Regarding your note on the North Spur - that contract has been awarded to Gilbert Construction - last month I believe. They had mobilized and started clearing work under a limited Notice to Proceed - but the contract has now been signed. Progress has been good and we will have a presentation on that Monday, and site tour Tuesday AM.

Steve,

The itinerary looks good.

As for your questions my answers following the same order are:

- Project progress discussion; Astaldi performance; North Spur progress (when would the contract be awarded) and potential issues; Dams and BOP contracts award status; gates and turbines potential schedule delays due to Astaldi's progress; HVDC transmission line progress; convertor stations and synchronous condensers progress and potential issues.

- Visiting MWH folks - John Young, Paul Hewitt, Hamdy Kahlil. Perhaps specific side tours (like the last time) will be required .

- You already got the names from Canada.

Nothing more now but if I think of something else I'll contact you.

Regards,

Nik

Please see the attached proposed itinerary. We have started making preparations to meet the general arrangement illustrated in the attached. We have some flexibility during the time slots to accommodate where specific emphasis ought to be placed - and who we delegate to the various time slots/topics/work face areas accordingly. Please provide me some advice on the following:

Your specific requirements - topics to be covered in the introductory sessions in St. John's, work faces to attend, and resources you would like to interrogate.

Names of other MWH folk who may be attending and their specific requirements (I note that a transmission subject matter expert [Hamdy Kahlil] may have been part of the delegation last November - and we accommodated a specific side tour with special focus for him).

Who to expect from Canada - you can share this proposed itinerary with them and seek some input as well.

Any other needs pertinent to organizing a productive event.

The NL Gov Oversight Committee have signalled they will be sending 2-3 folk as well. However, I fully expect they will be content with taking in some or all of the elements you specify.
Thank you.
