

Natural Resources**November 19, 2013****Muskrat Falls – Availability of Information**

- The Muskrat Falls Project and Bill 29 are unrelated.
- Never before in the history of this province has a project undergone such scrutiny, and never before has such detailed information been publicly available – a testament to the Muskrat Falls Project's openness and transparency.
- The Muskrat Falls Project has been extensively studied for years. Nalcor has made public hundreds of reports, studies, and tens of thousands of pages of information and analysis. This information has been presented to all government parties, the PUB, independent consultants, regulators, the public, critics, and many more.
- Every month Nalcor releases a Benefits Report that provides an update on the project – information on expenditures, employment, procurement, plus more is all available – simply visit Nalcor's website at www.muskratfalls.nalcorenergy.com.
- Nalcor has, and will continue to release information as requested, as long as it does not impact the commercial sensitivities of the project and doesn't compromise Nalcor's ability to obtain competitive bids. Nalcor is committed to being as open and as transparent as it can be on this project and in all its operations; however, the company must also balance its commercial interests.
