O/Ref: LTR-CD0501-AG-LILLP-0165

V/Ref: N/A

Agreement No: CD0501 - Converter Stations and Transition Compounds

Subject: GE's acquisition of Alstom's energy assets

Dear Mr. DeBourke,

Contractor notifies hereby that as part of the global sale of the thermal power, renewable power and grid business of the Alstom group (the "Power and Grid Business") to General Electric which closed this 2nd day of November 2015, the control of Alstom and its affiliates which are part of the Power and Grid Business has been transferred to a legal entity controlled by General Electric Company. Completion of the global transaction was announced by a press release the same day.

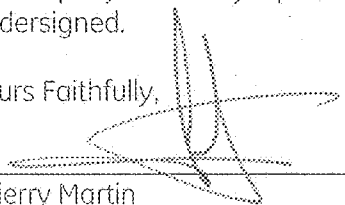

Please be advised that Alstom Grid Canada / Alstom Réseau Canada has changed its corporate structure transitioning from an "inc." company registered under the corporate laws of Quebec to an entity "ULC" (Unlimited Liability Corporation) registered under the laws of British Columbia, effective July 23rd, 2015. We will continue to operate under Alstom Grid Canada ULC / Alstom Réseau Canada ULC with the General Electric Company branding until the name is changed to GE Grid Solutions in the coming months.

These corporate changes are purely administrative and do, in no way, impact the ongoing contracts you have nor does it change your day to day relationship with Alstom.

Contractor attaches to the present letter official communication form Reinaldo A. Garcia, GE Grid Solution President & CEO, and John Lavelle, GE Grid Solution Chief Operating Officer.

If Company has any questions with respect to the above, please contact the undersigned.

Yours Faithfully,

 Thierry Martin

LCP Project Director

Dear Valued Customer,

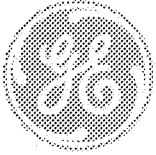

We're thrilled to announce that GE's acquisition of Alstom's energy assets is complete. We are also pleased to announce the formation of *Grid Solutions, a GE and Alstom joint venture*. Welcome to GE reimagined--a new beginning for GE and the world's energy industry.

What's in a name? *Grid Solutions, a GE and Alstom joint venture* combines what was formerly known as GE's Digital Energy business and Alstom's Grid business. "Grid" describes the segments we will serve for transmission & distribution and industrial customers. "Solutions" speaks to GE as a solutions provider building more reliable and resilient grids, integrating more renewable power, innovating mission-critical energy IT solutions and modernizing electrical networks.

A vision to power the world. GE and Alstom have a rich, robust and similar history, built on engineering, innovation and technology. Over 200 years of combined experience make GE's Grid Solutions business one of the leading players in global transmission and distribution. This business is the critical link which will help modernize the global grid and move power from generation to communities around the world.

Better together for you. The coming together of GE's and Alstom's portfolios as Grid Solutions is more than the sum of the two. This alliance offers our customers a new, cost-competitive "one-stop shopping" alternative backed by the combined project management and technology expertise of both companies. GE's Grid Solutions business will also connect you with GE's full energy portfolio, including Oil & Gas, Power & Water and Renewables, to better serve customers and offer significant value--the "GE Store."

Our Commitment. As we move forward through this exciting transformation of our Company and of the world's energy industry, we will continue to honor our fundamental commitments: to put you, our customer, first by offering the greatest level of service and support, operating with only the highest standard of integrity and safety, continuing to invest in our portfolio, and finding new ways to exceed your expectations.

Let's Talk! As we start to operate as GE's Grid Solutions business, our success will come from helping you succeed. We take pride in what we do and we will continue to work hard to maintain your valued loyalty. We will be reaching out to you in the coming weeks with more details about what our new business means to you specifically. In the meantime, do contact us if you have any questions.

Thank you for your business and for your support of GE. We're excited about our future and look forward to changing the world's energy landscape—together.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Garcia', is positioned above the printed name.

Reinaldo A. Garcia
President and C.E.O.,
GE Grid Solutions
