does the Bidder have environmental contingency plans?	1.5	5.0	5.0	1.50		5.0	1.50		5.0	1.50		Yes = 5; No = 0
3.2a adequacy of contingency plans/Does the plan outline responsibilities, available resources and actions to be taken in the event of an environmental incident?	2.5	5.0	4.0	2.00	Plan provided	4.0	2.00		4.0	2.00		Rank adequacy 1 - 5; If not provided Score 0
4. EMPLOYEE KNOWLEDGE, TRAINING AND AWARENESS												
4.1 Does the Bidder have an environmental awareness program?	1.5	5.0	5.0	1.50		5.0	1.50		5.0	1.50		Yes = 5; No = 0
4.1a Adequacy of Program?	2.0	5.0	4.0	1.60		4.0	1.60		4.0	1.60		Rank adequacy 1 - 5; If not provided Score 0
4.2 Does the Bidder provide environmental awareness training to supervisory staff?	2.0	5.0	5.0	2.00		5.0	2.00		0.0	0.00		Yes = 5; No = 0
4.3 What is frequency of environmental awareness training?	2.0	5.0	4.0	1.60	project specific	4.0	1.60	provided once	4.0	1.60	annually	Score 1-5. If monthly score 5; If bimonthly score 4; If quarterly score 3; If biannually score 2; If annually score 1
4.3a Adequacy of content environmental awareness training	3.0	5.0	4.0	1.60		3.0	1.20	few details	4.0	1.60	few details	Rank adequacy 1 - 5; If not provided Score 0
5. PERSONAL COMMUNICATIONS AND ENVIRONMENTAL MEETINGS												
5.1 Are personal communications conducted to impart environmental awareness with other workers and thereby reducing the likelihood of non compliances or environmental incidents?	1.5	5.0	5.0	1.50		5.0	1.50		5.0	1.50		Yes = 5; No = 0
5.2 Is there a system for sharing best practices and procedures, incidents and other information across the Bidder's organization?	1.0	5.0	5.0	1.00		5.0	1.00		5.0	1.00		Yes = 5; No = 0
5.3 Is there an environment committee in place?	1.0	5.0	5.0	1.00		5.0	1.00		5.0	1.00		Yes = 5; No = 0
5.4 Are regular (minimum monthly) environmental meetings held at all facilities to maintain effective communication of environmental nation throughout the organization and with Bidder's contractors?	2.0	5.0	5.0	2.00		5.0	2.00		5.0	2.00		Yes = 5; No = 0
dequacy of content and frequency of environmental meetings?	1.5	5.0	5.0	1.50		5.0	1.50		5.0	1.50		Rank adequacy 1 - 5; If not provided Score 0
5.5 Are minutes and records of attendance of these meetings maintained?	0.5	5.0	5.0	0.50		5.0	0.50		5.0	0.50		Yes = 5; No = 0

Quality Assurance Evaluation

RFP - Quality Assurance Evaluation Report

RFP #: CH0031 **RFP Name:** Balance Of Plant

Quality Questionnaire Questions	Weight	Max Score	Bidder 1			Bidder 2 Black & McDonald Limited			Bidder 3 Cahill/Ganotec - Joint Venture			Bidder 4 N/A			Bidder 5 N/A			Bidder 6 N/A		
			Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments
1i) Bidder's quality policy statement and list of current quality objectives.	0.2	5.0		0.00		4.0	0.16	Statement of commitment to the quality management system is OK to cover the quality policy but it relates to their Nuclear manual and no quality objectives clearly identified.**Scoring has been revised because of objective evidence provided by the bidder during the pre-award audit performed by LCP on 27-April-2016 (The bidder provided a draft copy of there Quality Management System Manual, the bidder is currently in process of getting there ISO certification for Eastern Canada, the new QMS has a quality policy and objectives).**	4.5	0.18	Quality policy and list of quality objectives provided as requested.	0.0	0.00		0.0	0.00		0.0	0.00	
1ii)Bidder's Master Documents List or the Table of Contents of your policy and procedures manual.	0.5	5.0		0.00		4.0	0.40	TOC for their N286 Nuclear manual provided and a list of management system documents provided.	4.5	0.45	TOC and quality manual provided, well defined.	0.0	0.00		0.0	0.00		0.0	0.00	
1iii) Bidder's current internal / External Audit Schedules.	1.0	5.0		0.00		1.0	0.20	Audit schedule provided but it is only for Nuclear work in Ontario for 2015 and doesn't include any other projects outside of Nuclear, no evidence of other audit to be performed internal or external.	4.5	0.90	Audit schedule provided for 2014, covers internal and external audits.	0.0	0.00		0.0	0.00		0.0	0.00	
1iv)Bidder's third party ISO 9000 registration, if available.	0.5	5.0		0.00		3.0	0.30	Contractor is not ISO certified.**Scoring has been revised because of objective evidence provided by the bidder during the pre-award audit performed by LCP on 27-April-2016 (The bidder provided a draft copy of there Quality Management System Manual, the bidder is currently in process of getting there ISO certification for Eastern Canada, the bidder is ISO certified in other provinces).**	4.5	0.45	ISO certification provided, expiry date is 07-Mar-2017.	0.0	0.00		0.0	0.00		0.0	0.00	
1v) Most Recent Management Review Minutes of Meeting.	1.0	5.0		0.00		1.0	0.20	Management review meeting minutes provided for 2013, which covers Nuclear only from what I can tell, the minutes indicate some minor quality issues from the performance and operations managers, no details on any other projects provided.	3.5	0.70	Management review meeting minutes provided, some concerns listed regarding documentation issues.	0.0	0.00		0.0	0.00		0.0	0.00	
1vi) If ISO 9001:2008 registration is held, a copy of last third party surveillance report.	0.3	5.0		0.00		3.0	0.18	Contractor is not ISO certified, so no third party audit report available.	4.0	0.24	Third party audit report provided, some areas of concern identified and require actions.	0.0	0.00		0.0	0.00		0.0	0.00	
2) Briefly describe any processes employed to plan the activities related to the requested products / services. If available, provide typical examples of Quality Plans and / or Inspection and Test Plans.	0.4	5.0		0.00		4.0	0.32	Bidder provided a very detailed quality plan and completed ITP but they are again related to Nuclear only.	4.0	0.32	Bidder indicates that if a quality plan/ITP is required they will develop, a sample quality plan and ITP template only have been provided.	0.0	0.00		0.0	0.00		0.0	0.00	
3) Describe how this work relates to the total annual productive capacity of Bidder's company and that of Bidder's main suppliers.	0.5	5.0		0.00		4.5	0.45	Bidder identified that the annual capacity in less than 10% and is mostly construction labour, main supplier's have confirmed no issues.	3.5	0.35	Bidder provided limited information on capacity, they only indicated that the work is well within their capacity.	0.0	0.00		0.0	0.00		0.0	0.00	
4) Briefly describe the processes used to control the design of the products / services to be supplied. Include references to the following processes: • Design Planning • Design Review • Design Verification • Design Validation • Design Changes	1.0	5.0		0.00		3.0	0.60	Bidder doesn't perform design work, design will be sub contracted.	3.0	0.60	Bidder doesn't perform design work, design will be sub contracted.	0.0	0.00		0.0	0.00		0.0	0.00	
5) Briefly describe the Bidder's Supplier / Sub-contractor selection process and any processes employed to monitor continued performance against contract requirements. In Bidder's response include a list of any services associated with the scope of work that would be sub-contracted out and where appropriate, the contract details for that Sub-Contractor.	1.0	5.0		0.00		3.0	0.60	Bidder has a process in place for an approved supplier list which is covered in the Nuclear manual, they indicated that have a procedure BM- PROC-028 Approved Supplier List but it was not provided as identified in the questionnaire.	4.0	0.80	Bidder provided a well defined procedure that covers all areas of sub contracted work.	0.0	0.00		0.0	0.00		0.0	0.00

Clarification / Pre Award Audit (Desk Top and/or Site) Recommended	Yellow																			
Not Recommended	Red																			
			**Proponent must achieve a minimum Total Weighted Score of 60 percent to be considered acceptable.																	

Comments: (Overall impression of the Bidder and how the evaluation as it relates to the recommendation)

Bidder 1: Bidder is recommended but prior to award the bidder/joint venture will be audited including subcontractors to verify their quality management system implementation based on their bid documents. Note: Proposed Quality Manager has the experience and qualifications to meet LCP requirements (CSA 178.2 Level 2 Certified Welding Inspector, Certified ISO Internal Auditor and large construction project experience).

Bidder 2: Bidder is not recommended based on documented evidence provided related to their proposed new quality management system. The new information provided appears to focus mainly on the bidders Nuclear manual requirements for projects based on Ontario's Nuclear industry. The new information including procedures provided is completely different from the first submittal on their proposed quality management system. LCP quality is very concerned whether the bidder actually has a quality management system that they are currently implementing on other projects similar to LCP SOW requirements based on the evidence provided, many of the answers provided had limited information with comments to refer to the Nuclear manual or procedures only, it is hard to determine if the bidder has a quality department/team in place and/or quality members are trained on the new quality management system proposed for implementation on the CH0031 SOW. Also the proposed Quality Manager is well experienced and has the qualifications to meet LCP requirements (CSA 178.2 Level 2 certified Welding Inspector, API Certified in many areas, CGSB Certification in RT/MT/PT) but appears to be currently working elsewhere and not employed by the bidder at this time which is concerning. LCP's intent is to approve bidders that currently have a quality management system in place based on ISO requirements, it is not the intent to approve bidders without a quality management system in place or to bidders that are trying to implement a new quality management system during the CH0031 SOW. In order for the bidder to meet LCP quality expectations the bidder would need to demonstrate their quality management system implementation to LCP based on a LCP detailed audit of a current or past project similar in nature to the CH0031 SOW prior to award. The audit shall be performed on a project that was completed by the bidder without joints ventures as proposed for the CH0031 SOW in the bid documents provided by the bidder, the project to be audited must have been completed with the intent of following ISO requirements in order to meet LCP expectations. The audit shall not be performed on a Nuclear project, the project needs to be similar to the CH0031 SOW. If the bidder is selected LCP will also audit the bidders proposed subcontractors as deemed necessary.
(Note: LCP's quality department performed a per-award audit on 27-Apr-2016, during the audit LCP was provided with objective evidence to support that the bidder has the capability to develop a Quality Management System to meet the project requirements.. The bidder also identified a new quality manager that currently works for the bidder and fully understands thier internal processes and procedures. Based on the new information provided during the pre-award audit the scoring has been revised to support that the bidder can be recommended as meeting the minimum requirements regarding their Quality management System and can be considered as passing the quality section of the bid proposal).

Bidder 3: Bidder is recommended but prior to award the bidder/joint venture will be audited including subcontractors to verify their quality management system implementation based on their bid documents. Note: Proposed Quality Manager has the experience and qualifications to meet LCP requirements (CSA 178.2 Level 2 Certified Welding Inspector and large construction project experience).

TABLE OF CONTENTS

nalcor energy LOWER CHURCHILL PROJECT	Interim Bid Evaluation and Short List Recommendation	Rev.	Date
	CH0031 – Supply and Install Mechanical and Electrical Auxiliaries (MF)	00	24-Jun-2016

1.0 PURPOSE

In accordance with Section 7.0 – Short Listing of the Bid Evaluation Plan, the purpose of this document is to, to recommend a short list of Bidders for CH0031 – Supply and Install Mechanical and Electrical Auxiliaries (MF) based on best value proposals in order to expedite the evaluation process. The Interim Bid Evaluation is based on evaluating the following criteria in accordance with the approved Bid Evaluation Plan approved on 22-Jan-2015:

- Commercial
- Technical
- Quality
- Health and Safety
- Environmental
- Risk Management

2.0 RECOMMENDATION

The Overall Scoring Matrix is included in Attachment 1. Bidders are ranked as follows:

1. Cahill-Ganotec Joint Venture (CG) - Bidder 3 – 91.5%
2. Black & McDonald Limited (BM) - Bidder 2 – 60.5%
3. LASC Muskrat Falls Joint Venture (LASC) - Bidder 1 – 30.7%

Based on the above, and in accordance with the included evaluation, it is recommended that CH0031 – Supply and Install Mechanical and Electrical Auxiliaries (MF) list of active Bidders be short listed to include:

1. **Cahill-Ganotec Joint Venture (CG) - Bidder 3 – 91.5%**
2. **Black & McDonald Limited (BM) - Bidder 2 – 60.5%**

3.0 BIDDERS LIST

RFPs were issued to the following approved Bidders:

- **Black & McDonald Limited**
- **Cahill-Ganotec Joint Venture**
- Groupe Plombaction Inc. Joint Venture
- Aecon Industrial, a Division of Aecon Group Inc.
- Pennecon Energy Ltd.
- Andritz Hydro Canada Inc.
- **Alberici Constructors, Inc., Lorneville Mechanical Contractors Ltd. and Sunny Corners Enterprises Inc. Joint Venture (LASC)**

The following Bidders declined to submit an RFP:

- Groupe Plombaction Inc. Joint Venture
- Aecon Industrial, a Division of Aecon Group Inc.
- Pennecon Energy Ltd.
- Andritz Hydro Canada Inc.

4.0 SCOPE

The Scope of Work (SOW) for Package CH0031 includes design, supply, installation, registration and completions of mechanical piping systems, heating ventilation and cooling (HVAC) systems, auxiliary electrical systems, assembly and installation of major electrical equipment supplied by Company's Other Contractors, all connections, cabling, site testing, completions of all electrical and mechanical installation made by Contractor, removal and disposal of all temporary electrical and mechanical installations. Supply and installation of architectural interior works for the Muskrat Falls Powerhouse are also included.

