I note that he specifically mentioned the site geology. We recently provided the north spur technical specs, 2013 geotech report, and prelim stabilization drawings.

Emails such as the one I sent to Suhuyini on 9/18 represent my attempt to keep you in the loop on what documents/responses MWH have been provided, but let me check with folks from the LCP Project team about how we might be able to give you more direct access to what's going into Aconex.

Could you somehow ensure we know what is posted to their site – we cannot assist in control and organization without that – as we discussed. Clearly they are not responding to our lists –maybe we could have access to their site?

Hi Folks

Over the past few weeks a number of responses/documents have been sent/posted for MWH for review. In my email to Suhuyini on 9/18 (which Rey was cc:ed on) I noted updates on 26 items from the o/s checklist. Based on this, I am somewhat surprised to see the statement below that he doesn't think much progress has been made. From my perspective, there are a significant number of items from the list that are now in MWH's court. Perhaps you could follow up with Rey to clarify his comment.

Thanks
Jim

Sorry, but I am trying to get ready for the Emera meeting tomorrow and catching up on the numerous items that need to be attended to with Nalcor issues.

I have asked Blaise to give me a call; she is also tracking our progress. Once I find out from her as to where she is on the IE's Report, I may be able to furnish some information for you to include to update your tracking report. Since Celeste, who also has been printing off items sent by Nalcor has indicated that not much has really come in, I do not think much progress has been made. I was expecting considerable information on the specific geology of the site to arrive; none has to aid in the field viewing either.

I will let you know what I learned after talking with Blaise.

Regards,

Rey

Rey,

Further to the email correspondence of this morning, we are updating the Outstanding Items List and we will be circulating it later this afternoon. As discussed, it is with this list that we can identify information and deliveries that the IE requires and Nalcor can advise as to status of these items. The email correspondence sent today will be reflected in the updated list and we that the IE review and provide us (i.e. please send the mark up to me) with comments so we can ensure that you have received the information requested.

Thanks,

Suhuyini

Subject: RE: Reference - ABB Excitation System (#10 from O/S Item List)

Hi James,

I requested a number and you sent me a list that I had before. I need confirmation on the number that I have given in the table (Table 3-2) is correct.

HOW MANY STATIC EXCITATION SYSTEMS HAS ABB MANUFACTURED FOR HYDRO GENERATORS AS THE SAME SIZE RANGE AS MF?

IS IT 25 AS I FOUND, OR IS IT MORE? PLEASE CONFIRM THAT **25** IS THE CORRECT NUMBER TO USE IN THE TABLE. See Table 3-2 , page 15, of the IE's Report, Item no. 4 within the table.

Regards,

Rey
