Subject: Keeyask Project - PUB Report

Hi Ron

Attached is a report issued by the PUB yesterday which questions MH's ability to effectively manage the project.

We would like to discuss with your team, how you have manage the public and external forces during your project. We are in the middle of a rate application hearing with the PUB and the Keeyask project is being scrutinized in this process. At the same time, we are at the peak of construction and carefully managing the necessary changes required to cause positive improvements for the General Civil work and the project as a whole.

Our primary concern is how to manage/contain this risk and prevent it from damaging the project.

Kelvin Shephard (CEO), Lorne Midford (VP Generation and Wholesale) and myself will be on the call from our side. The only time on Monday that we are not available is from 10:30am to noon. Let me know what time works for you. I look forward to talking to you and your team on Monday.

Regards,

Dave
