I believe in the power of Newfoundland and Labrador.

I believe we are ready to take our place in the world as a global player in clean energy.

I believe the Muskrat Falls project is the strategic move we need to make. The development of this resource can change our province forever: it can give us the power we need, grow our economy, make us more self-sufficient, change how the world sees us, and how we see the world.

I believe in good things for our province. And I believe we have the courage to harness the opportunity before us and make these things happen.

About the Coalition

The coalition is unified by our passion for Newfoundland and Labrador and belief that Muskrat Falls will help us meet our power needs with stable rates over the long term, while creating more opportunities to attract industry and people, and build our communities and social fabric. We encourage Newfoundlanders and Labradorians to get engaged, learn more about the project if they don't already feel fully informed, and ask questions. The members of the coalition have done this in their own way and are coming together after reaching a common point of view.