CH0031 has a significant amount of mechanical and electrical equipment (both supplied by the nominated CH0031 Contractor and Company's other Suppliers) to be installed and commissioned by the CH0031 Contractor. There are a number of important interfaces with this equipment installed by the CH0031 Contractor and the Powerhouse Protection, Control and Monitoring System provided by the CH0030 Contractor.

The Spillway concrete works, gates, stop logs, towers, hoists, Spillway electrical building, as well as power supply and controls for the Spillway for the diversion phase will be by Company's Other Contractors but final connection to the Powerhouse power supply and controls is a component of the CH0031 Work.

The Intake concrete works, the Intake trash rack, Intake bulkhead gates, Intake gates and hoists and hoist Motor Control Centers (MCC) will be by Company's Other Contractors, but the power supply to the MCCs in the Intake and Intake building ancillary services as well as final connection to the Powerhouse power supply and controls is a component of the CH0031 Work.

The Work will also consist of supplying detailed documentation for design, quality control, and operation and maintenance for all work required by the Agreement, and the training of Company's personnel.

5.0 PROPOSAL EVALUATION TIMELINE

RFPs were issued on 10-Jun-2014 with a closing date of 16-Jan-2015. All proposals were received before the closing date and time and were opened on 22-Jan-2015 at LCP's office in St. John's, NL.

Bids were distributed to evaluation team members on 23-Jan-2015.

Proposal clarification began on the 10-Feb-2015 and has continued with all three Bidders up to the present date.

The first clarification meetings were held with bidders in May of 2015.

Bidder 1 - Deferred as a result of Commercial Steering Committee meeting 20-May-2015
Bidder 2 - 21-May-2015
Bidder 3 - Deferred as a result of Commercial Steering Committee meeting 20-May-2015

A steering committee meeting was convened on 20-May-2015 to provide an overview of evaluation findings to date (technical and commercial presentations see Attachment 8). At that meeting the steering committee advised that due to project schedule uncertainty bid validity should be extended to October 2015 and that Bid Clarification meetings should be suspended until further notice. It was also decided that due to concerns about the possible withdrawal of a Bidder, that we should delay consideration of short listing and that all Bidders should be carried to ensure we do not end up with non-competitive situation.

Following a senior management request to review the contract strategy for CH0031, due to the high submitted proposal pricing (which exceeded the package budget) from the Bidders, on 29-Oct-2015 the steering committee was presented with the attached (Attachment 8) quantitative analysis to review the contracting strategy. As a result of this quantitative analysis it was decided to maintain the original strategy.

On 10-Feb-2016 a meeting was held with S. O'Brien to ensure the technical evaluation plan for the package addressed the appropriate technical and execution risks. As a follow up to this meeting, further meetings were held with various project resources and technical and execution risks were reviewed. No adjustments to the technical evaluation plan were required as key elements of the CH0031 Risk Register have been addressed within the bid evaluation technical scoring.

As a result of time elapsed since submittal of the original proposal, changes to the site conditions (Exhibit 12), specification updates and a value engineering exercise, a bid verification, to revalidate commercial and technical proposals, was issued on 1-Nov-2015. All Bidders resubmitted proposals before the closing date and time and were opened on 12-Feb-2016 at LCP's office in St. John's. The proposals, as received, were based on the following compensation schemes:

- Bidder 1 Fully Reimbursable
- Bidder 2 Fixed Price with reimbursable labour
- Bidder 3 Full Reimbursable

A steering committee meeting was convened on 29-Feb-2016 to provide an overview of evaluation findings to date (technical and commercial presentations see Attachment 8).

Bid clarification meetings were conducted in March 2016, with Bidders to clarify the above referenced proposals.

Bidder 1 - 21-Mar-2016
Bidder 2 - 30-Mar-2016
Bidder 3 - 23-Mar-2016

A steering committee meeting was convened on 24-Mar-2016 to provide an overview of the main challenges associated with the evaluations.

Bidder 1 – Fully reimbursable proposal – Represents unacceptable cost risk to Company
Bidder 2 – Quality assurance issues with Bidder
Bidder 3 - Fully reimbursable proposal – Represents unacceptable cost risk to Company (During the clarification meeting, Bidder had committed to reconsider its proposal and revert)

It was decided that quality audits of each Bidder would be conducted and following the quality audit the QA evaluation would be validated against the audit findings. It was also decided that consideration of shortlisting would be deferred until Bidder 3 reworked its compensation model.

As a follow up to the Bid clarification meeting 23- Mar-2016 with Bidder 3, Bidder 3 agreed to Fixed Price with reimbursable labour compensation model. As a result proposals have the following compensation schemes:

- Bidder 1 Fully Reimbursable
- Bidder 2 Fixed Price with reimbursable labour
- Bidder 3 Fixed Price with reimbursable labour

A steering committee meeting was convened on 25-Apr-2016, to review the current status of the evaluation. See attached technical presentation and action items (Attachment 8).

A steering committee meeting was convened on 26-May-2016, to review package pricing model options. See attached action items (Attachment 8).

On 3-Jun-2016 a meeting was held to review options for the Management of Project Labour Agreement (PLA) labour risk through risk reward compensation model. See attached minutes (Attachment 8).

On 22-Jun-2016 a Steering Committee meeting was convened for the Evaluation Team to provide an interim evaluation presentation. See attached Evaluation Summary (Attachment 8). Due to the reasons noted below, the Steering Committee agreed with the Evaluation Team's recommendation to short list to two (2) Bidders.

- Large discrepancy in pricing (Pricing approximately 2x budget and greater than 2x low bid);
- Commercial model proposed does not adequately comply with models requested in the RFP;
- Article exceptions are extensive and not commercially reasonable to negotiate;

it was decided that shortlisting is warranted at this time and Bidders 1 would be dropped from further evaluation and Bidders 2 & 3 would continue to be evaluated.

Company intends to request a final pricing validation, from the remaining two Bidders, based on an updated Exhibit 9- Schedule that is expected to be approved near the end of June.

6.0 EVALUATION TEAM

Evaluation Team	Representative
Commercial	Philip Bursey – Michael Fisher
Commercial - Legal	Aidan Meade
Technical	David Wright (Lead) / Jim Slade / Gord Haines / Scott Penney / Antoine Gemayel / Martin Landry / Albert Mitchelmore

Quality	Paul Fraser – **David Green**
Risk Management	Carlos Fernandez
Benefits	Maria Moran
Health & Safety	Sean Lee
Environment	Clyde McLean
Cost Controller / Planner	Andrew Whitty

Commercial Steering Committee

Business Services Manager – Lance Clarke
Supply Chain Manager – Pat Hussey
Project Manager - Muskrat Falls Generation - Scott O'Brien

7.0 EVALUATION CRITERIA

The following weighted evaluation criteria was agreed by the Evaluation Team and used to assess Bidder's Proposals.

Criteria	Weighted Rating (%)
Commercial	60%
Technical	40%
Quality	Pass/Fail
Risk	Pass/Fail
Health & Safety	Pass/Fail
Environmental	Pass/Fail

For Health & Safety, Bidders had to obtain a score of 70% or greater to pass. For Environmental, Bidders had to obtain a score of 60% or greater to pass. For Risk, Bidders had to obtain a score of 60% or greater to pass. For Quality, Bidders had to obtain a score of 60% or greater to pass.

8.0 COMMERCIAL EVALUATION

The commercial portion of the evaluation is based on unconditioned proposals submitted on 12-Feb-2016.

See detailed commercial evaluation attached in Attachment 2.

Fixed Price means unit pricing, which is not subject to variation, for all aspects of the Work (materials, equipment consumables, project management, overhead and profit, etc.) which

collectively, based on the material takeoff quantities, will form a lump sum price for all aspects of the Work with the exception of unionized site labour.

Description	Bidder 1 – LASC Muskrat Falls Joint Venture	Bidder 2 – Black and McDonald Limited	Bidder 3 – Cahill – Ganotec Joint Venture
Commercial Model	Fully Reimbursable with no caps. Cost Risks: - Management Personnel - PLA Labour - Equipment - Indirect Materials and Consumables	Fixed Price with reimbursable labour (no caps) Believe appropriate commercial measures can be negotiated to mitigate PLA labour risk exposure	Fixed Price with reimbursable labour (no caps) Believe appropriate commercial measures can be negotiated to mitigate PLA labour risk exposure
Price	Approximately 2x low bid. Approximately 2x package budget.	Approximately 47% greater than low bid. Approximately 43% greater than budget.	Low Bid. Close to package budget.
Article Exceptions	Extensive and seek to materially alter or remove many of the key criteria including; - Change Criteria - Standard of a Prudent Contractor - Liabilities and Indemnities - For reference a commented copy of commercial exceptions is attached in Attachment 2	Negotiable	Significant but negotiable
Risk	Proposal attempts to defer all cost, execution and legal risk to Company	Proposal attempts to transfer additional risk to Company. Believe an acceptable risk regime can be negotiated.	Proposal attempts to transfer additional risk to Company. Believe an acceptable risk regime can be negotiated.
Attitude	Have not demonstrated a willingness to bend on the	Have demonstrated a willingness to	Have demonstrated a willingness to negotiate.

Description	Bidder 1 – LASC Muskrat Falls Joint Venture	Bidder 2 – Black and McDonald Limited	Bidder 3 – Cahill – Ganotec Joint Venture
	key items referenced above. Have not been providing as much information as expected in the clarification process.	negotiate. Have cooperated throughout the clarification process.	Have cooperated throughout the clarification process
General	Proposal does not conform closely to either requested pricing model in the RFP and has such extensive exceptions that it is not considered commercially reasonable to negotiate.	Mostly compliant - negotiable	Mostly compliant - negotiable

The recommendation to short list is based strictly on commercial criteria and the evaluation to date.

The Evaluation Team are confident that Bidders 2 and 3 are committed to seeing the RFP process though to its conclusion and will maintain the competitive environment necessary to ensure best value to Company.

Given the significant price difference and extensive exceptions the Evaluation Team does not consider it reasonable or practical to continue including Bidder 1 in the RFP Evaluation process.

Based on the above it is recommended that the Bidders be short listed to:

- **Cahill-Ganotec Joint Venture (CG)**
- **Black & McDonald Limited (BM)**

9.0 TECHNICAL EVALUATION

The Technical Evaluation is included in Attachment 3.

All Bidders are technically acceptable although further technical clarifications are ongoing.

10.0 HEALTH & SAFETY EVALUATION

The Health and Safety Evaluation is included in Attachment 4.

11.0 ENVIRONMENTAL EVALUATION

The Environmental Evaluation is included in Attachment 5.

12.0 QUALITY ASSURANCE EVALUATION

The Quality Evaluation is included in Attachment 6.

13.0 RISK MANAGEMENT EVALUATION (IF APPLICABLE)

The Risk Management Evaluation is included in Attachment 7.

Exceptions

COMMERCIAL CLARIFICATIONS

1. LASC's Proposed Contract Model - LASC's proposal offer is based on an alternative compensation model as identified in Appendix A2.1 and is not based on Option 1 or Option 2 as identified on the Proposal Form Letter.

2. Technical Services: The LASC proposal and offer includes for a cost allowance to be fully cost reimbursable of all costs. This allowance covers engineering activities (services) associated with design and engineering tasks for any and all systems integration (plant) whether supplied solely by CH0031 or interfacing with others, procurement engineering functions, FAT testing specifications and testing oversight, design activities and associated document requirements as stipulated within the SDRL.

3. Commissioning: Following mechanical completion commissioning as described in contract document 505573-3344-40EF-0001 Rev00 (61 pages) has been priced by LASC as an allowance which is to be fully reimbursable of all costs. These costs include man-hour quantities for trade support labour and staffing costs for the "Commissioning Team". The trade support man-hour cost allowance is based on percentages of the estimated installation hours adjusted for the complexities of the equipment and systems. The scope of work by CH0031 touches all the plant systems including those installed by other contractors and under their responsibility and hence the Owners care and control. LASC intends to fully support the Owners RFO team in coordinating, planning and executing all aspects of the commissioning effort but will require the RFO's leadership to help lead and drive the process.

4. MTO's: The LASC proposal is based on material take-offs from the RFQ documents, including Addendum 15. Discrepancies within the documents do exist and required interpretation by LASC, accordingly if final quantities procured and installed exceed those provided in the LASC detail pricing sheet Appendix A2.1, then a change order will be required.

5. PLA Labour Air Travel [Exhibit 12 – 8.4]: Nalcor is responsible for all PLA Labour Air Transportation costs as pass through costs, regardless of travel origin.

6. Contractor Site Administration Office: As identified in our Executive Summary in order to enhance project execution efficiencies, LASC is proposing to locate our site offices adjacent to the work site. Please refer to Exhibit 12 and LCP Proposal Clarification #111.

7. Contractor Project Management Staffing: LASC's proposal is based on LASC being solely responsible for the complete control of the required project management staff, including staffing roles and numbers to adequately manage the work of CH0031.

8. Concurrent delay [sections 1.2 (m) (F) and 31.3] – These clauses eliminate schedule and cost relief for concurrent delays. LASC takes exception to this clause and, in light of the structure of our commercial proposal, requires further discussion with Nalcor with respect to what delays are subject to schedule and/or cost relief for LASC.

