I know... we haven't even talked to Nalcor... let's zip out a full report on c, s, and r in a few weeks. Another word for you... absurd. We will get there.... Like I said, there is positive in this. Just need to align this client group.

Bizarre is the word. The article even refers to costs, risks and schedule – i.e. indicating the scope we had in mind!

Look forward to talking.

It's not a prerequisite. I've asked hickey to set up the call, should come shortly. I just wanted to get you thinking on it.

Check vocm, premier announced that we would have an update report in a couple of weeks. Not possible or realistic. Big disconnect between premier and minister. Well work through it. If there is a positive, they are committed :). Scope and expectations need to be managed.
Bizarre

Okay, are you wanting this workplan for the call?

Could you develop a workplan slide with activities detailed that reflects a scope of providing an update report on the status of mgmt/gnl actions taken in relation to our recommendations from the first report? Minister said she thought this was first step and wanted an understanding of the activities required. She is aware that it has limitations. I will drive an invite out shortly with note to full team, but wanted to plant seed with you to be timely.
