Resident Lampe

Sept 2012 - responded.  
- not achieved by Nelson - ~~Abot~~ Harris

- Flott laboratory

↳ lowest detection limit??

- 23L to build the coffer dam  
↳ shouldn't be any anyway.

- no impacts going forward.

- minimal impacts in

+ terms of reference +

+ votes, no insured structured

+ failed to respond to the IEAC

+ TRUSTS → Broken.

DRAP\*

(JAN 2018)

- Joint Dec. Mahy Authority  
- Impact Management Agreement.

Preadat Russell

• Happy here.

• work is as many people as we can.

• Lot of time and energy

• reasonable and verifiable rationale

• fulsome picture.

• now might clarify (2016) updatapher

• work with all parties L Edwards Island

• lot of IEAC for start Jan there.

Greg Riche - Grand Chief

• Congratulations.

- IEAC ~ stands by the science.
- professors + UN
- Inna Nation → land claims etc.
- At odds with the science.
- 4 of 6 scientists said dust removal

Recurrence

- Not influencing → eg. not getting into
- Health Risk
- TOR

Implementation of the four recommendations would be?

- NCC - "yes"
- NG + something new ~ "a must"
- not a place today to ~~re-negotiate~~ negotiate the T.O.R.

P: Inna Nation?

- Committee - IBA with Nalson
- mounting
- get members in place as quickly as we can do that.

• Save \$s to the groups at table 10

• finalize TOR.

• Get at two ASAP - money health issues

Walter Anderson

NG: Don't want Nelson in the committee; key part of the committee. \*

No problem with Jeds or process.

PP (CN): Structure in place in IBA; need to reassemble the team.

1 (NRE - Lead)

2 Voting raised by NG

3 Best water monitoring available

IEAC - 01 of 3 outcrossed (IN)  
o united nations rep  
o information not accurate source.

it appears to set a monitoring committee will we be continued to be outcrossed.

TON - confidentiality; consensus; values

4/  
1.2: Opportunity to reset the agenda

↳ some immediate benefits; public campaign.

TR monitoring + public <sup>health</sup> management

- + Unanimity around wetland cap +
- + Only one recovery, didn't have consensus - soil removal +
- + Accuracy → make sure info going out is accurate.
- + How we arrived at that?
- + Asked to first committee?
- + Review it properly +
- + Trust factor +

Committee

- o Monitor o
- o Public Health Management o
- o Health Care Professionals o

Minister Anderson

- Answer Q to Land Protection.
- Done this; not this.
- Full set of recommendations.
- o Assurance to all departments o

Comms  
(comp/ps)

o Leads a consensus o

ImplementationBharness

written response to each recommendation and why? Committee in place. Set with this group. Journals on line.

PP

IN: very difficult with old process; always overstated. "manufacturing" evidence to support. Wasn't appropriate. Listen to scientist.

PP 4 of 6 said no further mitigation.

Russell  
is what else  
is done?  
lg: clear

How do we make sure  
of the science being  
followed.

PP

Chain: Took alot of  
time to find a  
chain / not independent.