9. Performance Security [section 7.0 and Exhibit 2] – LASC's proposal does not include the provision of either letters of credit or parent guarantees. LASC has submitted bonding rates only, the costs of which are not included in the Fixed Price portion and shall be an extra cost should Nalcor elect to secure bonds from LASC.

10. Standard of a Prudent Contractor [section 1.2(lll) and used throughout agreement in multiple places] – In light of the structure of our commercial proposal, LASC does not consider this term to be applicable and its use should be deleted throughout the agreement.

11. Document priority [section 1.12] – Since the Exhibits are more specific and precise than the Articles of the agreement, conflicts between the Exhibits and any Articles of the agreement should be decided in favour of the Exhibits.

Comment [PB1]: We are looking for a CONTRACTOR the y seem to want to fill the role of a project manager … which we are doing ourselves

Comment [PB2]: What would this change order address? The cost of materials only?

Comment [PB3]: This is now 9.4 ensure they are looking at the Site Conditions provided with Addendum 15

Comment [PB4]: Technical

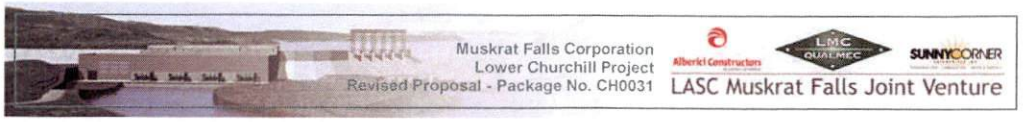
Comment [PB5]: Not acceptable in any event. We need influence on their team. In a reimbursable model what they are stating is completely off

Comment [PB6]: We will not accept alterations to these clauses

Comment [PB7]: Unacceptable

Comment [PB8]: Unacceptable

Comment [PB9]: Not acceptable. Must deal with specific concerns now.



12. Holdbacks [sections 12.16, 25.6 and 25.12, and Exhibit 2] – LASC excludes all holdbacks (both Mechanics' Lien and for Engineer acceptance of document deliverables) and includes a holdback release bond to be issued for the benefit of Nalcor in lieu of the Mechanics' Lien holdback.

13. Warranty [sections 7.4(f) and Article 17] – LASC has only included a one-year warranty from Substantial Completion. As LASC is not providing design, a "fit for purpose" and "fit for intended use" warranty is not applicable. Further discussion is required with respect to reimbursement of costs incurred for performance of warranty work by LASC.

14. Company instructions and information [sections 10.2 and 37.4] – LASC is strictly relying on the fullness and accuracy of any instructions and information provided by Nalcor and its representatives to perform its work. As such, the disclaimer of responsibility in the last sentence is not applicable.

15. Compensation and payment terms [Article 12]

    a. LASC's proposal is based on PLA labour being invoiced monthly in advance of the work being performed, with a reconciliation of actual labour cost being made on the subsequent invoice. For greater clarity, LASC proposes to estimate the cost of labour to be performed in the month and invoice for the estimated labour at the beginning of the month. It will execute the work during that month and at the end of the month it will prepare an invoice for the next month. Each subsequent invoice will include a reconciliation of estimated versus actual labour cost from the prior month. LASC's proposal is based on payment terms of net 30 days from the invoice date.

    b. LASC proposal is based on Price Items 9501, 9502, 9504 and 9505 shown in Appendix A2.1 being invoiced on a monthly basis pre-rata on the amount of PLA labour expended.

    c. In addition, the LASC proposal is based on a mobilization upfront payment payable 30 days after contract award in the amount of $15,000,000+HST, and an additional payment of $5,000,000+HST on the date of mobilization to site.

16. Project insurance [Article 20] – The Construction All Risk insurance needs to cover the cost of the entire project and not just the value of LASC's contract. LASC will take responsibility for the first $25,000 of deductibles for the insurance coverages provided by Nalcor and will provide property in transit coverage with a $25,000 deductible. The balance of any deductibles in excess of $25,000 for the insurance coverages provided by Nalcor will be the responsibility of Nalcor.

17. Indemnities [sections 5.8, 9.3, 13.10, and Article 21] – In light of the structure of our commercial proposal and the Nalcor-provided project insurance, these multiple indemnity provisions require further discussion as LASC is only prepared to provide an indemnity for bodily injury and property damage resulting from its negligent acts.

18. Consequential damages [section 21.14] – The current waiver is only for the benefit of Nalcor. LASC will require a mutual consequential damages waiver.

19. Transportation routes/site logistics and utilities [Article 22] – As currently drafted, the risk for these items lies solely with Contractor. Further discussion is required as site roads and utility connections are Nalcor's responsibility and problems with off-site roads should be subject to Force Majeure provisions.

20. Change order [Article 26] provisions – LASC takes exception and is prepared to discuss change order procedure and related mark-ups. LASC suggests using a change order directive procedure with reasonable markups.

Comment [PB10]: Have to look into the suitability of this. Not sure there has been much experience. Will likely require an LOC for this purpose.

Comment [PB11]: We will require a 3 year warranty

Comment [PB12]: Design is included so this will be required

Comment [PB13]: May agree to slight alteration but not removal

Comment [PB14]: Could be workable so long as we have the right to challenge the estimate. Also would mean there is no type of up-front payment for labour

Comment [PB15]: We normally link up fron payments to the delivery of something. Because of the importance of the schedule for this one I would be inclined to link it to an approved schedule and delivery of performance security.

Comment [PB16]: unacceptable

Comment [PB17]: deal killer

Comment [PB18]: acceptable

Comment [PB19]: believe this a adequately dealt with. Contractor is responsible to plan logistics nad materials delivery based on the nature of the worksite

Comment [PB20]: Unacceptable: These provisions remain materially intact or deal killer.

21. Force Majeure [section 22.7 and Article 31] – LASC suggests the definition of Force Majeure be more comprehensive (i.e. all events/conditions beyond the reasonable control of a party), including but not only limited to the items identified. Also, relief should be granted for (i) all strikes and other potential labour disputes or disruptions and not limited to just "national" issues, and (ii) weather conditions beyond what is agreed to be assumed throughout the course of the project. Consideration should also be given to explicit relief for First Nations issues.

22. Default/termination [Articles 32 and 33] – LASC needs further clarification of what Nalcor intends to constitute an "event of default" and requires a reasonable cure period for any such defaults by LASC. Further, in light of the fact LASC has multiple member companies, any default (such as insolvency) by one of the members shall not be considered a default unless the non-defaulting members fail to or are not capable of completing the remaining work on their own. Also, LASC requires the right to stop its work for non-payment by Nalcor after a reasonable notice and cure period, all of which will not be subject to further cure periods by any project lenders.

23. Termination for convenience [section 32.6(c)] – In the event of a termination for convenience, LASC expects to be paid its costs for work performed prior to termination, plus demobilization expenses and any cancellation charges, plus overhead and profit on those amounts.

24. Liquidated Damages [Article 36 and Exhibit 2] – In consideration of the Effective Date concept and the proposed compensation model, these provisions will require further discussion.

25. Project schedule - LASC's project schedule will incorporate float on individual tasks as is prudent and necessary, including for the weather conditions that are typical for this site location. LASC will own, control and manage this float as a tool in the execution of the CH-0031 contract to ensure that it meets its commitments on timely delivery. Abnormal weather conditions have not been considered in the development of our proposed schedule.

26. Throughout the agreement and exhibits, "at Contractor's sole expense", "at Contractor's cost", "Contractor shall be responsible for all risks and costs", "without compensation to Contractor" and other similar phrases appear in various clauses. In light of the structure of our commercial proposal, the use of these phrases requires further discussion with Nalcor.

27. The schedule analysis provided by LASC in this proposal assumes an Effective Date of 01-Jun-16 and a 93 day notice period for mobilization. An Effective Date with a protracted notice period for mobilization would impinge on our ability to meet the Final Completion milestone. This requires further discussion.

28. Being that the time period between Award and site mobilization is now undefined, all costs associated with additional handling and storage of material and/or equipment to accommodate a protracted mobilization will be a contract Change.

29. A protracted delay between Award and mobilization may require LASC to, at its sole discretion, maintain a minimum Post-Award project team (planned to be located in St. John's), and all such costs would be captured in the Reimbursable Portion of our proposed compensation model, but would not require a contract Change.

30. LASC is not guaranteeing 100% coverage of every position at all times during the project.

31. All costs associated with changes to the Project Labour Agreement will be a contract Change.

32. LASC takes exception to Article 30 – Assignment. This clause requires discussion in order to achieve mutual agreement.

33. LASC recommends that its proposed warehouse structure should be built in advance of its full mobilization, for greater efficiency. Therefore release on this work may need to be treated as an exception in terms of the Effective Date.

Comment [PB21]: No. they need to plan

Comment [PB22]: We will only execute an agreement with 1 party not a JV.. Inter JV workings are not particularly of interest to us. Not sure the concern.. The Articles seem pretty clear and include notice period.

Comment [PB23]: With the exception of 'Cancellation Charges [undefined]' ,based on my understanding this is all of these items are addressed.

Comment [PB24]: Technical

Comment [PB25]: We will not accept a scenario where the contractor is without risk.

Comment [PB26]: They need to explain this since we have not pinned the end date.

Comment [PB27]: No.. Contractor doesn't start mobilization until they receive notice.

Comment [PB28]: No.. see comment on 28

Comment [PB29]: They need to explain this comment

Comment [PB30]: Agreed they will result in adjusted labour costs which may increase or decrease the target cost.

Comment [PB31]: To provide their specific exceptions to the Article

Comment [PB32]: No

34. LASC's proposal has United States dollars included at an exchange rate of 1.39154 USDCAD. Upon award, the USD component will be adjusted at the prevailing exchange rate on the date of award.

35. LASC's proposal is based on full release to procure material and equipment on Award. Costs associated with delay in release to procure material and/or equipment will be a contract Change.

36. PLA labour hours expended in the execution of scope covered by LASC's Cash Allowances are not included in the Target Hours.

37. WARRANTY. Amec Foster Wheeler Americas Limited, a subcontractor to LASC, warrants that it shall perform the Services with the standard (the "Standard") of care, skill and diligence expected, at the time and place of performance, of recognized professional engineering firms performing services of a similar type and nature. No other warranty, express or implied, is made or intended by this Agreement, by furnishing oral or written reports of findings made, or by any other act of Amec Foster Wheeler Americas Limited . Amec Foster Wheeler Americas Limited shall re-perform, at no additional cost to LCP, any Services that do not meet the Standard, provided that Amec Foster Wheeler Americas Limited shall be notified of such failure to meet the Standard within one year after the date the last of the Services are performed, abandoned or terminated, whichever shall occur first. LASC and Amec Foster Wheeler Americas Limited liability, responsibility and obligations, and LCP's sole remedy, for Amec Foster Wheeler Americas Limited failure to meet the Standard or for any errors or omissions in the performance of the Services shall be limited to such re-performance. Notwithstanding any other provision of this Agreement, LASC and/or Amec Foster Wheeler Americas Limited shall not in any way be responsible or liable for any performance or process guarantees of any kind.

Comment [PB33]: To provide full details on the proposed currency adjustment mechanism and how it applied to rates and prices.

Comment [PB34]: No

Comment [PB35]: They have to roll them in

Comment [PB36]: The standard of a prudent contractor and warranties set out in the Articles will apply to the 'Work ' various warranties will not be set out for each of their subs.

If yes to any of these, reference appropriate Health and Safety manual section(s).	2	4	1.6	Yes documents provided in H&S Manual	0	0	Bidder answered no	0	0	Bidder answered at client request and did not provide any documentation
4.9 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a drug and alcohol program? If "Yes", does it include the following? Pre-employment testing; testing for cause; post incident testing; formalized arrangements with a collection and testing agency (if "Yes", provide testing agency information); does your drug and alcohol policy follow the guidelines as laid out in The Canadian Model for Providing A Safe Workplace – Alcohol and Drug Guidelines and Work Rule Version 2 – Effective October 1, 2010? If yes to any of these, reference appropriate Health and Safety manual section(s).	3	4	2.4	Yes documents provided in H&S Manual	3	1.8	Documents provided, Sec 15 of H&S Manual. Bidder answered no to pre-access testing	2	1.2	Bidder stated they have a program but it does not meet the Canadian Model
4.10 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Equipment (Tools, Supplies, Machinery and Sanitary Facilities): Do you have a written list of equipment requiring pre-use inspections? Do you have a documented list of equipment requiring scheduled servicing in accordance with manufacturer's recommendations, legislated requirements, and industry standards? Is frequency of equipment inspections and maintenance identified? Are corrections of deficiencies documented? Do you have follow-up mechanism for corrective actions? If yes to any of these, reference appropriate Health and Safety manual section(s).	4	4	3.2	Yes documents provided in H&S Manual	4	3.2	Documents provided, Sec 7 and 9 of H&S Manual	4	3.2	Documents Provided. Sec 13 of H&S Manual
4.11 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Orientation Program: Do you have a health and safety orientation program? Does the program include new, transferred and temporary workers? Does the program provide instruction on the following: employer health and safety responsibilities; employee health and safety responsibilities; obligation to refuse imminent danger work; progressive discipline policies and procedures; safe work practices and/or procedures; emergency response procedures; first-aid procedures; incident/near miss reporting; does you orientation program include a quiz? If yes to any of these, reference appropriate Health and Safety manual section(s).	5	4	4	Yes documents provided in H&S Manual	4	4	Documents provided, Sec 8 of H&S Manual	4	4	Documents Provided. Sec 14 of H&S Manual
4.12 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Incident Investigation: Do you have a written procedure for incident reporting and investigation?; Do you utilize a root cause determination process such as "Tap-Root"? If yes to any of these, reference appropriate Health and Safety manual section(s).	5	4	4	Yes documents provided in H&S Manual	4	4	Documents provided, Sec 10 of H&S Manual	4	4	Documents Provided. Sec 18 of H&S Manual
4.13 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have an emergency response plan related to activities and specific locations? If yes reference appropriate Health and Safety manual section(s).	4	4	3.2	Yes documents provided in H&S Manual	4	3.2	Documents provided, Sec 11 of H&S Manual	4	3.2	Documents Provided. Sec 19 of H&S Manual
4.14 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a policy pertaining to prohibited items on (e.g. knives, firearms)? Are all employees made aware of the prohibited items policy and is it enforced? If yes to any of these, reference appropriate Health and Safety manual section(s).	1	4	0.8	Yes documents provided in H&S Manual	0	0	Bidder answered no	0	0	Bidder answered no

