Kennedy Avoids Opposition Request for Documents

In the House of Assembly today Liberal Opposition Leader Dwight Ball asked the Minister of Natural Resources to table all documents relating to three specific requests on the Muskrat Falls project. These include reports on natural gas, cash flow projections from Nalcor, and power purchase agreements with Newfoundland and Labrador Hydro.

"Yesterday in the House of Assembly, Minister Kennedy stated that he had received expert opinions on the viability of using natural gas for our energy needs," said Ball. "I asked the Minister to table these documents, but he avoided my questions."

Ball stated that his requests to the Minister should be easy to fulfill and is dismayed at the Minister's lack of responsiveness.

"Government constantly states that they welcome debate on Muskrat Falls and claim that all information is publicly available, but their actions contradict their statements," said Ball. "If Minister Kennedy was interested in informing the people of our province on this project, he would table all these relevant documents."
