

**Island Interconnected System  
Five Year Operating Data  
2011-2015**

	2011	2012	2013	2014	2015
Total Island actual peak demand (MW) <sup>1</sup>	1,525	1,531	1,640	1,687	1,705
Total Island actual energy used (GWh) <sup>1</sup>	7,652	7,687	7,996	8,226	8,562
Total number of bbls of oil burned at Holyrood (bbls)	1,469,169	1,428,337	1,610,966	2,251,225	2,423,337
Total cost of oil burned at Holyrood (\$000)	135.1	164.0	171.8	244.3	162.9
Total yearly energy output at Holyrood (GWh) <sup>2</sup>	885.3	855.8	957.4	1,315.3	1,458.5
Number of hours each year that Holyrood operated at capacity (hours) <sup>3</sup>	18	8	85	201	337
Notes:	<ol style="list-style-type: none"> <li>1. Total Island peak demand and energy includes NLH supplied and customer owned generation and Deer Lake Power and Newfoundland Power.</li> <li>2. Net energy output of the Holyrood generation station (i.e. excludes station service requirements).</li> <li>3. The number of hours per year the Holyrood generating station is operated at or above 90% of maximum rating. Maximum rating is 490 MW.</li> </ol>