Health and Safety										
4.15 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you make reference to following legislative requirements where work is being performed?; violence policies and procedures; harassment policies and procedures. If yes to any of these, reference appropriate Health and Safety manual section(s).	1	4	0.8	Yes documents provided in H&S Manual	4	0.8	Documents provided, Sec 5 of H&S Manual	4	0.8	Documents Provided. Sec 21 of H&S Manual
4.16 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Do you have a policy or specific rules with respect to the use of personnel protective equipment (PPE)? Do you have a formal process in place for determining PPE requirements? If yes to any of these, reference appropriate Health and Safety manual section(s).	3	4	2.4	Yes documents provided in H&S Manual	4	2.4	Documents provided, Sec 6 of H&S Manual	4	2.4	Documents Provided. Sec 12 of H&S Manual
4.17 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Contractor Management: Do you pre-qualify subcontractors?; Do you include subcontractors in: orientations, health and safety meetings, inspections, audits. If yes to any of these, reference appropriate Health and Safety manual section(s).	5	4	4	Yes documents provided in H&S Manual	4	4	Documents provided, Sec1 of H&S Manual	4	4	Documents Provided. Sec 1.6 of H&S Manual
4.18 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Communications: Do you inform employees and subcontractors on Health and Safety alerts, programs, practices, procedures, rules, revisions and related information ? Do you have a joint Health and Safety committee? Do you hold scheduled safety meetings, such as weekly general safety meetings for all crew and weekly departmental meetings for each department at all worksites? Are Health and Safety meeting minutes and attendance recorded? If yes to any of these, reference appropriate Health and Safety manual section(s).	5	4	4	Yes documents provided in H&S Manual	4	4	Documents provided, Sec8 of H&S Manual	4	4	Documents Provided. Sec 3 of H&S Manual
4.19 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your Health and Safety program outline the requirements for supervisors and employees to conduct regular Health and Safety inspections of equipment and work conditions at all worksite(s)? If yes reference appropriate Health and Safety manual section(s).	3	4	2.4	Yes documents provided in H&S Manual	4	2.4	Documents provided, Sec 1 & 9 of H&S Manual	4	2.4	Documents Provided. Sec 17 of H&S Manual
4.20 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Does your Health and Safety program require the prompt reporting of hazardous conditions at all worksite(s)? If yes reference appropriate Health and Safety manual section(s).	5	4	4	Yes documents provided in H&S Manual	4	4	Documents provided, Sec 10 of H&S Manual	4	4	Documents Provided. Sec 1.6 of H&S Manual
4.21 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Health and Safety Training: Have your employees received the required Health and Safety training and retraining? Do you have a specific Health and Safety training program for supervisors? If yes to any of these, reference appropriate Health and Safety manual section(s).	3	4	2.4	Yes documents provided in H&S Manual	4	2.4	Documents provided, Sec 1 & 8 of H&S Manual	4	2.4	Documents provided
4.22 HEALTH AND SAFETY SUPPLEMENTARY QUESTIONS - Training Records: Do you have Health and Safety training records for your employees? How do you verify competency of the training (job monitoring? written test? competency check? oral test? other?). Are all training records available upon request? If yes to any of these, reference appropriate Health and Safety manual section(s).	3	4	2.4	Yes documents provided in H&S Manual	4	2.4	Documents provided, Sec 8 & 14 of H&S Manual	4	2.4	Records are available on site

Quality Questionnaire Questions	Weight	Max Score	Bidder 1			Bidder 2			Bidder 3			Bidder 4			Bidder 5			Bidder 6		
			Alberici/LMC/Sunnycorner - Joint Venture			Black & McDonald Limited			Cahill/Ganotec - Joint Venture			N/A			N/A			N/A		
			Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments	Score	Weighted Score	Comments
1ii) Bidder's quality policy statement and list of current quality objectives.	0.2	5.0	4.0	0.16	Quality policy provided but quality objectives only listed in TOC of manual.	4.0	0.16	Statement of commitment to the quality management system is OK to cover the quality policy but it relates to their Nuclear manual and no quality ojectives clearly identified.**Scoring has been revised because of objective evidence provided by the bidder during the pre-award audit performed by LCP on 27-April-2016 (The bidder provided a draft copy of there Quality Management System Manual, the bidder is currently in process of getting there ISO certification for Eastern Canada, the new QMS has a quality policy and objectives).**	4.5	0.18	Quality policy and list of quality objectives provided as requested.	0.0	0.00		0.0	0.00		0.0	0.00	
1iii)Bidder's Master Documents List or the Table of Contents of your policy and procedures manual.	0.5	5.0	4.0	0.40	TOC of their quality manual provided.	4.0	0.40	TOC for their N286 Nuclear manual provided and a list of management system documents provided.	4.5	0.45	TOC and quality manual provided, well defined.	0.0	0.00		0.0	0.00		0.0	0.00	
1iii) Bidder's current Internal / External Audit Schedules.	1.0	5.0	4.5	0.90	Copy of their internal and external audit schedule provided as requested, well defined.	1.0	0.20	Audit schedule provided but it is only for Nuclear work in Ontario for 2015 and doesn't include any other projects outside of Nuclear, no evidence of other audit to be performed internal or external.	4.5	0.90	Audit schedule provided for 2014, covers internal and external audits.	0.0	0.00		0.0	0.00		0.0	0.00	
1iv)Bidder's third party ISO 9000 registration, if available.	0.5	5.0	4.5	0.45	ISO certification provided for all 3 companies, expiry date is 05-July-2016 for the lead quality system (Alberici) to be used during construction phase.	3.0	0.30	Contractor is not ISO certified.**Scoring has been revised because of objective evidence provided by the bidder during the pre-award audit performed by LCP on 27-April-2016 (The bidder provided a draft copy of there Quality Management System Manual, the bidder is currently in process of getting there ISO certification for Eastern Canada, the bidder is ISO certified in other provinces).**	4.5	0.45	ISO certification provided, expiry date is 07-Mar-2017.	0.0	0.00		0.0	0.00		0.0	0.00	
1v) Most Recent Management Review Minutes of Meeting.	1.0	5.0	4.0	0.80	Management review meeting minutes provided, some minor concerns listed.	1.0	0.20	Management review meeting minutes provided for 2013, which covers Nuclear only from what I can tell, the minutes indicate some minor quality issues from the performance and operations managers, no details on any other projects provided.	3.5	0.70	Management review meeting minutes provided, some concerns listed regarding documentation issues.	0.0	0.00		0.0	0.00		0.0	0.00	
1vi) If ISO 9001:2008 registration is held, a copy of last third party surveillance report.	0.3	5.0	4.5	0.27	Third party audit report provided, audit results indicate fully compliance, no actions required.	3.0	0.18	Contractor is not ISO certified, so no third party audit report available.	4.0	0.24	Third party audit report provided, some areas of concern identified and require actions.	0.0	0.00		0.0	0.00		0.0	0.00	
2) Briefly describe any processes employed to plan the activities related to the requested products / services. If available, provide typical examples of Quality Plans and / or Inspection and Test Plans.	0.4	5.0	4.5	0.36	Bidder provided detailed quality plan and a detailed ITP as requested, bidder also performs a project Startup meeting with all project areas present, well defined information provided.	4.0	0.32	Bidder provided a very detailed quality plan and completed ITP but they are again related to Nuclear only.	4.0	0.32	Bidder indicates that if a quality plan/ITP is required they will develop, a sample quality plan and ITP template only have been provided.	0.0	0.00		0.0	0.00		0.0	0.00	
3) Describe how this work relates to the total annual productive capacity of Bidder's company and that of Bidder's main suppliers.	0.5	5.0	4.0	0.40	Bidder indicate that they have ample capacity and resources throughout Atlantic Canada, elsewhere in Canada and the USA if required.	4.5	0.45	Bidder identified that the annual capacity in less then 10% and is mostly construction labour, main supplier's have confirmed no issues.	3.5	0.35	Bidder provided limited information on capacity, they only indicated that the work is well within their capacity.	0.0	0.00		0.0	0.00		0.0	0.00	
4) Briefly describe the processes used to control the design of the products / services to be supplied. Include references to the following processes: • Design Planning • Design Review • Design Verification • Design Validation • Design Changes	1.0	5.0	3.0	0.60	Bidder doesn't perform design work, design will be sub contracted.	3.0	0.60	Bidder doesn't perform design work, design will be sub contracted.	3.0	0.60	Bidder doesn't perform design work, design will be sub contracted.	0.0	0.00		0.0	0.00		0.0	0.00	
5) Briefly describe the Bidder's Supplier / Sub-contractor selection process and any processes employed to monitor continued performance against contract requirements. In Bidder's response include a list of any services associated with the scope of work that would be sub-contracted out and where appropriate, the contract details for that Sub-Contractor.	1.0	5.0	3.5	0.70	Bidder provided well detailed response to support supplier and subcontractor selection, monitoring, which included identifying procedures that are used but no copies of the procedures have been provided fro reference.	3.0	0.60	Bidder has a process in place for an approved supplier list which is covered in the Nuclear manual, they indicated that have a procedure BM- PROC-028 Approved Supplier List but it was not provided as identified in the questionnaire.	4.0	0.80	Bidder provided a well defined procedure that covers all areas of sub contracted work.	0.0	0.00		0.0	0.00		0.0	0.00

6) What techniques does the Bidder employ to verify that the product / service have been delivered appropriately and in accordance with the contract requirements? What verification records are generated?	0.4	5.0	4.0	0.32	Bidders project management is responsible to ensure materials are received per procedure ACL7004 (Material receiving, inspection, handling and Storage), PM responsible for PO and delivery log per procedure ACL0407 to track deliveries, material inspected per PO requisition and BOL, receiving reports are completed.	4.0	0.32	Bidder covers the following in their Nuclear manual, project planning execution & control, work planning, generate & control of ITP's. They also identified verification records, inspection reports, NCR's, cal records, pressure test reports etc.., they also provided procedure BM-PROC-14 Work Planning , procedure BM-PROC-015 Control of ITP's.	4.0	0.32	Bidder performs inspection/testing upon receipt, materials/components are not used until inspected, in-process and final inspections are performed, records are filed according to written procedure.	0.0	0.00		0.0	0.00		0.0	0.00	
7) Briefly describe the Bidder's records retention system and the normal records retained (or supplied to the client) as part of this **product / service** delivery. Bidder's response should make reference to records such as Material Test Reports, Non-destructive examination records, in process inspections and Factory Acceptance tests.	0.2	5.0	4.0	0.16	Bidder has a document control master list, project records are maintained per procedure ACL7022, PM/QM ensure records are controlled, project records are kept for 12 years, did not listed any type of records as requested.	4.0	0.16	Bidder provided a procedureBM-PROC-023 Project Turnover which indicates that records will be filed permanently ??, they also listed records to be filed MTR's, NDE records, inspection reports, ITP's etc..	3.5	0.14	Bidder didn't provide details to the question but did provided a detail procedure for the control of records, they did not list type of records as requested.	0.0	0.00		0.0	0.00		0.0	0.00	
8) What processes does the Bidder employ to ensure that inspection is performed and Measuring and Test Equipment is fully calibrated and functioning appropriately?	0.5	5.0	3.5	0.35	Project manager/foreman ensure compliance of measuring/test equipment, controlled by procedure and documented evidence, QMS indicates required calibration, procedure controlled by procedure ACL7003.	4.5	0.45	Bidder provided a detailed procedure BM-PROC-019 for Control of Measuring and Test equipment.	3.5	0.35	Bidder has measuring, testing,calibration covered in section 7.5 of their QMS manual but no other information provided in response.	0.0	0.00		0.0	0.00		0.0	0.00	
9) When products / services do not meet requirements, what processes are employed to ensure timely resolution of the problem? If so, what records of the problem and solution are generated?	0.2	5.0	4.0	0.16	NCR process in place to cover all non conforming conditions, process well explained, NCR forms, NCR log, quality manager responsible for closure.	4.5	0.18	Bidder provided a detailed procedure BM-PROC-039 called Problem Identification & Resolution which identifies the control of non conformances.	3.5	0.14	Bidder provided procedure which included flows charts but no response to the question provided.	0.0	0.00		0.0	0.00		0.0	0.00	
10) Does the Bidder employ any continuous improvement processes or other methods to monitor evaluate and improve the quality of products / services provided? If so, briefly describe them. Include in your response details on the following: • Processes to monitor and measure effects of continuous improvement changes. • Processes for the evaluation and implementation of innovative and cost reduction ideas.	0.5	5.0	3.5	0.35	Bidder has a formal review of the QMS annually with senior management, recommendation for improvement are identified and unresolved issues are reviewed and finalized, quality objectives are established abd tracked, quality meetings held monthly.	3.0	0.30	Bidder indicated that continuous improvement is covered BM-MAN-001 Nuclear manual, there is a section with little information and no information provided in the questionnaire.**Scoring has been revised because of objective evidence provided by the bidder during the pre-award audit performed by LCP on 27-April-2016 (The bidder provided a draft copy of there Quality Management System Manual, the bidder is currently in process of getting there ISO certification for Eastern Canada, the new QMS covers continuous improvement).**	4.0	0.40	Bidder identified continuous improvement initiatives per internal audits, analyses of data, customer feedback, lessoned learned, CAR's and NCR's, their quality manual also has a section on continuous improvement.	0.0	0.00		0.0	0.00		0.0	0.00	
11) Does the Bidder employ any processes to monitor internal / external audit activities to ensure conformance to procedures? If so, briefly describe them.	0.5	5.0	3.5	0.35	Bidder indicates that an internal audit plan is developed by quality and planned audits will be performed, the QMS is audited annually, additional audits are scheduled for areas of concern, internal audit report are used as input to the Management Review Meeting, no audit procedure provided.	4.0	0.40	Bidder provided a detailed procedure BM-PROC-034 on their auditing process.	3.0	0.30	Bidder did not provided any details to the question, they did reference their quality manual which mentions audit process, no audit procedure provided.	0.0	0.00		0.0	0.00		0.0	0.00	
12) Briefly describe the Bidder's Training Policy and any controls used to ensure personnel are competent to perform their defined functions and responsibilities.	0.5	5.0	4.5	0.45	Well defined answer provided which included senior managers are responsible to ensure personnel are qualified and receive training in accordance with the QMS, quality manager ensures QA/QC is qualified and certified, training requirements are listed in the QMS manual, training is conducted under the direction of quality manager, employees shall receive training on all section of the QMS, unionized labour receive quality training prior to start of work, indoctrination is written or by video, subcontractors receive training related to their work, subcontractor performing QA/QC work will be trained on all sections of the QMS.	4.0	0.40	Bidder provided a detailed procedure BM-PROC-040 on training and qualifications.	4.0	0.40	Bidder has a training process covered in the quality management manual, trade workers are required to provide proof of competency prior to site access, staff will not pass probation period without education/training certificates.	0.0	0.00		0.0	0.00		0.0	0.00

