Lance,

There is detail in the 1999 report, there is data in the geotechnical baseline report and design is ongoing. The approach at present is a change from the past, you would need to go into SLI world for that. Plus, there is a field program being planned for next year.

Subject: North Spur

Are there any specific docs we need for the North Spur? MWH have extreme interest in it. If it is covered in the docs already sent then fine.

Let me know.
