

**Response to GT RFI #Q10.46**

*Question: With regards to the analysis referred to in 10.45, we have noted that the following individuals have been highlighted as having >30 years of hydro experience. Please provide support for this experience including the individual's time frame of involvement on the Muskrat Falls project and their role during that time frame:*

*- Bob Barnes, John Mulcahy, Timothy Dolen, John Mallam, Greg Snyder, David Besaw, Regis Bouchard, Lee Stanton, and Raj Kaushik*

**Response:**

The information was gathered based on a review of resumes (attached).

Name	Title	Start Date on Project	End Date on Project
Bob Barnes	Ready for Operations Manager	In 2006	Retired
John Mulchay	Hydroelectric Construction Specialist	2-May-11	24-Jul-17
Tim Dolen	Senior RCC Construction Engineer	23-May-17	Still on project
John Mallam	Operations//Engineering Interface		
Greg Snyder	Engineering Manager Hydro	Feb-12	Still on project
David Besaw	Senior Engineering Geologist		Still on project
Regis Bouchard	Lead Engineer Geotech	Nov-11	Still on project
Lee Stanton	Hydro Construction Planner	1-Apr-11	Still on project
Raj Kaushik	Electrical Lead	In 2006	Still on project

**Notes:**

- 1) Position titles may have changed over the course of Project Delivery Team member's tenor on the Project. As well, there may have been period of times whereby Project Delivery Team members had breaks of employment and then would have returned to the Project.
- 2) Missing from the record is a resume for John Mallam who was a NL Hydro/Nalcor employee who worked on the Lower Churchill Project.
- 3) Nalcor has not sought the permission of these individuals to release their personal information. If this personal information is to be released to the public then permission should be sought from these individuals prior to the release of their information.