****Proponent must achieve a minimum Total Weighted Score of 60 percent to be considered acceptable.**

Comments: (Overall impression of the Bidder and how the evaluation as it relates to the recommendation)

Bidder 1: Bidder is recommended but prior to award the bidder/joint venture will be audited including subcontractors to verify their quality management system implementation based on their bid documents. Note: Proposed Quality Manager has the experience and qualifications to meet LCP requirements (CSA 178.2 Level 2 Certified Welding Inspector, Certified ISO Internal Auditor and large construction project experience).

Bidder 2: Bidder is not recommended based on documented evidence provided related to their proposed new quality management system. The new information provided appears to focus mainly on the bidders Nuclear manual requirements for projects based on Ontario's Nuclear industry. The new information including procedures provided is completely different from the first submittal on their proposed quality management system. LCP quality is very concerned whether the bidder actually has a quality management system that they are currently implementing on other projects similar to LCP SOW requirements based on the evidence provided, many of the answers provided had limited information with comments to refer to the Nuclear manual or procedures only, it is hard to determine if the bidder has a quality department/team in place and/or quality members are trained on the new quality management system proposed for implementation on the CH0031 SOW. Also the proposed Quality Manager is well experienced and has the qualifications to meet LCP requirements (CSA 178.2 Level 2 certified Welding Inspector, API Certified in many areas, CGSB Certification in RT/MT/PT) but appears to be currently working elsewhere and not employed by the bidder at this time which is concerning. LCP's intent is to approve bidders that currently have a quality management system in place based on ISO requirements, it is not the intent to approve bidders without a quality management system in place or to bidders that are trying to implement a new quality management system during the CH0031 SOW. In order for the bidder to meet LCP quality expectations the bidder would need to demonstrate their quality management system implementation to LCP based on a LCP detailed audit of a current or past project similar in nature to the CH0031 SOW prior to award. The audit shall be performed on a project that was completed by the bidder without joints ventures as proposed for the CH0031 SOW in the bid documents provided by the bidder, the project to be audited must have been completed with the intent of following ISO requirements in order to meet LCP expectations. The audit shall not be performed on a Nuclear project, the project needs to be similar to the CH0031 SOW. If the bidder is selected LCP will also audit the bidders proposed subcontractors as deemed necessary.
(Note: LCP's quality department performed a per-award audit on 27-Apr-2016, during the audit LCP was provided with objective evidence to support that the bidder has the capability to develop a Quality Management System to meet the project requirements.. The bidder also identified a new quality manager that currently works for the bidder and fully understands thier internal processes and procedures. Based on the new information provided during the pre-award audit the scoring has been revised to support that the bidder can be recommended as meeting the minimum requirements regarding their Quality management System and can be considered as passing the quality section of the bid proposal).

Bidder 3: Bidder is recommended but prior to award the bidder/joint venture will be audited including subcontractors to verify their quality management system implementation based on their bid documents. Note: Proposed Quality Manager has the experience and qualifications to meet LCP requirements (CSA 178.2 Level 2 Certified Welding Inspector and large construction project experience).

CH0031 Detailed Commercial Update – Interim Review

May 19, 2015

Boundless Energy

nalcor energy

General

- 3 Bids expire 15-July-2015
- All Bidders have been issued multiple commercial clarifications.
- Have another addendum planned with ~ 400 revised drawings, some revised specifications and revised site conditions.

nalcor energy

Bidder 1

Highlights

- Proposal not commercially compliant.
  - Pricing model proposed is fixed price for permanent materials, everything else reimbursable with markup
  - Have proposed very broad non-specific exceptions to Articles
  - Do not offer LOC or PCG as security.
- No cap on labour
- Bid Clar Mtg 4-June

Risks

- No incentive to perform well
- Have not waivered from price model when challenged
- Unlikely to agree to acceptable terms

nalcor energy

Bidder 2

Highlights

- Original proposal was not compliant
- After much clarification now close to compliance
- Many 'technical' exceptions with commercial implications
- Not offering LOC as security
- Few exceptions to Articles
- 50% labour contingency
- Bid Clar Mtg 21-May

Risks

- Price increasing as they become more compliant
- Will have trouble getting correct security
- If pushed too hard in negotiations they may withdraw

nalcor energy

Bidder 3

Highlights

- Proposal compliant
- Have been very responsive throughout bid clarification
- Have many exceptions to Articles however seem willing to negotiate
- Will provide LOC if required
- Company pays all of labour above TCL to LMAX
- 50%Labour contingency
- Articles discussion 8-Apr
- Bid Clar Mtg 28-May

Risks

- Negotiating acceptable T&C
- Proposed exceptions very change oriented
- Will become difficult to negotiate if we lose Bidders

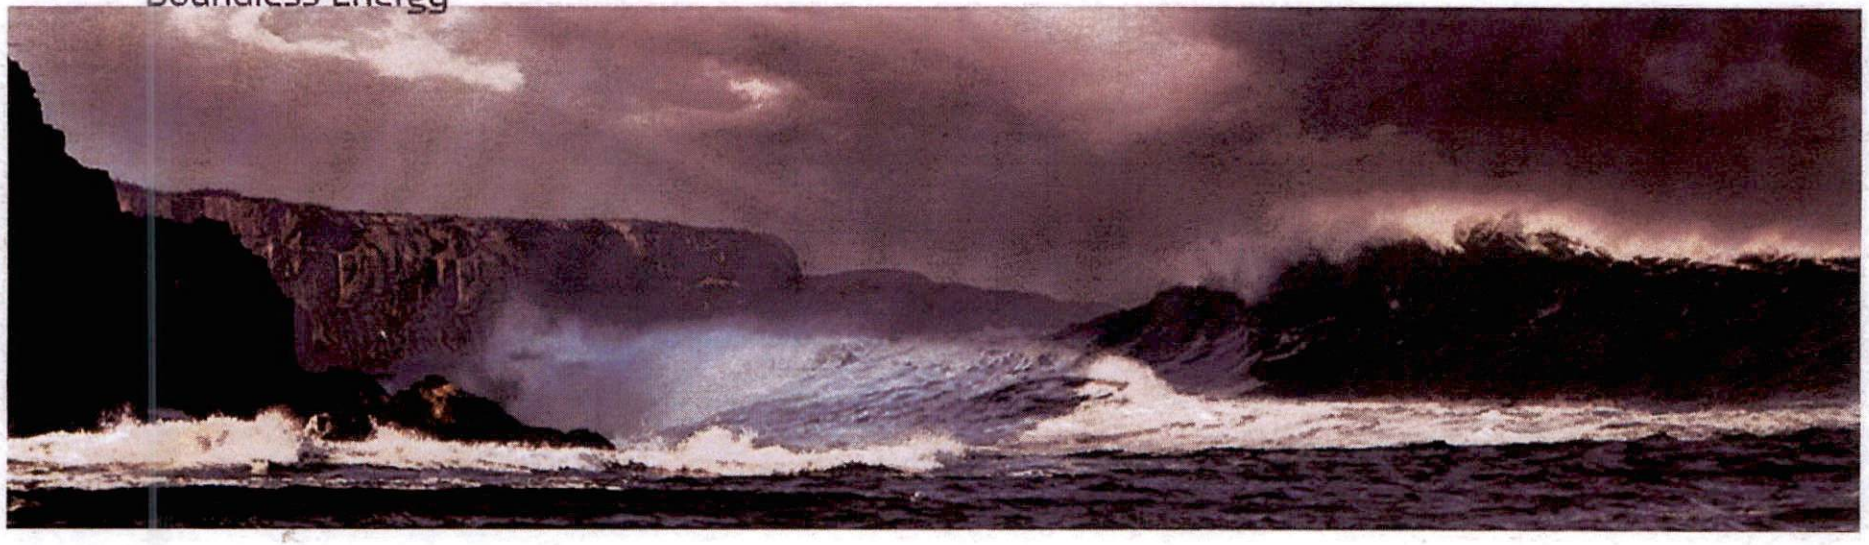
nalcor energy

Lower Churchill Project

CH0031 Detailed Technical Evaluation – Interim Review

May 19, 2015

Boundless Energy



nalcor energy

Interim Results – Prior to Bid Clarification Meetings

nalcor energy

Interim Scores – Technical Team

Criteria	Bidder 1	Bidder 2	Bidder 3
Quality (P>60%)	Pass (79%)	Fail (56%)	Pass (77%)
Risk Management (P>60%)	Pass (75%)	Pass (73%)	Pass (77%)
Health and Safety (P>70%)	Pass (79%)	Pass (76%)	Pass (76%)
Environment (P>60%) .	Pass (86%)	Pass (72%)	Pass (73%)
Technical	56%	32%	71%

nalcor energy

Bidder 1

Highlights

- Compliant with all RFP milestones
- Extensive execution plan
- Experience in Labrador
- Serious bidder

Risks

- Manpower and infrastructure requirements
- Proposal is for reimbursable engineering and commissioning
- Reluctant to name preferred sub-suppliers
- Experience of key personnel
- Schedule logic

nalcor energy

Bidder 2

Highlights

- Compliant with all RFP milestones
- Bidder has experience with similar scopes of work in Ontario
- Labrador experience

Risks

- Quality management system is a major concern
- Bidder's technical submission is very light on details
- Minimal execution plan
- Key personnel
- Is this bidder willing to support their proposal?

nalcor energy

Bidder 3

Highlights

- Compliant with all RFP milestones
- Good level of detail in Execution Plan
- Vast experience in Labrador and existing presence at MF Site.
- Few technical exceptions
- Serious bidder with existing offices in St. John's

Risks

- Reluctant to name preferred sub-suppliers
- Experience of key personnel

nalcor energy

Key items to be resolved

- Revised pricing on changes (~400 updated drawings)
- Submitted schedules – logic and line items
- Site conditions – trailers, warehousing, power, washcars, heat etc.
- PCS – Project Completions System
- Laydown areas and SSB space allocation
- GSU assembly expertise and work area
- Need to ensure experienced personnel
- Value Engineering – pricing and implementation
- Value substitutions recommend by bidders

Monthly Personpower Estimates

Schedule Export - CH0031

Note: Bidder 1 & 2 figures are from Original Bid Submission.
Bidder 3 figures are from Company Clarification/ Question response.

