**Subject:** URGENT: This afternoon's meeting / MWH issues  
**Date:** Friday, November 1, 2013 10:16:02 AM  
**Importance:** High

---

Paul/Lance

See below. Ed Bush is out as well, but can join by phone. Having this discussion this afternoon is critical, as we need to be able to give Canada/CBB/MWH update on Capital Costs next week. Can you guys please make sure Brian and Ken participate in some capacity.

I also just got off the phone with Alison from CBB. She gave me a "private" heads up that Rey and, interestingly, David Pyper from BF have some real "hot buttons" that we need to address ASAP, otherwise there's potential issues with IE report. I can provide more detail in person this afternoon, but at a high level they are:

- Astaldi experience & competency (MWH have negative view on this)
- Critical path / milestone information (they claim what they've seen to date is inadequate and they are contemplating a negative comment in report on this point)
- Contingency is not sufficient (and has been burned up primarily with award of CH0007)
- North Spur (some o/s information we need to provide)
- Hydrology / Water Management in the context of HQ claim (this was the area we brought Gilbert into address + updated Hatch study...thought we were there, but apparently not quite)

She suggested we need another face-to-face session with Canada, CBB, MWH and BF in short order to address these issues and put them to rest once and for all to get a clean IE report by Nov 15. She acknowledged this will be painful, but has committed to being there to coral MWH and BF.

Thanks

Jim
