Attachments: The Labradorian: Nunatsiavut still waiting on methylmercury recommendations

Hi Ali,
 There is one more email on Nov 27 (attached). The first email in your list below is outside of the time specified. The rest of the email list is complete.
 The email subject "slide" ended up being the next steps recommendation to Cabinet in the presentation of Jan 9.

For the documents, *Technical Briefing Response to IEAC's MeHg Recommendations.pptx* contains recommendation that were considered by Cabinet but a revised and updated presentation (Jan 9, 2019) was actually used. I'm not sure what TMM_DMM_Analysis_final is.

Regards,
Martin G. Goebel

Subject: 146

Martin,
 This is the wording of the request:

"All responsive records related to the recommendations by the Independent Expert Advisory Committee on Muskrat Falls. Please provide all records from and including April 4, 2018 through to and including December 21, 2018."

Discussion with the applicant narrowed the request to Nov 27th to Dec 21st. (April 4th to Nov 27th was covered off in request MAE/134.)

The files were collected while I was away, but I assume these are what I have to process.

1. Am I missing anything?
2. Which, if any, were written for, or went to Cabinet?

Thanks.