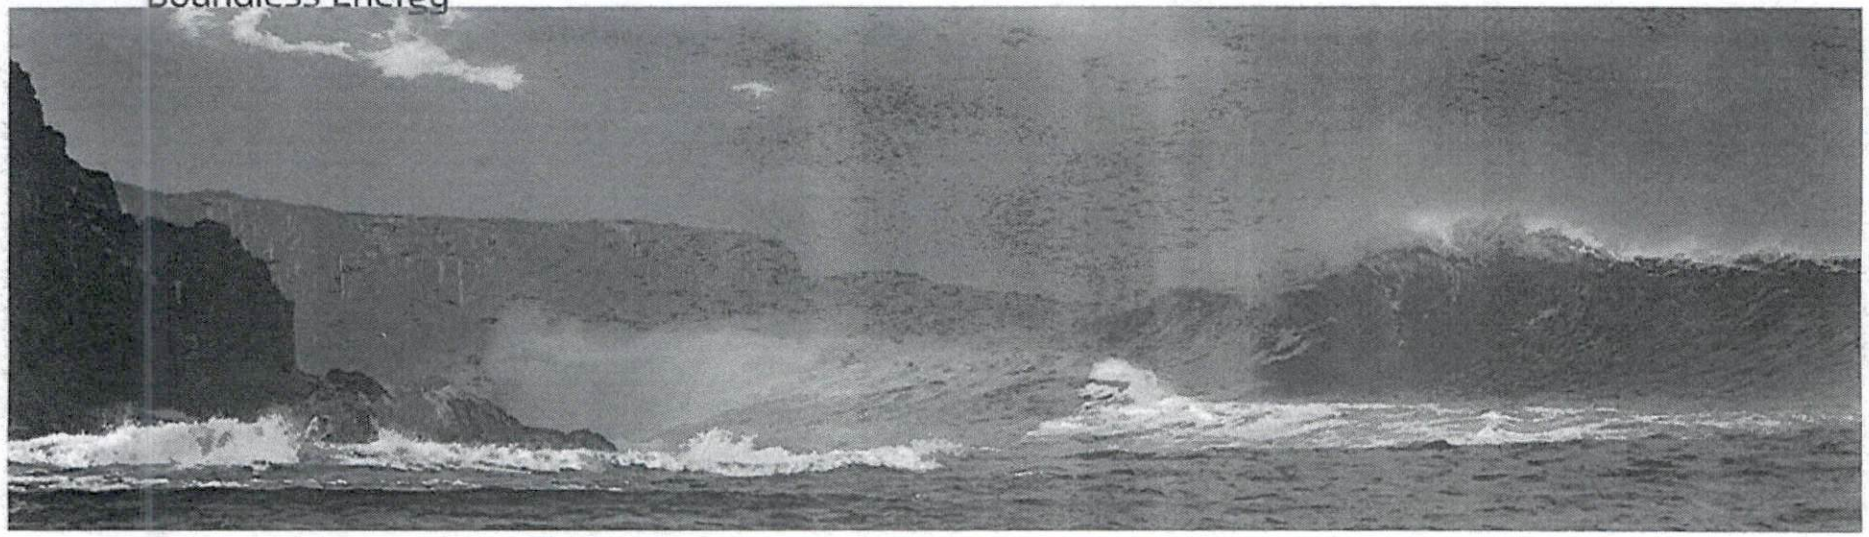
Lower Churchill Project
Package CH0031 Strategy Review
22-Oct-2015

Boundless Energy



nalcor energy
LOWER CHURCHILL PROJECT

CH0031 Package Status

- Bids closed 16Jan2015.
- Bid validities are good until 31Oct2015.
- All three bidders remain committed to bid; commercial and technical clarifications are ongoing.
- All three bidders have advised they cannot provide updated pricing until a new Exhibit 9 (Milestone Schedule) is issued.

CH0031 Strategy Review

- Package CH0031 team has been asked to propose optional package execution strategies for management consideration.
- Three options are considered and discussed.
- Key benefits, risks and estimated cost impacts are summarized.

CH0031 Execution Options

- **Option #1** – Status quo
- **Option #2** – Complete package breakup
- **Option #3** – Change orders to existing contracts

Option #1 – Status Quo

- Maintain current execution strategy.
- CH0031 Contractor executes the entire scope of work and may use company approved subcontractors.
- A request for a further extension of bid validities past Oct. 2015 will be issued.
- Bids will be validated against the revised Exhibit 9 Milestone Schedule when it is available.

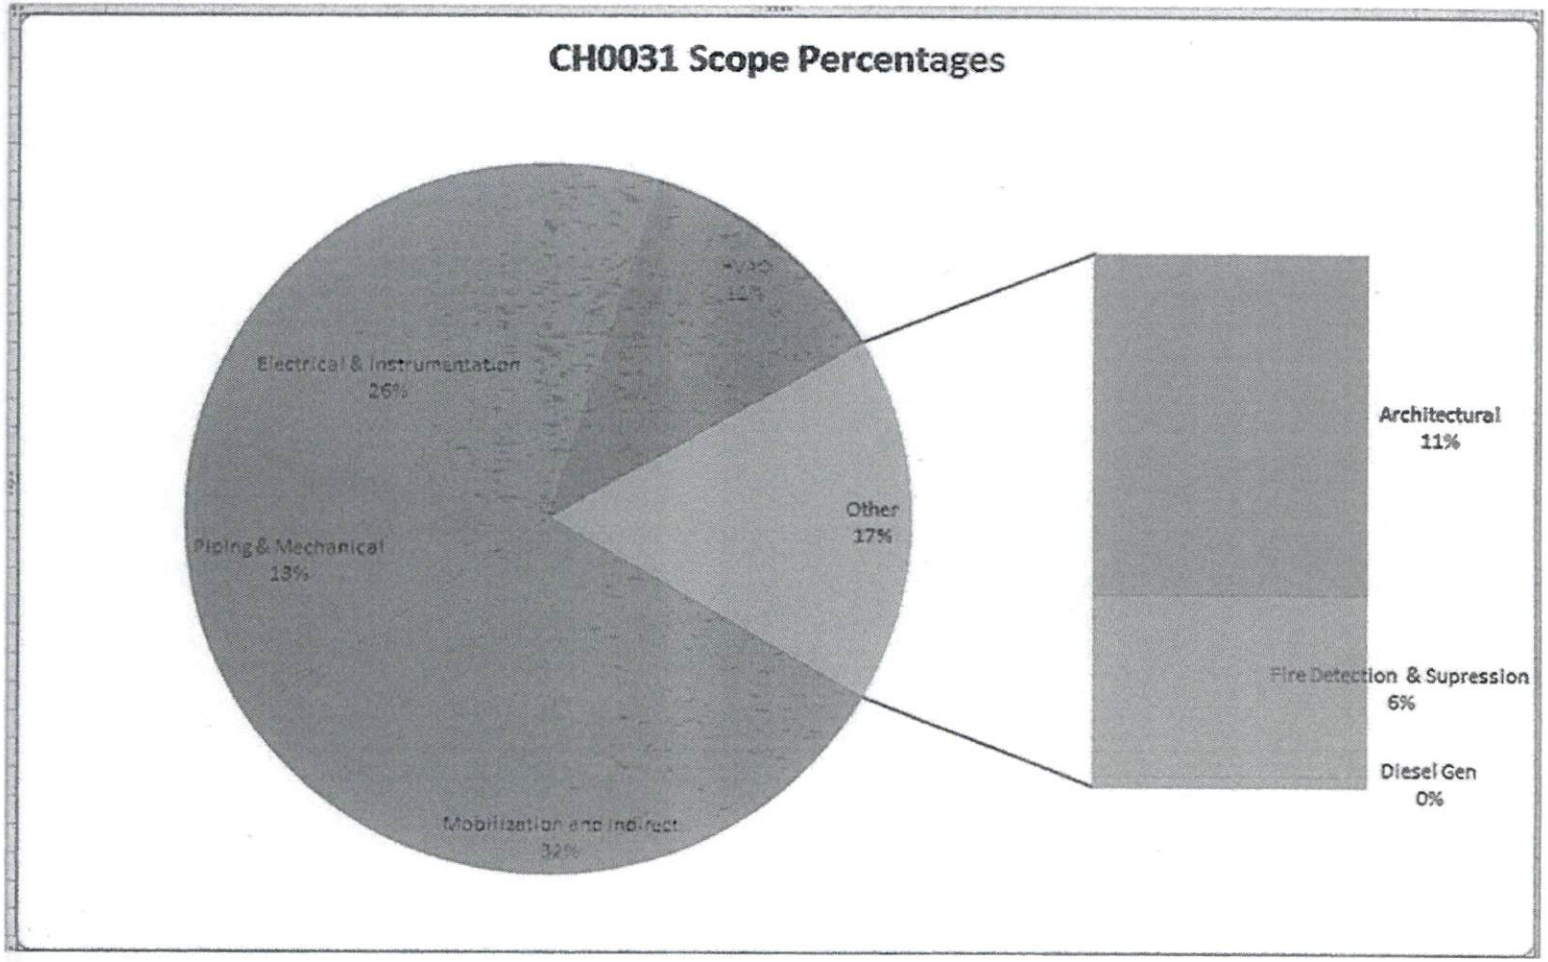
Option #1 – Benefits / Risks

Benefits	Risks
Significant progress already made in bid review process.	
Currently in a competitive bid situation with 3 bidders who are actively engaged.	
Single point of contact for interface management, coordination, project management, quality, safety and commercial items .	
Minimal congestion at site - no duplication of site services, construction equipment and tools, offices, storage and laydown areas.	
Minimal support staff required at site resulting in less accommodations and office space required.	
No change to MFL plan/budget.	

Option #2 – Complete Package Break-up

- Split up CH0031 (Piping, Electrical, HVAC, Architectural and Fire Detection/Suppression) and make each a new package.
- Each contractor will report directly to Company.
- Will require creation of new packages and support by Component 1 engineering to update engineering deliverables and verify scope divisions.
- Existing CH0031 RFP would be cancelled and rebid as 5+ new packages. RFP package documents will need to be updated by CH0031 package team with support from engineering. (Ballpark estimate 2500 eng hrs / 3-4 mths)
- 5+ new package RFPs will need to be created (3-4 mths). The task of executing the RFP process (9-12 mths) and the initial package management could be handled by the existing CH0031 package team but two additional CAs will be required.
- Additional site supervision will be necessary to manage

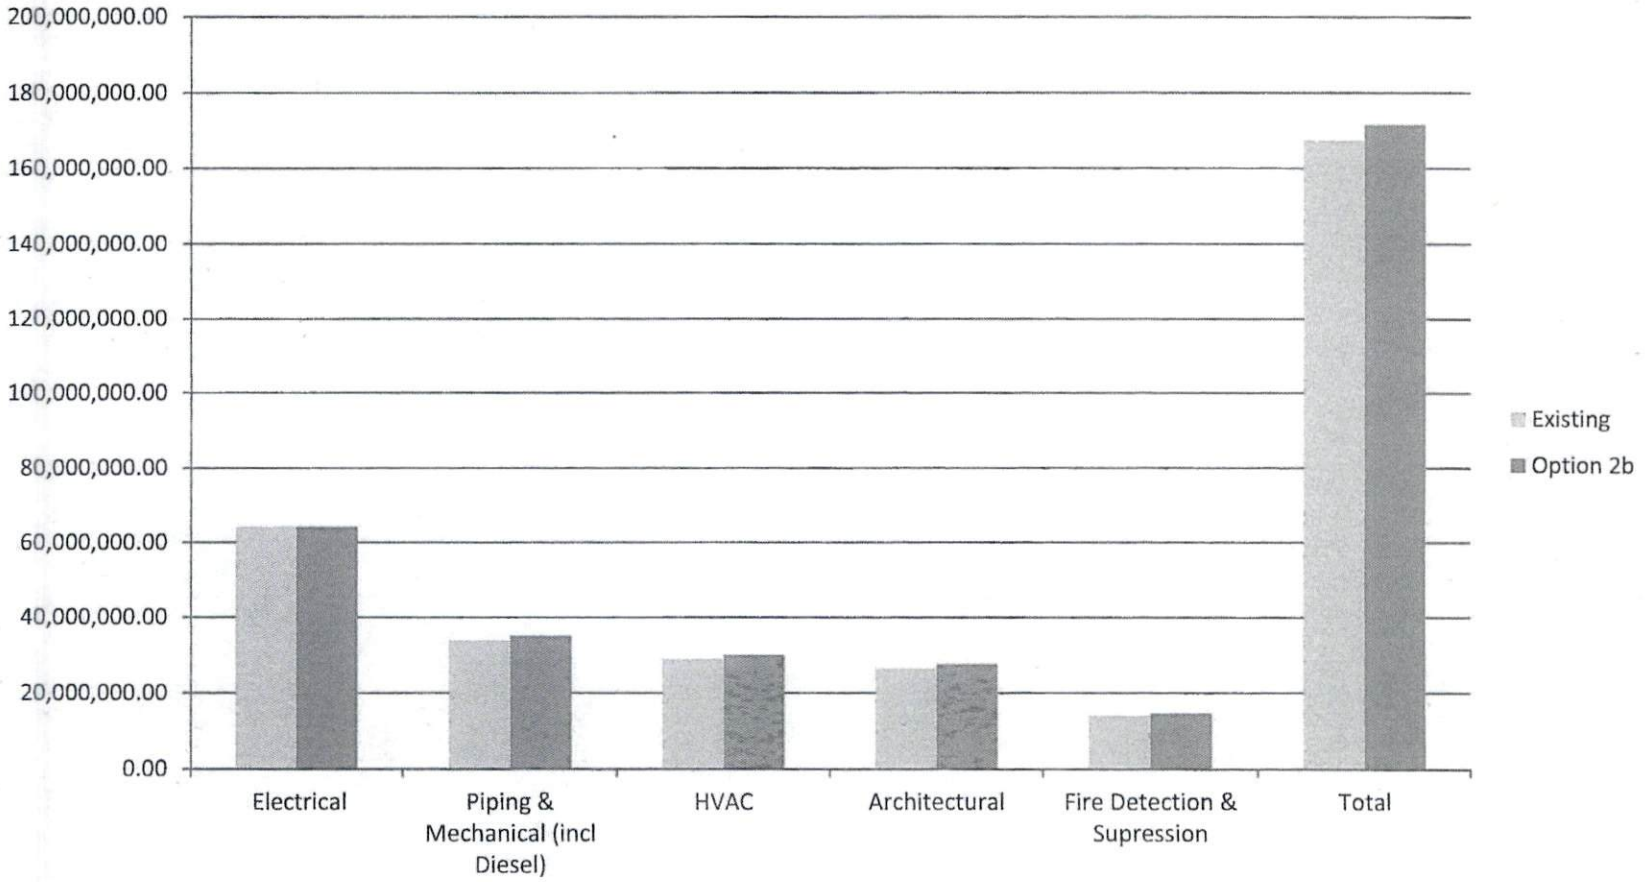
Option #2 – Complete Package Break-up



Option #2 – Benefits / Risks

Benefits	Risks
New packages will be competitively bid and there is the potential for a larger pool of bidders as scopes are single discipline and smaller.	The reduction in sub-scope markups will likely be outweighed by the duplication of mobilization and indirect costs.
	Interfaces and daily coordination of construction and commissioning efforts at the workfaces will be much more complex and difficult to manage by LCP.
	May lose 2 of our existing 3 bidders for main CH0031 scope if we rebid CH0031 package.
	Duplication of indirects – site infrastructure, admin, project management , QA etc., resulting in much additional congestion on site and additional supervision/management by LCP.
	Changes to Component 1 MFL plan/budget will be necessary to effectively manage
	Additions to supporting functions will be necessary to manage packages – Project Controls, QA, DCC, Contracts, etc.
	Bidders for new smaller packages may not meet our project QA, safety and environmental standards.

