□ I just spoke with Nik. He met with Pat Corser yesterday and advised MWH are currently not prepared to adopt the QA/QC approach you had proposed in our meeting in Toronto, and want to do it all ahead of IE certificate release. As you would expect, Nik sees this as being problematic. Nik pointed out to Pat it seemed pretty clear in the meeting this was something Canada, Nalcor and Emera, in addition to himself, all saw as being a good solution. Apparently Pat is going to call you and I today to discuss. I haven't heard from him yet....how about you?
