

**Response to GT Q10.25**

*Question: Please provide a summary of the cumulative labour hours incurred by Astaldi compared to the cumulative volume of concrete poured by month from September 2013 to March 2018.*

**Response:**

Attachment 1 provides two graphs (and associated data).

Graph 1: Astaldi total hours (both indirect and direct) and Astaldi concrete hours (including hours for formwork, rebar and concrete), by month and cumulative. As per the notes provided below the graph, Astaldi reports their hours on a monthly basis. The first data point reported was for November 2013 (includes cumulative to date at that time) and the last current information is for month ending August 2018.

Graph 2: Concrete placed, by Astaldi, by month and cumulative starting from January 2014 through August 2018.