Option #2 Cost Summary



Option #2 – Cost Impact Breakdown

Item	Estimated Cost impact
Package Costs (5 packages)	+ $4,169,730
C1 Re-package/Engineering Costs	+ $338,000
Cost of additional CA(s) for 3 years	+ $1,762,500
Cost of support function personnel for 3 years (QA, DCC, Project Controls, etc.)	+ $1,489,500
Cost of additional site coordination	+ $ 1,750,000
Total	**+ $9,509,730**
Percentage increase from existing	**+ 5.7%**

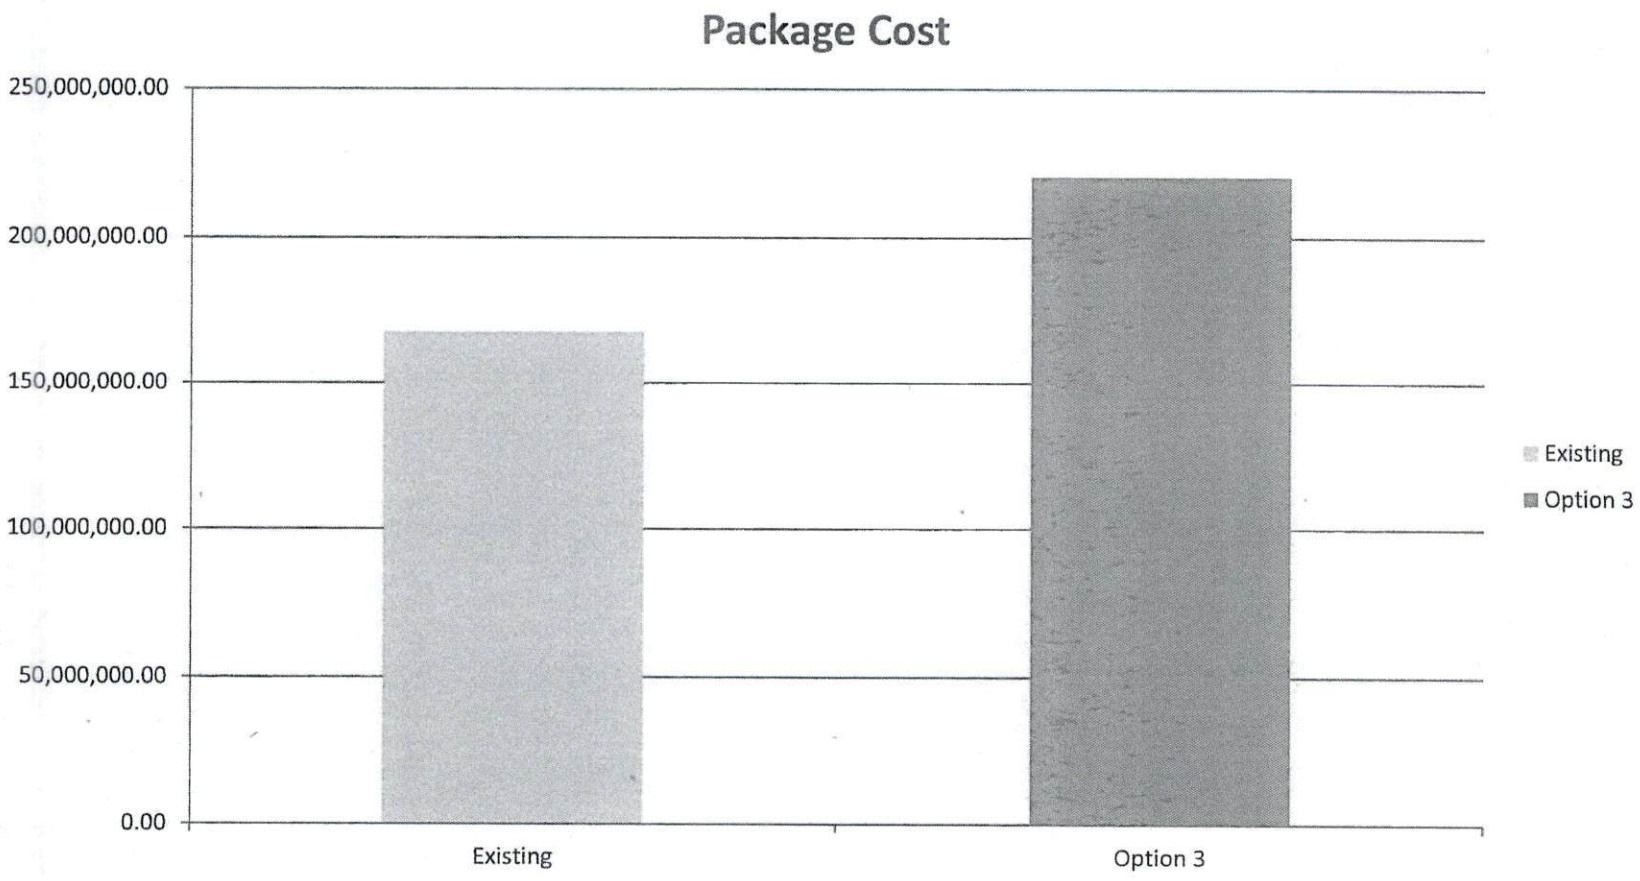
Option #3 – Change Orders to an Existing Contract

- CH0031 scope would be added to an existing contract at negotiated prices and possibly sub-divided.
- Existing contractors include Astaldi Canada & Andritz Hydro
- Existing CH0031 RFP would be cancelled.
- Any breakup of package CH0031 will require support from Component 1 engineering to update deliverables and verify scope divisions. The extent of the breakup and division will determine the resources required – i.e. if entire scope is given to Andritz, very few updates are required and this could be handled by the existing CH0031 package team.
- Support from existing Component 1 packages teams will be required.

Option #3 – Benefits / Risks

Benefits	Risks
Effort by CH0031 Package team to revise deliverables/scopes to suit this option would be minor assuming CH0031 scope remains whole.	Much higher cost due to reduced commercial negotiating power resulting from a non-competitive scenario.
No further CH0031 bid evaluation activities.	Existing contractors may have difficulties managing new scopes they are not familiar with.
No new contracts.	Existing contractors are having difficulties managing their current scope of work and this could make those situations worse.
	Existing Contractors may lack interest in cooperating with this approach and may engage the same bidders/subcontractors we are currently evaluating with similar markups and overall costs.

Option #3 Cost Summary



Option #3 - Cost Impact Breakdown

Item	Estimated Cost Impact
Package Cost	+ $52,703,000
C1 Re-package/Engineering Costs	+ $65,000
Cost of additional CA for 1 year (assume part time)	+ $150,000
Cost of support function personnel for 1 years (QA, DCC, Project Controls etc.)	+ $66,000
Total	**+ $52,984,000**
Percentage increase from existing	**+ 31.7%**

Summary of Options

	Option 1	Option 2	Option 3
Description	Status quo	Complete break-up	Change orders to existing contracts
Additional Cost vs Option 1	-	$9,509,730	$52,984,000
% Increase	-	5.7%	31.7%
Risk level vs Option 1	-	higher	higher

Recommendation

- The quantitative analysis of the three options presented indicates that the existing CH0031 package strategy (Option 1) is the lowest cost and lowest risk option.
- It is recommended that the existing CH0031 package strategy be maintained.

Discussion and Questions

Sharing our ideas in an open and supportive manner to achieve excellence.

Teamwork

Open Communication

Fostering an environment where information moves freely in a timely manner.

Honesty and Trust

Being sincere in everything we say and do.

Relentless commitment to protecting ourselves, our colleagues, and our community.

Safety

Respect and Dignity

Appreciating the individuality of others by our words and actions.

Leadership

Empowering individuals to help, guide and inspire others.

Holding ourselves responsible for our actions and performance.

Accountability

CH0031 Detailed Commercial Update – Interim Review

Feb 29, 2016

nalcor energy

General

- 3 Rebids opened February 15, 2016
- Addendum to be issued to address remaining technical clarifications and revised site conditions.
- Addendum to be issued to also address commercial clarifications and exceptions to agreement articles.

Bidder 1

Highlights

- Proposal not commercially compliant.
  - Pricing model proposed is fixed price for permanent materials, everything else reimbursable with markup
  - Have proposed very broad non-specific exceptions to Articles
  - Do not offer LOC or PCG as security.
- No cap on labour
- Bid Clar Mtg 4-June

Risks

- No incentive to perform well
- Have not waivered from price model when challenged
- Unlikely to agree to acceptable terms

nalcor energy

Bidder 2

Highlights

- Original proposal was not compliant
- After much clarification now close to compliance
- Many 'technical' exceptions with commercial implications
- Not offering LOC as security
- Few exceptions to Articles
- 50% labour contingency
- Bid Clar Mtg 21-May

Risks

- Price increasing as they become more compliant
- Will have trouble getting correct security
- If pushed too hard in negotiations they may withdraw

nalcor energy

Bidder 3

Highlights

- Proposal compliant
- Have been very responsive throughout bid clarification
- Have many exceptions to Articles however seem willing to negotiate
- Will provide LOC if required
- Company pays all of labour above TCL to LMAX
- 50%Labour contingency
- Articles discussion 8-Apr
- Bid Clar Mtg 28-May

Risks

- Negotiating acceptable T&C
- Proposed exceptions very change oriented
- Will become difficult to negotiate if we lose Bidders

nalcor energy

Lower Churchill Project

CH0031 Detailed Technical Evaluation – Interim Review

Feb 29, 2016

Boundless Energy

nalcor energy

Bid Review Scores

nalcor energy

Bidder Scores – Technical Team

Criteria	Bidder 1	Bidder 2	Bidder 3
Quality (P>60%)	Pass (79%)	Fail (56%)	Pass (77%)
Risk Management (P>60%)	Pass (75%)	Pass (73%)	Pass (77%)
Health and Safety (P>70%)	Pass (79%)	Pass (76%)	Pass (76%)
Environment (P>60%)	Pass (86%)	Pass (72%)	Pass (73%)
Technical	63%	58%	78%

nalcor energy

Bidder 1

Highlights

- Compliant with all RFP milestones
- Extensive execution plan
- Experience in Labrador and with MF project – current elec. and piping sub to Astaldi

Risks

- Manpower and infrastructure requirements
- Proposal is for reimbursable PM, engineering & commissioning
- 3 way JV will be problematic
- Experience of key personnel
- Schedule logic
- No existing St. John's office

nalcor energy

Bidder 2

Highlights

- Compliant with all RFP milestones
- Bidder has experience with similar scopes of work in Ontario
- Labrador experience
- Existing St. John's office

Risks

- Quality management system is a major concern
- Bidder's latest technical submission is better but responses have been difficult to obtain.
- Experience of key personnel
- Bidder meets minimum expectations in many areas

nalcor energy

Bidder 3

Highlights

- Compliant with all RFP milestones
- Good level of detail in Execution Plan
- Vast experience in Labrador and existing presence at MF Site.
- Few technical exceptions
- Existing project offices in St. John's

