Nik

I sent this note yesterday following a meeting with Stan

The meeting went well, so I have some hope now.

I think that Stan is getting aware of the risks in just pushing ahead with eyes closed and hoping for the best.

Anyway I had to taLk Darren down from walking yesterday, hence my email to the leaders

Folks

I delivered the letter to Stan and he called me in

1 he appreciated the honesty

2 he wants to meet with the project team and tell them that he appreciates their efforts and knows they are doing their job to the best of their abilities

3 he wants the bifurcation of VPs between generation and transmission but is flexible about how that is implemented...he wants me ! Gilbert and John to work out the details with the minimum disruption. I stressed that the progressive turnover of LTA ,LIL and Sobi is the way to go ...he is not against that approach .

4 I am encouraged by his response.

So please do not make any sudden moves, stay the course with me and help me to manage this one to a conclusion, if you don't like the result at the end of that effort then you can decide what to do .....but I need everyone to take a deep breath and back me up for now. Can I count on you guys for that?

Paul
