Lower Churchill Project - Muskrat Falls Loss
Date of Loss: May 29, 2016

Preliminary Loss Estimate

Summary

On May 29, 2016 the wooden forms supporting the Draft Tube 2 elbow collapsed while nearing completion of the 530 m3 D2ESB-03 concrete pour. As a result, the area known as the "Powerhouse" suffered significant damage. On May 30, 2016, OH&S issued a stop work order on all concrete pours on all four draft tubes and other work until the formwork and falsework were evaluated by a professional engineer licensed to practice in Newfoundland. Astaldi has incurred and continues to incur costs to repair and restore the property damage. Below is a summary of Astaldi's preliminary claim. This preliminary claim does not include any loss related costs incurred or estimated by Nalcor or any other named insured on the OCIP policy. In addition, this is NOT Astaldi's final claim as costs continue to be incurred and data/documentation continues to be collected. Astaldi's claim will be updated as costs are incurred and Astaldi further develops its damages.

[1] Category	Notes	Source	a	b	c=a+b

Interim Payment Amount Owed to Astaldi:			\$ 6,000,000			o=m+n

Notes:

[1] Astaldi is continuing to assess its damages resulting from the May 29th loss, including lost productivity incurred as a direct result of the Draft Tube 2 incident.

[2] Includes costs to remove debris, repair and rectify the property damage including labor, equipment, materials, third party vendor costs, and as well as other operating expenses to support the repair and rectification of damage.

[3] Includes costs related to labor inefficiencies and rescheduling of work as a result of the Draft Tube 2 incident. See Astaldi's Analysis of Direct Loss Productivity as of February, 2017.

[4] Costs associated with preparing Astaldi's insurance claim.

[5] Note: Contract Article 20.3 (iii) states: "...to the extent a claim for damage or loss was caused by the negligence of Company, Company shall be responsible for that portion of the deductible which represents the proportion of fault attributable to Company."

							Summary	Summary	Summary

Notes:

- [1] Shortly after the loss, Astaldi established separate accounting codes in its accounting system to track direct costs associated with the repair and restoration of property damage
- [2] Costs associated with Astaldi's direct craft labor used to repair and restore property damage.
- [3] Costs associated with Astaldi's equipment used to repair and restore property damage.
- [4] Costs associated with stock material used to repair and restore property damage. The figure also includes costs of materials to re-do the pour that occurred when Draft Tube 2 collapsed.
- [5] Costs associated with third party vendors providing rental equipment, materials, and services required to repair and restore the property damage.
- [6] Other operating expenses associated with the repair and restoration of property damage that were not tracked by the accounting codes. Estimated as a percent of direct costs to repair and restore the property damage.