Risks

- Experience of key personnel
- Reluctant to name preferred sub-suppliers

nalcor energy

Key items to be resolved

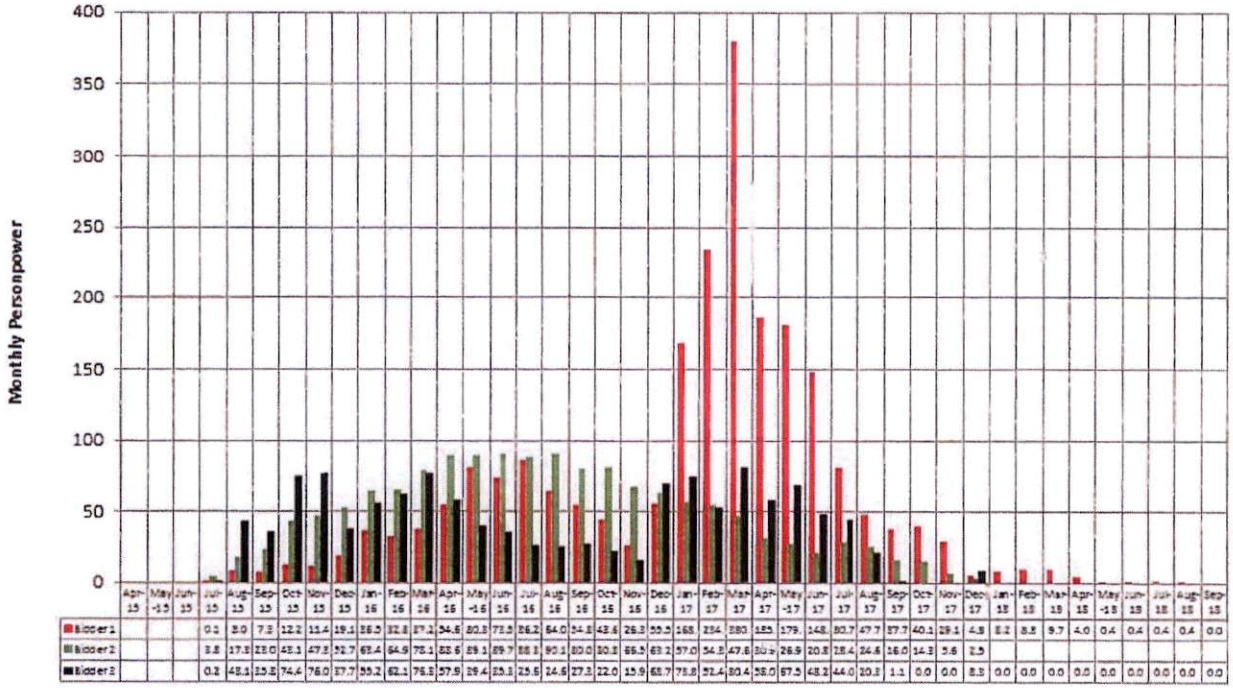
- Submitted schedules – logic and line items
- "access" – do we need to define this term and/or how it is triggered
- Site conditions – heat, washcars, trailers, warehousing, power etc.
- PCS – Project Completions System compliance
- Laydown areas and SSB space allocation
- GSU assembly expertise and work area
- Organizational chart and personnel qualifications
- Value substitutions recommend by bidders
- Updated Completions specification compliance
- "access" – do we need to define this term and/or how it is triggered

nalcor energy

Monthly Personpower Estimates – Original Bids

Schedule Export - CH0031

Note: Bidder 1 & 2 figures are from Original Bid Submission.
Bidder 3 figures are from Company Clarification/ Question response.



- Bidder 1, Construction Acts only! Total hrs = 688,099
- Bidder 2, Fabrication & Construction Acts! Total hrs = 442,013
- Bidder 3, Construction Acts only! Total hrs = 373,175

nalcor energy

CH0031 Current Status

- Bids closed 16Jan2015.
- All three bidders remain committed to bid; commercial and technical clarifications are ongoing.
- Updated bids received 12Feb2016.
- Clarification meetings planned for March & April 2016.

Re: CH0031 Steering Committee - meeting summary 25Apr2016

Philip Bursey to: Pat Hussey 05/09/2016 01:41 PM
Cc: David Wright, Scott O'Brien, Michael Fisher
Bcc: Paul Kennedy

Pat,

See my notes below in Blue.

Actions

1. A re-estimate of total labour man-hours for CH0031 is required - Philip, Scott and Dave to engage Ed Bush - Scott is actioning this item. Scott has contacting Ed Bush, no other action has been taken to this point
2. Analyze bids - will require clarification with bidders to ensure bucket allocations align - Philip & Michael - Revised proposal from GJC due this week, B&M have indicated they do not intend to resubmit their proposal until we update the schedule
3. Assess delta - and utilize CH0009 bid evaluation approach to assess exposure - Philip & Michael Not at the stage of evaluation where this type of analysis is necessary
4. Understand new commercial proposal from Bidder #3 - Philip & Michael Proposal reviewed and understood, awaiting updated proposal from B3
5. Complete quality management system assessment - Paul Fraser & David Green Audits complete, all bidders are acceptable from a Quality perspective with a minor adjustment to the overall quality scores to be made.
6. Provide copy of Schedule of Prices to Ron Power - Philip (COMPLETE)
7. Schedule discussion session with Jason Kean - Philip Scott has taken over this action
8. Schedule a meeting regarding options 6 & 7 from above options analysis - Philip Meeting Scheduled for 19-May-2016
9. Review previous options analysis performed last year for future discussion and analysis - Dave A quantitative analysis was performed last year involving Options 1-3 above which indicated that Option 1 was the best option. A copy of the presentation from last year is attached. CH0031 Strategy Review updated with cost estimate 22Oct2015.pptx

Subject: Re: CH0031 Steering Committee - meeting summary 25Apr2016

Philip / David
Can I get an update on the status of the actions from the meeting on the 25th April. I would like to know what progress has been made to move this along.

Sent from my iPad

On Apr 25, 2016, at 2:17 PM, "David Wright" <DavidWright@lowerchurchillproject.ca> wrote:

All,

Below are the key discussion points and actions from today's CH0031 Bid Review Steering Committee meeting:

CH0031 Bid - key area's of concern
1. Technical issues
2. Schedule - impacts to RFP process
- impacts to work
3. Commercial - reimbursable framework

CH0031 Options Analysis
1. Leave as is
2. Subdivide scope
3. Assign package to an existing on site contractor (settlement opportunity)
4. Fully reimbursable
5. Unit price - require bidders to comply
6. Self perform
7. Assess options to de-risk labour - lessons learned from existing project approaches CH0007, CH0007 & CH0009

Actions
1. A re-estimate of total labour man-hours for CH0031 is required - Philip, Scott and Dave to engage Ed Bush
2. Analyze bids - will require clarification with bidders to ensure bucket allocations align - Philip & Michael
3. Assess delta - and utilize CH0009 bid evaluation approach to assess exposure - Philip & Michael

4. Understand new commercial proposal from Bidder #3 - Philip & Michael
5. Complete quality management system assessment - Paul Fraser & David Green
6. Provide copy of Schedule of Prices to Ron Power - Philip (COMPLETE)
7. Schedule discussion session with Jason Kean - Philip
8. Schedule a meeting regarding options 6 & 7 from above options analysis - Philip
9. Review previous options analysis performed last year for future discussion and analysis - Dave

Also, as a point of clarification, I have looked back into my files - the labour hours for CH0031 as estimated by Paul Lemay and his group are as follows (approximately):

315,000 direct labour
185,000 indirect labour
500,000 total

Cheers,
Dave

Lower Churchill Project

CH0031 Clarification Meeting Technical Summary

Apr 25, 2016

nalcor energy

Bidder #1 21Mar2016

Meeting Technical Summary

- Existing Schedule dates are unachievable – Unit 3 Essential Services MCC
- Bidder wants to "own the float" in the schedule
- Bidder wants exclusive rights to define PM team
- Have taken exception to heat (Exhibit 12)
- Bidder appears frustrated with bid process and commitment to bid may be in doubt

Key Areas of Technical Focus

- Schedule - decent level of detail but has some logic errors
- Organization – huge organization proposed (no resumes)
- Interface management – will not provide preliminary A98 Interface Register
- Current commercial model does not support technical clarifications

nalcor energy

Bidder #2 30Mar2016

Meeting Technical Summary

- Existing Schedule dates are unachievable – Unit 3 Essential Services MCC
- Bidder has stated they have applied for ISO 9001 – audit this summer
- Bidder has made vast improvements to bid in the last 12 mths
- Will do cost reimbursable heating (Exhibit 12)

Key Areas of Technical Focus Going Forward

- QMS – is it acceptable?
- Schedule – decent level of detail but has logic errors
- Organization – need to ensure we get the A team
- Need to ensure improvements to bid are real and will be transferred to execution team

nalcor energy

Bidder #3 23Mar2016

Meeting Technical Summary

- Existing schedule dates are unachievable – Unit 3 Essential Services MCC
- Have taken exception to Heat (Exhibit 12)
- Bidder appears to be overconfident in their technical bid

Key Areas of Technical Focus Going Forward

- Schedule – weakest of 3 bidders currently
- Organization – need ensure we get the A team
- Overall engineering support throughout execution
- Preliminary A01 SDR needs development

nalcor energy

nalcor energy

CH0031 Bid Path Forward

- Continue technical clarifications with tracking on spreadsheet.
- Focus on award mid Summer 2016 for first interfaces in October 2016. Bid evaluation schedule is becoming very tight and this timeline may be challenged.
- Do we wish to focus on two bidders?

Subject: CH0031 Steering Commitee Actions

All,

The following actions arose from steering committee meeting;
1. Prepare document outlining history and how we plan to manage commercial risk associated with package. Philip Bursey / David Wright (Due: 15-Jun-2016)
2. Schedule workshop session to review compensation model options (ie. incentive/disincentive for management of labour and schedule risk. (Potential attendees: P. Hussey, G. Cahill, K. McClintock, E. Bush, B. Hallock, Westney, others) Philip Bursey (Scheduled for: 3-Jun-2016)
3. Schedule steering committee meeting to discuss risk mitigation options from item 2. Philip Bursey (7-Jun-2016)
4. Organize update of labour estimate using Steve Goulding, Paul Lemay and others as necessary. - Scott O'Brien (Start Date: 1-Jun-2016 estimated completion 24-Jun-2016)
5. Organize risk review session to analyze risks associated CH0031 execution - David Wright (Planned date: 15-Jun-2016)

LOWER CHURCHILL PROJECT

Minutes of Meeting

Project:	Lower Churchill Project	**Package No.:**	CH0031
Purpose:	Management of PLA Labour risk through risk reward compensation model	**Package Title:**	Supply and Install Mechanical and Electrical Auxiliaries (MF)
Location:	Soldiers Pond Room	**Date / Time:**	3-Jun-2016 @ 9:00 AM

Attendees:	Philip Bursey Michael Fisher David Wright	Gerald Cahill Ken McClintock	
Distribution:	Lance Clarke Pat Hussey Scott O'Brien Ron Power	Jason Kean Gerald Cahill Ed Bush Ken McClintock	
Recorded by:	Philip Bursey	**Signature:**	

Item	Description	Action	Date
1	Discussed the purpose of the meeting: Purpose: To review compensation options, with respect to PLA labour, and discuss potential methods, within the fixed price target cost of labour compensation model, to encourage Contractor to achieve agreement labour targets and schedule (ie. incentive/disincentive for management of labour and schedule risk) .		
2	Ideal is a cap on labour however a major Issue is that none of the bidders are currently willing to provide a cap on labour.		
3	Liquidated damages don't tend to be useful. Suggested that a combination of incentive and disincentive be employed on both labour hours and schedule.		
4	Because the compensation scheme is not set up in accordance with the milestone schedule it will be necessary to incentivise both to encourage Contractor to achieve both at the same time.		
5	2nd best approach is an incentive/ disincentive scheme on PLA Labour and a separate incentive/disincentive scheme on key milestone dates.

LOWER CHURCHILL PROJECT

Minutes of Meeting

Item	Description	Action	Date
6	Rather than one large incentive program on the all PLA Labour it was suggested that incentives may be linked to commodity groupings. Ie: - PIPING/MECHANICAL - SUPPLY AND INSTALLATION - HVAC SYSTEMS - SUPPLY AND INSTALLATION - ELECTRICAL - CONTRACTOR SUPPLIED - SUPPLY AND INSTALLATION - ELECTRICAL - FREE ISSUED MATERIALS - ASSEMBLY AND INSTALLATION - POWERHOUSE ARCHITECTURAL - SUPPLY & INSTALL - DIESEL GENERATOR SYSTEM - SUPPLY AND INSTALLALTION - PIPING/MECHANICAL SYSTEMS - SINGLE CONTRACTOR DYNAMIC COMMISSIONING - HVAC SYSTEMS - SINGLE CONTRACTOR DYNAMIC COMMISSIONING - ELECTRICAL SYSTEMS - SINGLE CONTRACTOR DYNAMIC COMMISSIONING - POWERHOUSE DIESEL GENERATOR SYSTEM - SINGLE CONTRACTOR DYNAMIC COMMISSIONING For example the Contractor would agree to a target and a maximum labour cost for each of these categories. If they come in below the target for a given category they will be entitled to the Labour Overhead and Profit and if all the hours were used. If they achieve all of their labour targets the will be entitled to OH&P up to the LMAX. On the disincentive side Contractor will be subject to a declining OH&P until they reach LMAX at which point they will not be entitled to any OH&P (Ie. PLA Labour will be reimbursed at cost).		
7	On the schedule side we would tie bonuses to the milestones to which LDs are currently linked in addition to the LDs.		
8	Draft incentive/disincentive proposal for presentation to steering committee.	PB/MF/DW	17-Jun-2016
9	Have Ed Bush review minutes and provide additional input.	PB	10-Jun-2016

Contract/Supplier hereby agrees that Contract/Supplier has reviewed and agrees with the content and accuracy of these Minutes of Meeting.

nalcor energy

Evaluation Status

- Bidders will be required to submit a pricing update when updated schedule is available
- Commercial Clarification / negotiation will be required
- Agreement clarification/negotiation is required.

nalcor energy

Basis for shortlisting Bidder 1

- Pricing is approximately 2x Budget
- Pricing is greater than 2x low bid
- Commercial model proposed does not comply with models requested in RFP
- Article exceptions are extensive and not commercially reasonable to negotiate
